STAFF REPORT

MEETING DATE: Wednesday, June 21, 2017

TO: Planning Commission

FROM: Andy Popper, Associate Planner

RE: Administrative Permit 2017-003 (Appeal Continuation)
Second Residence, “RE-NW” Zoning District

Attachments:

1. Memorandum, Planning Commission Special Counsel

2. Documents provided by Appellant and Applicant at Planning Commission

3. ADM 2017-003, Planning Commission Appeal (Staff Report, Attachments)
1 PROJECT SUMMARY

Bill Leveroni of Executive Homes, on behalf of the landowners Patrick Otterson and Mary Ann Shadley-Otterson, applied for an Administrative Permit to locate a 1,620 square foot (27 foot by 60 foot overall dimensions) manufactured home as a second residence on Assessor’s Parcel Number 005-020-001. The existing residence, located at 1070 Pacific Avenue, Willows, is approximately 125 feet south of the proposed residence.

The project site is located on the south side of County Road 48, east of Pacific Avenue, and north of 1st Avenue in the unincorporated area of Glenn County, California. The parcel is zoned “RE-NW” (Rural Residential Estate-North Willows, 40,000 square feet minimum parcel size) and is designated “Suburban Residential” in the Glenn County General Plan.

This project was approved on April 24, 2017, by the Planning & Public Works Agency Deputy Director. On May 2, 2017, the approval was appealed by Leonard and Roberta Krup citing incompatibilities with existing zoning requirements and existing neighborhood character. This appeal was modified by the appellants during the public hearing held by the Glenn County Planning Commission on May 18, 2017, to state that Glenn County’s zoning ordinance with respect to accessory dwelling units (second residences) was not compliant with state law (California Assembly Bill 2299).

Specifically, the appellant stated that a maximum size of 1,200 square feet was imposed upon accessory dwelling units, and that because the Glenn County zoning ordinance (Glenn County Code Title 15) imposed no maximum size for an accessory dwelling unit (second residence) it was unlawful for the County to approve the permit. The Planning Commission requested to seek a legal opinion from Glenn County Counsel regarding the issue and continued the matter to the Wednesday, June 21, 2017 meeting.

2 LEGAL OPINION

As Glenn County Counsel advises the Glenn County Board of Supervisors on matters and as the appeal of this project could potentially be reviewed by the Board of Supervisors, Planning Division staff was asked to seek an opinion from outside counsel. Staff sought the services of Gregory P. Einhorn as special counsel to provide an opinion regarding the potential conflict with state law.

Mr. Einhorn indicates that the Glenn County Code is not in conflict with state law in that local agencies have discretion in allowing accessory dwelling units in excess of 1,200 square feet. Mr. Einhorn’s analysis is attached for reference.

3 MOTIONS

After consideration of the record and the evidence offered, the Glenn County Planning Commission may affirm, reverse or modify, in whole or in part, the decision of the Deputy Director of the Planning & Public Works Agency (Glenn County Code 15.050.010 (C)).
MEMORANDUM

TO: Glenn County Planning Commission

Mardy Thomas, Principal Planner
Glenn County Planning & Public Works Agency

FROM: Gregory P. Einhorn, Special Counsel to the Glenn County Planning Commission

SUBJECT: Appeal of Glenn County Planning Administrative Permit 2017-003

DATE: June 7, 2017

Question: The Glenn County Code sets forth a minimum, but no maximum, of total floorspace area for detached accessory dwelling units. In the absence of a maximum total area of floorspace for detached accessory dwelling units, does the Glenn County Code conflict with state law, such that state law thereby imposes a maximum of 1200 square feet of floorspace for detached accessory dwelling units?

Opinion: No. State law does not impose a maximum total area of floorspace for detached accessory dwelling units. State law restricts local agencies from imposing a maximum floorspace area in excess of 1200 square feet. Local agencies have discretion to permit floorspace of detached accessory dwelling units in excess of 1200 square feet.

Analysis:

Appellants’ (Patrick and Mary Ann Shadley-Otterton) application for a second residence (accessory dwelling unit, ADU), to be located at 1070 Pacific Avenue, Willows, was approved by the Glenn County Planning and Public Works Agency Deputy Director on April 24, 2017. (Administrative Permit 2017-003, APN 005-020-001.)

1 The property is located in the RE NW zoning district. Glenn County Code Chapter 15.360. Section 15.360.040 provides for a “second residence” per parcel by way of an administrative permit. “Residence” means a building used, designed or intended to be used as a home or dwelling place for one family.”
The approval was appealed to the Glenn County Planning Commission by appellants Leonard and Roberta Krup on various grounds, set forth in a written notice of appeal dated May 2, 2017. At the May 17, 2017 Commission hearing, the appellants set forth a new ground for appeal, claiming that the County’s zoning ordinance for the approval of ADUs was invalid.

Specifically, appellants cited Senate Bill 1069 and Assembly Bill 2299, codified at amendments to Government Code Section 65852.2, governing how local agencies regulate ADUs. Appellants contend that these newly enacted provisions operate such that they impose upon local agencies a directive that the maximum total floorspace for a detached ADU shall not exceed 1,200 square feet. Because the floor space of the applicants’ proposed ADU floorspace of 1,620 square feet exceeds 1,200 square feet, appellants contend that the Administrative Permit should not have been issued.

The Planning Commission has asked for a legal opinion regarding this challenge to the Administrative Permit.

As set forth in materials submitted to the Commission by appellants, the Legislature amended section 65852.2 intending to address the shortfall of affordable housing by easing restrictions on ADUs. Specifically, the conditions under which ADUs must be permitted have been expanded and use of discretion by local agencies in reviewing and permitting ADUs has been reduced, restricted, or prohibited. The amendments were intended to encourage ADUs. In the absence of a local ordinance complying with ADU law, local review is limited to state standards and a local agency cannot impose more restrictive limitations upon the approval of ADUs.

Government Code section 65852.2(a)(1)(D)(v) provides that a local agency may “require [that the] total area of floorspace for a detached accessory dwelling unit shall not exceed 1,200 square feet.” This provision sets the upper limit as to what a local agency may impose upon the floorspace of a detached ADU. This provision does not prohibit a local agency from permitting detached ADUs greater than 1,200 square feet in floorspace.

For example, if a local agency had in place a provision limiting detached ADUs to 500 square feet, that maximum would not be enforceable and the agency would be required to permit the structure (assuming all other applicable conditions were met) if the ADU did not exceed 1,200 square feet. 1200 square feet is therefore the most restrictive floorspace limit a local agency may impose upon a detached ADU. As set forth in section 65852.2(g): “[t]his section does not limit the authority of local agencies to adopt less restrictive requirements for the creation of an accessory dwelling unit.”
The County does have in place a less restrictive requirement for the maximum floorspace of a detached ADU. While Glenn County Code sets forth a minimum floorspace, the Code does not impose a maximum floorspace limit.2 “All dwelling units shall be at least fourteen feet in width or diameter (excluding eaves) and at least seven hundred square feet in gross floor area.” Glenn County Code section 15.590.020.

The County has determined not to impose a maximum floorspace for detached ADUs. By Government Code section 65852.2, the Legislature has specifically provided the County with that discretion.

For the reasons set forth above, the applicants’ proposed ADU floorspace is not limited to 1200 square feet by operation of Government Code section 65852.2.

2 That the County does not impose a maximum total area floorspace cannot be construed as a default to the most restrictive upper limit imposed on local agencies by the state. To so read section 65852.2 would disregard the intent of the amendments to that section.
ALAMEDA COUNTY COMMUNITY DEVELOPMENT AGENCY
PLANNING DEPARTMENT
STAFF REPORT

TO: Castro Valley Municipal Advisory Council

HEARING DATE: January 23, 2017

GENERAL INFORMATION

PROJECT: County-initiated amendments to the Alameda County General Ordinance Code to update regulations on secondary units

PROJECT PROPOSED: Alameda County Community Development Agency

PROPOSAL: Consideration of Temporary Ordinance Amendments Related to Secondary (Accessory Dwelling) Units to bring Alameda County into compliance with a recently approved state statute

ZONING / SPECIFIC PLAN DESIGNATION: Countywide in all residential zoning districts

GENERAL PLAN DESIGNATION: Countywide in all residential land use designations

ENVIRONMENTAL REVIEW: The proposed amendments have been reviewed in accordance with the provisions of the California Environment Quality Act (CEQA) and have been found to be exempt from further environmental review pursuant to CEQA Guidelines Section 15282(h) and Public Resources Code Section 21080.17 which exempt the local adoption of ordinances regarding second units in a single-family or multifamily residential zone to implement Government Code section 65852.2 and pursuant to the general rule in CEQA Guidelines Section 15061(b)(3), which specifies that CEQA applies only to any project with the potential to cause a significant impact on the environment.

RECOMMENDATION

Staff recommendation to the Castro Valley Municipal Advisory Council is to recommend approval, to the Board of Supervisors, of the proposed temporary Ordinance amendments and two-step approval process for attaining compliance with new state requirements related to secondary (accessory dwelling) units.

BACKGROUND

In September 2016, California State Assembly Bill 2299 and State Senate Bill 1069 were signed into law. The combined bills took effect on January 1, 2017, and modified California Government Code Section 65852.2 (State Law) (Exhibit A), which governs how local agencies regulate "Accessory Dwelling
Units,” formerly and commonly known as secondary units, second units or in-law units. The new State Law is intended to address the shortage of affordable housing by easing restrictions on accessory dwelling units (ADUs). Specifically, the conditions under which they must be permitted have been expanded and use of discretion by local agencies in reviewing and permitting ADUs has been prohibited unless the purpose of exercising such discretion is to facilitate the creation of new ADUs. The State Law includes several mandatory elements but also provides flexibility in how some of those elements are applied. The mandatory elements would expand areas where ADUs must be permitted and ease parking requirements, size limits, and the collection of ADU related fees. The Law requires that new ADUs be allowed in single and multi-family residential neighborhoods on properties with existing single family homes that have adequate water and sanitary services, and when there would be no threat to public health or safety. However, if the minimum requirements of State Law are satisfied by a local ordinance, the ordinance may place some restrictions on the locations where ADUs may be permitted and the sizes of ADUs, and may implement development standards such as minimum setbacks and height limits.

The State Law requires any local ordinance to comply with the new standards. Effective January 1, 2017, any local ordinance not in compliance with State Law will be deemed “null and void” and the local agency will be required to apply the new State Law standards to new ADUs.

The following list identifies pertinent mandatory elements of the State Law:

- The ADU may not be sold separately form the main dwelling unit.
- The lot is zoned for single-family or multifamily use and contains one existing single-family dwelling.
- The ADU is on the same lot as the main dwelling unit.
- The maximum size of the ADU is 50 percent of the existing living area, with a maximum increase in floor area of 1,200 square feet.
- The total floor area for a detached accessory dwelling unit shall not exceed 1,200 square feet.
- No setback shall be required for an existing garage that is converted to an accessory dwelling unit, and a setback of no more than five feet from the side and rear lot lines shall be required for an accessory dwelling unit that is constructed above a garage.
- Parking requirements for accessory dwelling units shall not exceed one parking space per unit or per bedroom.
- Off street parking shall be permitted in setback areas in locations determined by the local agency or through tandem parking, unless specific findings are made that parking in setback areas or tandem parking is not feasible based upon specific site or regional topographical or fire and life safety conditions, or that it is not permitted anywhere else in the jurisdiction.
- When a garage, carport, or covered parking structure is demolished in conjunction with the construction of an accessory dwelling unit, the replacement spaces may be located in any configuration on the same lot as the accessory dwelling unit, including, but not limited to, as covered spaces, uncovered spaces, or tandem spaces, or by the use of mechanical automobile parking lifts.
- Applications for new ADUs must be approved ministerially (e.g. through building permit process) within 120 days of receipt.
- The new ADU shall not be considered residential growth or be counted toward density limitations.
- A local agency may not require a new or separate utility connection directly between the accessory dwelling unit and the utility if the ADU is within the existing space of a single-family residence or accessory structure, has independent exterior access from the existing residence, and the side and rear setbacks are sufficient for fire safety.
- Notwithstanding any other section, no additional parking for an ADU may be required when:
  - the property is located within one half mile of public transit;
- the property is located within an architecturally and historically significant historic district;
- the property is entirely within the existing space of the existing primary residence or an existing accessory structure;
- on street parking permits are required but not offered to the occupant of the accessory dwelling unit; or,
- there is a car share vehicle located within one block of the accessory dwelling unit.

The following list identifies elements where local agencies are permitted flexibility in regulating ADUs to suit local needs:

- Designate areas where accessory dwelling units may be permitted. The designation of areas may be based on criteria including, but not limited to, the adequacy of water and sewer services and the impact of accessory dwelling units on traffic flow and public safety.
- Impose standards related to number of parking spaces (except in the cases described in the last bullet in the previous section), height, setbacks (except for detached garage and accessory structure conversions), lot coverage, landscaping, architectural review (via design guidelines approvable by staff), maximum size of a unit, and standards that prevent adverse impacts on any real property that is listed in the California Register of Historic Places.
- A local agency may reduce or eliminate parking requirements for any accessory dwelling unit.
- A local agency may require that the property be owner-occupant or that the property be used for rentals of terms longer than 30 days.

Staff has referenced the State Law against current County regulations and determined that County development standards and approval procedures contained in the Alameda County General Ordinance Code (Code), certain specific plans and one County policy are not in full compliance with the new State Law and, therefore, would be deemed “null and void”. Thus, the County would be required to defer to the strict mandates of the State Law without the flexibility allowed when a compliant local ordinance is in place. Staff is proposing temporary amendments to the Code in order to bring the ordinance into compliance with the State Law. This would allow staff to concurrently work with decision makers and the community to assess whether additional amendments are desired and to develop permanent regulations that serve the needs of County residents. With temporary standards in place, the County could continue to apply development standards related to size, setbacks, height and the like, while exploring what, if any, other changes may be needed to implement the new State Law or are desired by the community. Temporary standards adopted within 120 days from January 1, 2017 would also enable the County to regulate new ADUs in accordance with the local ordinance, as opposed to being forced to approve ADUs meeting only the minimum mandatory elements of the new State Law. Further, they would allow time to examine the appropriate locations for ADUs in the unincorporated County and for the public to participate in updating specific plans and other regulations that govern their communities. The proposed temporary Code amendments are shown in Exhibit B. Staff is proposing a two-step compliance process, as follows:

- **Step 1:** Implement “temporary” Code amendments in order to quickly comply with State Law and minimize the period during which the State Law standards are applicable to new ADU applications. Current development standards would remain in place as allowed by State Law and new ADUs would be allowed where they are currently allowed by right. Approval of new ADUs would be paused in locations where ADUs were only conditionally permitted with a discretionary permit while new regulations are being developed and where the revision process is time-intensive, as is the case with specific plan updates and evaluations of where ADUs should be permitted.
- **Step 2:** While the temporary ordinance is in place, complete a thorough evaluation of areas that can support ADUs, develop a proposal for permitting procedures within specific plan areas,
present the information for community input and discussion and present proposed permanent ADUs standards to decision makers.

It should also be noted that in addition to the new State Law, the Alameda County Community Climate Action Plan (Exhibit C), adopted in February 2014, identifies reducing parking restrictions and allowing ADUs in certain residential areas near public transit as a short-term greenhouse gas reduction strategy. This document was fully vetted by the community and indicates that there may a desire to ease parking restrictions on ADUs and expand the locations in which they are permitted. This measure was expected to be implemented within 1-2 years following approval of the Climate Action Plan, and is in line with the State Law. In addition to reducing greenhouse gas emissions in areas where public transit is available, ADUs also provide affordable rental housing, put more rental housing on the market and can assist existing and prospective property owners to afford to purchase property.

STAFF ANALYSIS

Staff has referenced the new State Law against the Alameda County General Ordinance Code as well as local area Specific Plans and other relevant County plans and policies, in order to identify where changes to local regulations are needed to attain compliance. Several discrepancies were identified during staff review; these generally pertain to approval procedures and criteria, parking requirements and park dedication fees. The Code currently allows for the creation of ADUs within its SU/CSU (Secondary Unit/Conditional Secondary Unit) Overlay district, where they are permitted by right if all applicable standards are met, and which is known to have infrastructure sufficient to accommodate new ADUs. This would include areas within Homeowners’ Associations (HOAs), if any, that may have restrictions on the creation of ADUs. The SU/CSU overlay generally includes the Castro Valley area, part of Cherryland and Ashland, and two individual properties in the eastern portion of the County. However, it’s possible that other areas within the County contain properties with space and infrastructure sufficient to support the creation of new ADUs. For instance, single family districts in flat areas with lot sizes at a minimum of 5,000 square feet, with sewer and water service and improved public streets may be able to accommodate ADUs. Large lot single-family residential districts where water and or off-site sewer services are available may also be able to accommodate new ADUs without much difficulty. However, many such areas are not included within the SU/CSU overlay districts and are not currently permitted by right, as is now required by State Law. Based on inquiries made by staff, at least 63 HOAs are present in Alameda County and 23 of those do not have formal prohibitions against ADUs. Within the San Lorenzo Village Homes Association area, ADUs are not allowed. How HOAs choose to address ADUs would be between them and the residents within their boundaries and is not related to County compliance with the new State Law. However, this consideration is worth noting since several County residences are located within HOAs.

SU/CSU District requires a total of four off-street parking spaces on properties with ADUs, which exceeds the maximum amount of parking allowed by the new State Law, does not account for the special circumstances where no parking can be required, and does not account for garage conversions, when only replacement parking can be required. The same is true concerning the Fairview Specific Plan, Madison Avenue Specific Plan, Little Valley Specific Plan, and Rural Residential Policy which applies Countywide to larger single family lots with single family homes in rural areas. There are also obsolete provisions related to Conditional Use Permits and Site Development Review requirements within the CSU overlay district, which were superseded by state law several years ago and are no longer enforceable. The aforementioned specific plans and Rural Residential Policy also include discretionary review processes such as rezoning, Site Development Review and review by local homeowner’s associations in order to approve ADUs. This is no longer permissible and these processes will need to be modified in order to comply with State Law. Since utility connection and Park Dedication fees may only be assessed for new attached or detached ADUs which expand an existing building envelope, the Code
section regulating Park Dedication fees, which now applies to all new ADUs, will also need to be revised. In order to ensure consistency throughout the Code and with specific plans, some other minor edits will be needed.

The above described Code inconsistencies related to parking, CSU requirements and Park Dedication fees can be addressed relatively quickly by approving a series of minor text amendments that meet the related requirements of State Law. However, the locational aspects of the County’s current requirements will require a more in-depth analysis and public input in order to assess whether the locations where ADUs are permitted should be expanded. Extensive public input will also be critical to revising approval criteria contained within the Fairview Specific Plan, Madison Avenue Specific Plan, Little Valley Specific Plan and Rural Residential Policy. This is especially true since discretionary approval can no longer be required. Accordingly, amending the above plans and identifying suitable areas for ADUs will require more than the 120 days that State Law allows for ministerial (e.g., building permit) application review and approval. In order to ensure a complete analysis by staff, adequate public input, and a full and meaningful discussion by decision makers, several weeks, if not months, of public discussion will be necessary.

Should the County opt to forego the proposed two-step compliance process and instead move forward with developing permanent regulations, there would likely be a period of several months when new ADUs must be permitted in all single and multi-family residential district on properties that contain an existing single family residence. In these cases, no size, setback, height, lot coverage, time or owner-occupancy restrictions could be applied aside from what the new State Law permits.

CONCLUSION

The proposed amendments to Titles 12 and 17 of the Alameda County Zoning Ordinance are recommended in order to comply with the minimum requirements of State Law, while allowing County staff, stakeholders and decisions makers to fully evaluate and implement permanent regulations governing the creation of new ADUs.

NEXT STEPS

Staff will present the proposed amendments and two-step process to the Board of Supervisors Unincorporated Services Committee on Wednesday, January 25, 2017, to the Transportation and Planning Committee and Planning Commission on February 6, 2017 and to the Board of Supervisors in February 2017, on a date to be determined.

REVIEWED BY: Rodrigo Orduña               Assistant Planning Director

JANUARY 23, 2017   CASTRO VALLEY MUNICIPAL ADVISORY COUNCIL
TRINITY COUNTY PLANNING COMMISSION
STAFF REPORT

APPLICANT: County of Trinity

REPORT BY: John Jelicich

APPLICATION:

1. General Plan Amendment to change text and program 2.5 in the “2014-2019 Housing Element” of the General Plan.

2. Zoning Ordinance amendment to delete Section 30.D.3 (Second Dwelling Units) in its entirety and replace with a new Section 30.D.3 (Accessory Dwelling Units).

LOCATION: County-wide

PROJECT DESCRIPTION:

The legislature passed and the Governor signed AB-2299 and SB-1069 into law. This law clarifies and expands existing law (Gov. Code, Sec. 65852.2) requiring local jurisdictions to provide an unobstructed way to allow an accessory dwelling unit (a.k.a. second dwelling) to be developed on a parcel zoned for single family residential use. The law specifically states that the permitting procedures must be ministerial (e.g.: building permit) in nature and that discretionary approvals (e.g.: use permits) are not allowed. The Trinity County Zoning Ordinance is generally in compliance with the law; however, wording added in 2014, intending to allow even more parcels to develop second dwelling units required that a use permit be first obtained. Since the need for a use permit was to demonstrate that the land could accommodate the additional dwelling without adversely affecting the principal, non-residential use, it no longer meets the requirements of the newly revised law.

When staff began the revision to remove use permit requirements and clarify which zoning districts are principally created for single-family dwellings or multifamily dwellings, it became clear that other changes were warranted to update terms or development standards contained in Section 65852.2.

GENERAL PLAN AMENDMENT:

AB 2299 and SB 1069 made two changes that require an amendment to the Housing Element text and one of the programs established to implement the goals of the Housing Element.

First, it changes the term “second dwelling” to “accessory dwelling unit” (ADU) in Government Code Section 65852.2 which affects the wording in the County’s Housing Element.

Second, it no longer allows any type of discretionary permit (such as use permits) for developing an accessory dwelling unit. Our existing language was modified after adoption of the 2009-2014
Housing Element to provide even greater opportunities to provide for accessory dwelling units in the County; however, these would be located in areas primarily devoted to resource uses which would have required a use permit to ensure that the resource was not adversely affected by the additional housing development.

The proposed General Plan Amendment would delete the reference to use permits and no longer allow accessory dwelling units in these non-residential zones. Other forms of housing, such as farm labor housing or temporary housing for tree planting, could be allowed, but could require a use permit to assess potential impacts.

Existing Text:

The existing text wording that would be changed is located on pages 54 and 55 of the Housing Element and reads as follows:

“Second Units

“Second units are detached or attached dwelling units that provide complete, independent living facilities for one or more persons, located on the same lot as the existing dwelling. They include permanent provisions for living, sleeping, eating, cooking, sanitation, and other such utilities.

“Assembly Bill (AB) 1866, also known as the “second unit law,” amended the California Government Code to facilitate the development of second units. This amendment required localities to allow second units ministerially without discretionary review or hearings. To be considered a ministerial review, the process used to approve second units must “apply predictable, objective, fixed, quantifiable, and clear standards.” Application for second units should not be subject to onerous conditions of approval or public hearing process or public comment.

“To ensure consistency with state law and allow greater opportunities for development of second units, the County allows second units without discretionary review in all residential districts and in the Unclassified, Agricultural, Ag-Forest, and Agricultural Preserve districts with a use permit. Second dwelling permits can be obtained in the same manner as any other building permit for dwellings as long as the placement meets criteria for second dwellings, mainly that the zoning density is not exceeded. There is no restriction on the size of the second dwelling.”

Proposed New Text Wording:

Accessory Dwelling Units

An accessory dwelling unit (ADU) is an attached or detached residential dwelling unit which provides complete independent living facilities for one or more persons. It includes permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the existing single-family dwelling.

Assembly Bill 1866, also known as the “second unit law” and AB 2299 and SB 1069, also known as the “accessory dwelling unit (ADU) law” amended California Government Cod...
Code, Section 65852.2 to facilitate the development of accessory dwelling units. These amendments require local government to allow accessory dwelling units ministerially without discretionary review or hearings. To be considered a ministerial review, the process used to approve accessory dwelling units must “apply predictable, objective, fixed, quantifiable, and clear standards.” An application for an accessory dwelling unit cannot be subject to public comment, a public hearing process or conditions of approval. However, generally applicable development standards established such as: protection of resources (e.g. water quality); safety (e.g. not constructing in the 100 year flood plain or a floodway); and protection of historic resources (e.g. location within an established Historic District), will have additional requirements that must be met prior to issuing a building permit and will be applied in the same manner as any other development.

To ensure consistency with state law the County allows an accessory dwelling unit without any discretionary review in all zoning districts established primarily for residential use. Accessory dwelling unit building permits can be obtained in the same manner as any other building permit for a dwelling as long as the placement meets the listed criteria for an accessory dwelling unit.

There is one legislative change that staff did not include in the revised ordinance. It pertains to requiring additional parking for an ADU and states: (A local jurisdiction shall not impose parking standards for an accessory dwelling unit in any of the following instances) then includes the following: “When on-street parking permits are required but not offered to the occupant of the accessory dwelling unit.” The other four situations are listed under the “Parking” heading in the proposed ordinance. However, since Trinity County has no on-street parking permits, it seemed inappropriate to include this wording at this time. As the Housing Element is updated in the future and conditions change, this provision can be revisited.

In addition, the wording of Program 2.5 (p. 86) would be amended to change the term “second units” to “accessory dwelling units.”

**ZONING ORDINANCE AMENDMENT:**

The following is information providing background history concerning the second dwelling provisions in the zoning ordinance.

**2003 wording for Second Dwellings (Ord 315-726):**

Section 30.D.3.c.2 read:

“Second dwelling units may only be located on parcels zoned Single Family, Rural Residential, Duplex and Multiple Family. Second dwelling units are prohibited from being located in other zoning districts unless expressly authorized in other Sections of the Ordinance.”

