In addition to the flu vaccine, there are other steps that you can take to help prevent influenza, colds and other contagious illnesses.

- Cover your nose and mouth with a tissue when you cough or sneeze and throw the tissue in the trash after you use it.
- Wash your hands often with soap and water. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose and mouth. Germs spread this way.
- Stay home when you are ill and try to limit contact with others as much as possible to keep from infecting them.
