Jim Donnelly
Agricultural Commissioner
Sealer of Weights & Measures

#9C
REVISED 11/2013

Propanil Permit Conditions

- A. No emulsifiable concentrate formulation shall be applied.
- B. Applications using aircraft shall be made in accordance with the following requirements.
1. Aerial applications shall not be made within four miles of cultivated commercial planting of prunes.
 2. No more than 720 acres may be treated by aircraft within each county per day.
 3. Each operating aircraft nozzle shall produce a droplet size, in accordance with the manufacturer's specifications, not less than 600 microns volume median diameter (Dv0.5) with not more than ten percent of the diameter by volume (Dv0.1) less than 200 microns.
- C. Applications by ground equipment shall be made in accordance with the following requirements:
1. Ground applications shall not be made within one mile of cultivated commercial plantings of prunes, except as provided in (a) and (b) below.
 - (a) The commissioner may allow applications to be made to sites not less than one-half mile from cultivated commercial plantings of prunes if the following requirements are met:
 - (1) Prior to the application, the operator of the property shall provide to the commissioner a recommendation written by a licensed pest control adviser stating there are no other feasible pest management alternatives;
 - (2) Onsite monitoring of wind speed and wind directions shall be conducted by the applicator in a manner approved by the commissioner throughout the entire application. A record of recorded data shall be retained for one year; and
 - (3) A positive airflow away from the cultivated commercial plantings of prunes is present throughout the entire application.
 - (b) The commissioner may allow applications to be made to sites less than one-half mile from cultivated commercial plantings of prunes when the following requirements are met in addition to the requirements of (a) above:
 - (1) The commissioner shall provide onsite monitoring of all ground applications when within ½ mile of prunes.
 - (2) The commissioner shall provide for notice to, and opportunity to comment by, any owner of cultivated commercial plantings of prunes within one-half mile of the application.
 - (3) Commissioner authorization form and conditions shall be completed.
 2. Each operating nozzle shall produce a droplet size, in accordance with the manufacturer's specifications, not less than 500 microns volume median diameter (Dv0.5) with not less than ten percent of the diameter by volume (Dv0.1) less than 200 microns.

D. Notice of Intent Procedures: Aerial

1. A notice of intent is required and shall be day and site specific. Aerial Pest Control Operators must specify the intended day of application. Because of the limited acreage, aerial applicators will need to contact our office before applications in order to coordinate the 720 acre limitation.
2. Notice of intents maybe submitted 3 days or 72 hours prior to the intended day of application. If you are unable to start or complete the application; you must notify our office preferable by 12:00 noon on the day of the proposed application.
3. Aerial Pest Control Operators may submit NOI's by calling (530) 934-6569 or by faxing to (530) 934-6503.
4. No application shall be made if the wind speed exceeds 10 miles per hour.
5. Pest control Operators should call the weather station at (530) 982-1021 to obtain wind speed data and temperature conditions.
6. It is imperative that Pest Control Operators submit pesticide use reports within 7 days of completion of the application.