**2014 wording for Second Dwellings (315-806):**

Following adoption of the 2009-2014 Housing Element, this subsection was revised (Ord. 315-806) to read:

Understanding Accessory Dwelling Units and Their Importance

California’s housing production is not keeping pace with demand. In the last decade less than half of the needed housing was built. This lack of housing is impacting affordability with average housing costs in California exceeding the rest of the nation. As affordability becomes more problematic, people drive longer distances between a home that is affordable and where they work, or double up to share space, both of which reduces quality of life and produces negative environmental impacts.

Beyond traditional market-rate construction and government subsidized production and preservation there are alternative housing models and emerging trends that can contribute to addressing home supply and affordability in California.

One such example gaining popularity are Accessory Dwelling Units (ADUs) (also referred to as second units, in-law units, or granny flats).

What is an ADU

An ADU is a secondary dwelling unit with complete independent living facilities for one or more persons and generally takes three forms:

- **Detached**: The unit is separated from the primary structure
- **Attached**: The unit is attached to the primary structure
- **Repurposed Existing Space**: Space (e.g., master bedroom) within the primary residence is converted into an independent living unit
- **Junior Accessory Dwelling Units**: Similar to repurposed space with various streamlining measures

ADUs offer benefits that address common development barriers such as affordability and environmental quality. ADUs are an affordable type of home to construct in California because they do not require paying for land, major new infrastructure, structured parking, or elevators. ADUs are built with cost-effective one- or two-story wood frame construction, which is significantly less costly than homes in new multifamily infill buildings. ADUs can provide as much living space as the new apartments and condominiums being built in new infill buildings and serve very well for couples, small families, friends, young people, and seniors.

ADUs are a different form of housing that can help California meet its diverse housing needs. Young professionals and students desire to live in areas close to jobs, amenities, and schools. The problem with high-opportunity areas is that space is limited. There is a shortage of affordable units and the units that are available can be out of reach for many people. To address the needs of individuals or small families seeking living quarters in high opportunity areas, homeowners can construct an ADU on their lot or convert an underutilized part of their home like a garage.
into a junior ADU. This flexibility benefits not just people renting the space, but the homeowner as well, who can receive an extra monthly rent income.

ADUs give homeowners the flexibility to share independent living areas with family members and others, allowing seniors to age in place as they require more care and helping extended families to be near one another while maintaining privacy.

Relaxed regulations and the cost to build an ADU make it a very feasible affordable housing option. A UC Berkeley study noted that one unit of affordable housing in the Bay Area costs about $500,000 to develop whereas an ADU can range anywhere up to $200,000 on the expensive end in high housing cost areas.

ADUs are a critical form of infill-development that can be affordable and offer important housing choices within existing neighborhoods. ADUs are a powerful type of housing unit because they allow for different uses, and serve different populations ranging from students and young professionals to young families, people with disabilities and senior citizens. By design, ADUs are more affordable and can provide additional income to homeowners. Local governments can encourage the development of ADUs and improve access to jobs, education and services for many Californians.
Summary of Recent Changes to ADU Laws

The California legislature found and declared that, among other things, allowing accessory dwelling units (ADUs) in single family and multifamily zones provides additional rental housing and are an essential component in addressing housing needs in California. Over the years, ADU law has been revised to improve its effectiveness such as recent changes in 2003 to require ministerial approval. In 2017, changes to ADU laws will further reduce barriers, better streamline approval and expand capacity to accommodate the development of ADUs.

ADUs are a unique opportunity to address a variety of housing needs and provide affordable housing options for family members, friends, students, the elderly, in-home health care providers, the disabled, and others. Further, ADUs offer an opportunity to maximize and integrate housing choices within existing neighborhoods.

Within this context, the Department has prepared this guidance to assist local governments in encouraging the development of ADUs. Please see Attachment 1 for the complete statutory changes. The following is a brief summary of the changes for each bill.

SB 1069 (Wieckowski)

S.B. 1069 (Chapter 720, Statutes of 2016) made several changes to address barriers to the development of ADUs and expanded capacity for their development. The following is a brief summary of provisions that go into effect January 1, 2017.

Parking

SB 1069 reduces parking requirements to one space per bedroom or unit. The legislation authorizes off street parking to be tandem or in setback areas unless specific findings such as fire and life safety conditions are made. SB 1069 also prohibits parking requirements if the ADU meets any of the following:

- Is within a half mile from public transit.
- Is within an architecturally and historically significant historic district.
- Is part of an existing primary residence or an existing accessory structure.
- Is in an area where on-street parking permits are required, but not offered to the occupant of the ADU.
- Is located within one block of a car share area.
Fees
SB 1069 provides that ADUs shall not be considered new residential uses for the purpose of calculating utility connection fees or capacity charges, including water and sewer service. The bill prohibits a local agency from requiring an ADU applicant to install a new or separate utility connection or impose a related connection fee or capacity charge for ADUs that are contained within an existing residence or accessory structure. For attached and detached ADUs, this fee or charge must be proportionate to the burden of the unit on the water or sewer system and may not exceed the reasonable cost of providing the service.

Fire Requirements
SB 1069 provides that fire sprinklers shall not be required in an accessory unit if they are not required in the primary residence.

ADUs within Existing Space
Local governments must ministerially approve an application to create within a single family residential zone one ADU per single family lot if the unit is:

- contained within an existing residence or accessory structure.
- has independent exterior access from the existing residence.
- has side and rear setbacks that are sufficient for fire safety.

These provisions apply within all single family residential zones and ADUs within existing space must be allowed in all of these zones. No additional parking or other development standards can be applied except for building code requirements.

No Total Prohibition
SB 1069 prohibits a local government from adopting an ordinance that precludes ADUs.

AB 2299 (Bloom)
Generally, AB 2299 (Chapter 735, Statutes of 2016) requires a local government (beginning January 1, 2017) to ministerially approve ADUs if the unit complies with certain parking requirements, the maximum allowable size of an attached ADU, and setback requirements, as follows:

- The unit is not intended for sale separate from the primary residence and may be rented.
- The lot is zoned for single-family or multifamily use and contains an existing, single-family dwelling.
- The unit is either attached to an existing dwelling or located within the living area of the existing dwelling or detached and on the same lot.
- The increased floor area of the unit does not exceed 50% of the existing living area, with a maximum increase in floor area of 1,200 square feet.
- The total area of floorspace for a detached accessory dwelling unit does not exceed 1,200 square feet.
- No passageway can be required.
- No setback can be required from an existing garage that is converted to an ADU.
• Compliance with local building code requirements.
• Approval by the local health officer where private sewage disposal system is being used.

Impact on Existing Accessory Dwelling Unit Ordinances

AB 2299 provides that any existing ADU ordinance that does not meet the bill’s requirements is null and void upon the date the bill becomes effective. In such cases, a jurisdiction must approve accessory dwelling units based on Government Code Section 65852.2 until the jurisdiction adopts a compliant ordinance.

AB 2406 (Thurmond)

AB 2406 (Chapter 755, Statutes of 2016) creates more flexibility for housing options by authorizing local governments to permit junior accessory dwelling units (JADU) through an ordinance. The bill defines JADUs to be a unit that cannot exceed 500 square feet and must be completely contained within the space of an existing residential structure. In addition, the bill requires specified components for a local JADU ordinance. Adoption of a JADU ordinance is optional.

Required Components

The ordinance authorized by AB 2406 must include the following requirements:

- Limit to one JADU per residential lot zoned for single-family residences with a single-family residence already built on the lot.
- The single-family residence in which the JADU is created or JADU must be occupied by the owner of the residence.
- The owner must record a deed restriction stating that the JADU cannot be sold separately from the single-family residence and restricting the JADU to the size limitations and other requirements of the JADU ordinance.
- The JADU must be located entirely within the existing structure of the single-family residence and JADU have its own separate entrance.
- The JADU must include an efficiency kitchen which includes a sink, cooking appliance, counter surface, and storage cabinets that meet minimum building code standards. No gas or 220V circuits are allowed.
- The JADU may share a bath with the primary residence or have its own bath.

Prohibited Components

This bill prohibits a local JADU ordinance from requiring:

- Additional parking as a condition to grant a permit.
- Applying additional water, sewer and power connection fees. No connections are needed as these utilities have already been accounted for in the original permit for the home.
Fire Safety Requirements

AB 2406 clarifies that a JADU is to be considered part of the single-family residence for the purposes of fire and life protections ordinances and regulations, such as sprinklers and smoke detectors. The bill also requires life and protection ordinances that affect single-family residences to be applied uniformly to all single-family residences, regardless of the presence of a JADU.

JADUs and the RHNA

As part of the housing element portion of their general plan, local governments are required to identify sites with appropriate zoning that will accommodate projected housing needs in their regional housing need allocation (RHNA) and report on their progress pursuant to Government Code Section 65400. To credit a JADU toward the RHNA, HCD and the Department of Finance (DOF) utilize the census definition of a housing unit which is fairly flexible. Local government count units as part of reporting to DOF. JADUs meet these definitions and this bill would allow cities and counties to earn credit toward meeting their RHNA allocations by permitting residents to create less costly accessory units. See additional discussion under JADU frequently asked questions.
Frequently Asked Questions: Accessory Dwelling Units

Should an Ordinance Encourage the Development of ADUs?

Yes, ADU law and recent changes intend to address barriers, streamline approval and expand potential capacity for ADUs recognizing their unique importance in addressing California’s housing needs. The preparation, adoption, amendment and implementation of local ADU ordinances must be carried out consistent with Government Code Section 65852.150:

(a) The Legislature finds and declares all of the following:
(1) Accessory dwelling units are a valuable form of housing in California.
(2) Accessory dwelling units provide housing for family members, students, the elderly, in-home health care providers, the disabled, and others, at below market prices within existing neighborhoods.
(3) Homeowners who create accessory dwelling units benefit from added income, and an increased sense of security.
(4) Allowing accessory dwelling units in single-family or multifamily residential zones provides additional rental housing stock in California.
(5) California faces a severe housing crisis.
(6) The state is falling far short of meeting current and future housing demand with serious consequences for the state’s economy, our ability to build green infill consistent with state greenhouse gas reduction goals, and the well-being of our citizens, particularly lower and middle-income earners.
(7) Accessory dwelling units offer lower cost housing to meet the needs of existing and future residents within existing neighborhoods, while respecting architectural character.
(8) Accessory dwelling units are, therefore, an essential component of California’s housing supply.

(b) It is the intent of the Legislature that an accessory dwelling unit ordinance adopted by a local agency has the effect of providing for the creation of accessory dwelling units and that provisions in this ordinance relating to matters including unit size, parking, fees, and other requirements, are not so arbitrary, excessive, or burdensome so as to unreasonably restrict the ability of homeowners to create accessory dwelling units in zones in which they are authorized by local ordinance.
Are Existing Ordinances Null and Void?

Yes, any local ordinance adopted prior to January 1, 2017 that is not in compliance with the changes to ADU law will be null and void. Until an ordinance is adopted, local governments must apply “state standards” (See Attachment 4 for State Standards checklist). In the absence of a local ordinance complying with ADU law, local review must be limited to “state standards” and cannot include additional requirements such as those in an existing ordinance.

Are Local Governments Required to Adopt an Ordinance?

No, a local government is not required to adopt an ordinance. ADUs built within a jurisdiction that lacks a local ordinance must comply with state standards (See Attachment 4). Adopting an ordinance can occur through different forms such as a new ordinance, amendment to an existing ordinance, separate section or special regulations within the zoning code or integrated into the zoning code by district. However, the ordinance should be established legislatively through a public process and meeting and not through internal administrative actions such as memos or zoning interpretations.

Can a Local Government Preclude ADUs?

No local government cannot preclude ADUs.

Can a Local Government Apply Development Standards and Designate Areas?

Yes, local governments may apply development standards and may designate where ADUs are permitted (GC Sections 65852.2(a)(1)(A) and (B)). However, ADUs within existing structures must be allowed in all single family residential zones.

For ADUs that require an addition or a new accessory structure, development standards such as parking, height, lot coverage, lot size and maximum unit size can be established with certain limitations. ADUs can be avoided or allowed through an ancillary and separate discretionary process in areas with health and safety risks such as high fire hazard areas. However, standards and allowable areas must not be designed or applied in a manner that burdens the development of ADUs and should maximize the potential for ADU development. Designating areas where ADUs are allowed should be approached primarily on health and safety issues including water, sewer, traffic flow and public safety. Utilizing approaches such as restrictive overlays, limiting ADUs to larger lot sizes, burdensome lot coverage and setbacks and particularly concentration or distance requirements (e.g., no less than 500 feet between ADUs) may unreasonably restrict the ability of the homeowners to create ADUs, contrary to the intent of the Legislature.
Can a Local Government Adopt Less Restrictive Requirements?

Yes, ADU law is a minimum requirement and its purpose is to encourage the development of ADUs. Local governments can take a variety of actions beyond the statute that promote ADUs such as reductions in fees, less restrictive parking or unit sizes or amending general plan policies.

Santa Cruz has confronted a shortage of housing for many years, considering its growth in population from incoming students at UC Santa Cruz and its proximity to Silicon Valley. The city promoted the development of ADUs as critical infill-housing opportunity through various strategies such as creating a manual to promote ADUs. The manual showcases prototypes of ADUs and outlines city zoning laws and requirements to make it more convenient for homeowners to get information. The City found that homeowners will take time to develop an ADU only if information is easy to find, the process is simple, and there is sufficient guidance on what options they have in regards to design and planning.

