

Glenn County Operational Area

Multi-year Training and Exercise Plan
2018-2023

September 7, 2018

Updated September 4, 2019

PREFACE

This Training and Exercise Plan was developed by the Glenn County Office of Emergency Services for the Glenn County Operational Area. The MYTEP serves as a planning document and prioritizes training and exercise capabilities for response agencies and is the primary responsibility of Glenn County Sheriff's Office – OES and Glenn County Health and Human Services Agency – Public Health Emergency Preparedness Program. This document is updated annually.

PURPOSE

The purpose of the Multi-year Training and Exercise Plan (TEP) is to document an organization's overall training and exercise program priorities for a specific multi-year time period. It is considered to be a living document that can be updated and refined annually. These priorities are linked to corresponding core capabilities, and, if applicable, a rationale based on existing strategic guidance, threat assessments, corrective actions from previous exercises, or other factors. This Multi-year TEP identifies the training and exercises that will help the organization build and sustain the core capabilities needed to address its training and exercise program priorities.

The Multi-year TEP should lay out a combination of progressively building exercises – along with the associated training requirements – which address the priorities identified in the Training and Exercise Planning Workshop (TEPW). A progressive, multi-year exercise program enables organizations to participate in a series of increasingly complex exercises, with each successive exercise building upon the previous one until mastery is achieved. Further, by including training requirements in the planning process, organizations can address known shortfalls prior to exercising capabilities.

A Multi-year TEP may also serve as a follow-on companion document to the Glenn County Office of Emergency Services and Public Health Preparedness and Health Care Coalition Preparedness plan (work plan documents and other preparedness tools), and can provide a roadmap for Glenn County to follow in accomplishing the priorities described therein.

Included in this Multi-year TEP is a training and exercise schedule, which provides a graphic illustration of the proposed activities scheduled for the years 2018 through 2023.

PROGRAM PRIORITIES

1. Hazardous Materials release incident response
2. Multi-Casualty Incident response
3. Emergency Operations Coordination
4. Mass Care and Shelter
5. Public Health and Medical

Priority 1

Hazardous materials incident response

Corresponding Core Capabilities:

- Operational Coordination
- Environmental Response/Health & Safety
- Public Health & Medical Services
- Public Information & Warning

Rationale:

- **Hazardous materials release both from fixed facility and transportation ranks in our top ten hazards.**

Supporting Training Courses and Exercises:
