Can a person get a booster dose that is different from their original series?

A single booster dose of any of the available COVID-19 vaccines may be administered as a mix and match (heterologous) booster dose following completion of primary vaccination with a different available COVID-19 vaccine. The decision for which booster to receive is a personal choice based on medical advice from their provider and/or availability.

Will I also be able to get the flu vaccine at these clinics?

These community COVID-19 clinics will not offer the flu vaccine. Residents may get both the COVID-19 vaccine and the flu vaccine through public health, pharmacies, pediatricians, and some healthcare providers. For a listing of sites that provide these vaccines visit, <https://myturn.ca.gov/> and <https://www.vaccines.gov/>.

Glenn County Public Health strongly urges everyone who is eligible to get fully vaccinated. These clinics are voluntary and do not mandate anyone to get vaccinated.

For more information on COVID-19 vaccine resources, contact TCCAP Monday through Friday 8:00 am to 5:00 pm at 1-855-268-2227 or visit www.countyofglenn.net/COVID19.