The city set the minimum lot size requirement at 4,500 sq. ft. to develop an ADU in order to encourage more homes to build an ADU. This allowed for a majority of single-family homes in Santa Cruz to develop an ADU. For more information, see [http://www.cityofsantacruz.com/departments/planning-and-community-development/programs/accessory-dwelling-unit-development-program](http://www.cityofsantacruz.com/departments/planning-and-community-development/programs/accessory-dwelling-unit-development-program).

Can Local Governments Establish Minimum and Maximum Unit Sizes?

Yes, a local government may establish minimum and maximum unit sizes (GC Section 65852.2(c)). However, like all development standards (e.g., height, lot coverage, lot size), unit sizes should not burden the development of ADUs. For example, setting a minimum unit size that substantially increases costs or a maximum unit size that unreasonably restricts opportunities would be inconsistent with the intent of the statute. Typical maximum unit sizes range from 800 square feet to 1,200 square feet. Minimum unit size must at least allow for an efficiency unit as defined in Health and Safety Code Section 17958.1.

ADU law requires local government approval if meeting various requirements (GC Section 65852.2(a)(1)(D)), including unit size requirements. Specifically, attached ADUs shall not exceed 50 percent of the existing living area or 1,200 square feet and detached ADUs shall not exceed 1,200 square feet. A local government may choose a maximum unit size less than 1,200 square feet as long as the requirement is not burdensome on the creation of ADUs.

Can ADUs Exceed General Plan and Zoning Densities?

Requiring large minimum lot sizes and not allowing smaller lot sizes for ADUs can severely restrict their potential development. For example, large minimum lot sizes for ADUs may constrict capacity throughout most of the community. Minimum lot sizes cannot be applied to ADUs within existing structures and could be considered relative to health and safety concerns such as areas on septic systems. While larger lot sizes might be targeted for various reasons such as ease of compatibility, many tools are available (e.g., maximum unit size, maximum lot coverage, minimum setbacks, architectural and landscape requirements) that allows ADUs to fit well within the built environment.
An ADU is an accessory use for the purposes of calculating allowable density under the general plan and zoning. For example, if a zoning district allows one unit per 7,500 square feet, then an ADU would not be counted as an additional unit. Minimum lot sizes must not be doubled (e.g., 15,000 square feet) to account for an ADU. Further, local governments could elect to allow more than one ADU on a lot.

New developments can increase the total number of affordable units in their project plans by integrating ADUs. Aside from increasing the total number of affordable units, integrating ADUs also promotes housing choices within a development. One such example is the Cannery project in Davis, CA. The Cannery project includes 547 residential units with up to 60 integrated ADUs. ADUs within the Cannery blend in with surrounding architecture, maintaining compatibility with neighborhoods and enhancing community character. ADUs are constructed at the same time as the primary single-family unit to ensure the affordable rental unit is available in the housing supply concurrent with the availability of market rate housing.
How Are Fees Charged to ADUs?

All impact fees, including water, sewer, park and traffic fees must be charged in accordance with the Fee Mitigation Act, which requires fees to be proportional to the actual impact (e.g., significantly less than a single family home).

Fees on ADUs, must proportionately account for impact on services based on the size of the ADU or number of plumbing fixtures. For example, a 700 square foot new ADU with one bathroom that results in less landscaping should be charged much less than a 2,000 square foot home with three bathrooms and an entirely new landscaped parcel which must be irrigated. Fees for ADUs should be significantly less and should account for a lesser impact such as lower sewer or traffic impacts.

What Utility Fee Requirements Apply to ADUs?

Cities and counties cannot consider ADUs as new residential uses when calculating connection fees and capacity charges.

Where ADUs are being created within an existing structure (primary or accessory), the city or county cannot require a new or separate utility connections for the ADU and cannot charge any connection fee or capacity charge.

For other ADUs, a local agency may require separate utility connections between the primary dwelling and the ADU, but any connection fee or capacity charge must be proportionate to the impact of the ADU based on either its size or the number of plumbing fixtures.

What Utility Fee Requirements Apply to Non-City and County Service Districts?

All local agencies must charge impact fees in accordance with the Mitigation Fee Act (commencing with Government Code Section 66000), including in particular Section 66013, which requires the connection fees and capacity charges to be proportionate to the burden posed by the ADU. Special districts and non-city and county service districts must account for the lesser impact related to an ADU and should base fees on unit size or number of plumbing fixtures. Providers should consider a proportionate or sliding scale fee structures that address the smaller size and lesser impact of ADUs (e.g., fees per square foot or fees per fixture). Fee waivers or deferrals could be considered to better promote the development of ADUs.

Do Utility Fee Requirements Apply to ADUs within Existing Space?

No, where ADUs are being created within an existing structure (primary or accessory), new or separate utility connections and fees (connection and capacity) must not be required.

Does “Public Transit” Include within One-half Mile of a Bus Stop and Train Station?

Yes, “public transit” may include a bus stop, train station and paratransit if appropriate for the applicant. “Public transit” includes areas where transit is available and can be considered regardless of tighter headways (e.g., 15 minute intervals). Local governments could consider a broader definition of “public transit” such as distance to a bus route.
Can Parking Be Required Where a Car Share Is Available?

No, ADU law does not allow parking to be required when there is a car share located within a block of the ADU. A car share location includes a designated pick up and drop off location. Local governments can measure a block from a pick up and drop off location and can decide to adopt broader distance requirements such as two to three blocks.

Is Off Street Parking Permitted in Setback Areas or through Tandem Parking?

Yes, ADU law deliberately reduces parking requirements. Local governments may make specific findings that tandem parking and parking in setbacks are infeasible based on specific site, regional topographical or fire and life safety conditions or that tandem parking or parking in setbacks is not permitted anywhere else in the jurisdiction. However, these determinations should be applied in a manner that does not unnecessarily restrict the creation of ADUs.

Local governments must provide reasonable accommodation to persons with disabilities to promote equal access housing and comply with fair housing laws and housing element law. The reasonable accommodation procedure must provide exception to zoning and land use regulations which includes an ADU ordinance. Potential exceptions are not limited and may include development standards such as setbacks and parking requirements and permitted uses that further the housing opportunities of individuals with disabilities.

Is Covered Parking Required?

No, off street parking must be permitted through tandem parking on an existing driveway, unless specific findings are made.

Is Replacement Parking Required When the Parking Area for the Primary Structure Is Used for an ADU?

Yes, but only if the local government requires off-street parking to be replaced in which case flexible arrangements such as tandem, including existing driveways and uncovered parking are allowed. Local governments have an opportunity to be flexible and promote ADUs that are being created on existing parking space and can consider not requiring replacement parking.

Are Setbacks Required When an Existing Garage Is Converted to an ADU?

No, setbacks must not be required when a garage is converted or when existing space (e.g., game room or office) above a garage is converted. Rear and side yard setbacks of no more than five feet are required when new space is added above a garage for an ADU. In this case, the setbacks only apply to the added space above the garage, not the existing garage and the ADU can be constructed wholly or partly above the garage, including extending beyond the garage walls.

Also, when a garage, carport or covered parking structure is demolished or where the parking area ceases to exist so an ADU can be created, the replacement parking must be allowed in any “configuration” on the lot, “...including,
but not limited to, covered spaces, uncovered spaces, or tandem spaces, or...” Configuration can be applied in a flexible manner to not burden the creation of ADUs. For example, spatial configurations like tandem on existing driveways in setback areas or not requiring excessive distances from the street would be appropriate.

Are ADUs Permitted in Existing Residence or Accessory Space?

Yes, ADUs located in single family residential zones and existing space of a single family residence or accessory structure must be approved regardless of zoning standards (Section 65852.2(a)(1)(B)) for ADUs, including locational requirements (Section 65852.2(a)(1)(A)), subject to usual non-appealable ministerial building permit requirements. For example, ADUs in existing space does not necessitate a zoning clearance and must not be limited to certain zones or areas or subject to height, lot size, lot coverage, unit size, architectural review, landscape or parking requirements. Simply, where a single family residence or accessory structure exists in any single family residential zone, so can an ADU. The purpose is to streamline and expand potential for ADUs where impact is minimal and the existing footprint is not being increased.

Zoning requirements are not a basis for denying a ministerial building permit for an ADU, including non-conforming lots or structures. The phrase, “within the existing space” includes areas within a primary home or within an attached or detached accessory structure such as a garage, a carriage house, a pool house, a rear yard studio and similar enclosed structures.

Are Owner Occupants Required?

No, however, a local government can require an applicant to be an owner occupant. The owner may reside in the primary or accessory structure. Local governments can also require the ADU to not be used for short term rentals (terms lesser than 30 days). Both owner occupant use and prohibition on short term rentals can be required on the same property. Local agencies which impose this requirement should require recordation of a deed restriction regarding owner occupancy to comply with GC Section 27281.5

Are Fire Sprinklers Required for ADUs?

Depends, ADUs shall not be required to provide fire sprinklers if they are not or were not required of the primary residence. However, sprinklers can be required for an ADU if required in the primary structure. For example, if the primary residence has sprinklers as a result of an existing ordinance, then sprinklers could be required in the ADU. Alternative methods for fire protection could be provided.

If the ADU is detached from the main structure or new space above a detached garage, applicants can be encouraged to contact the local fire jurisdiction for information regarding fire sprinklers. Since ADUs are a unique opportunity to address a variety of housing needs and provide affordable housing options for family members, students, the elderly, in-home health care providers, the disabled, and others, the fire departments want to ensure the safety of these populations as well as the safety of those living in the primary structure. Fire Departments can help educate property owners on the benefits of sprinklers, potential resources and how they can be installed cost effectively. For example, insurance rates are typically 5 to 10 percent lower where the unit is sprinklered. Finally, other methods exist to provide additional fire protection. Some options may include additional exits, emergency escape and rescue openings, 1 hour or greater fire-rated assemblies, roofing materials and setbacks from property lines or other structures.
Is Manufactured Housing Permitted as an ADU?

Yes, an ADU is any residential dwelling unit with independent facilities and permanent provisions for living, sleeping, eating, cooking and sanitation. An ADU includes an efficiency unit (Health and Safety Code Section 17958.1) and a manufactured home (Health and Safety Code Section 18007).

Health and Safety Code Section 18007(a) “Manufactured home,” for the purposes of this part, means a structure that was constructed on or after June 15, 1976, is transportable in one or more sections, is eight body feet or more in width, or 40 body feet or more in length, in the traveling mode, or, when erected on site, is 320 or more square feet, is built on a permanent chassis and designed to be used as a single-family dwelling with or without a foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning, and electrical systems contained therein. “Manufactured home” includes any structure that meets all the requirements of this paragraph except the size requirements and with respect to which the manufacturer voluntarily files a certification and complies with the standards established under the National Manufactured Housing Construction and Safety Act of 1974 (42 U.S.C., Sec. 5401, and following).

Can an Efficiency Unit Be Smaller than 220 Square Feet?

Yes, an efficiency unit for occupancy by no more than two persons, by statute (Health and Safety Code Section 17958.1), can have a minimum floor area of 150 square feet and can also have partial kitchen or bathroom facilities, as specified by ordinance or can have the same meaning specified in the Uniform Building Code, referenced in the Title 24 of the California Code of Regulations.

The 2015 International Residential Code adopted by reference into the 2016 California Residential Code (CRC) allows residential dwelling units to be built considerably smaller than an Efficiency Dwelling Unit (EDU). Prior to this code change an EDU was required to have a minimum floor area not less than 220 sq. ft unless modified by local ordinance in accordance with the California Health and Safety Code which could allow an EDU to be built no less than 150 sq. ft. For more information, see HCD’s Information Bulletin at http://www.hcd.ca.gov/codes/manufactured-housing/docs/ib2016-06.pdf.

Does ADU Law Apply to Charter Cities and Counties?

Yes. ADU law explicitly applies to “local agencies” which are defined as a city, county, or city and county whether general law or chartered (Section 65852.2(i)(2)).
Do ADUs Count toward the Regional Housing Need Allocation?

Yes, local governments may report ADUs as progress toward Regional Housing Need Allocation pursuant to Government Code Section 65400 based on the actual or anticipated affordability. See below frequently asked questions for JADUs for additional discussion.

Must ADU Ordinances Be Submitted to the Department of Housing and Community Development?

Yes, ADU ordinances must be submitted to the State Department of Housing and Community Development within 60 days after adoption, including amendments to existing ordinances. However, upon submittal, the ordinance is not subject to a Department review and findings process similar to housing element law (GC Section 65585)
**Is There a Difference between ADU and JADU?**

Yes, AB 2406 added Government Code Section 65852.22, providing a unique option for Junior ADUs. The bill allows local governments to adopt ordinances for JADUs, which are no more than 500 square feet and are typically bedrooms in a single-family home that have an entrance into the unit from the main home and an entrance to the outside from the JADU. The JADU must have cooking facilities, including a sink, but is not required to have a private bathroom. Current law does not prohibit local governments from adopting an ordinance for a JADU, and this bill explicitly allows, not requires, a local agency to do so. If the ordinance requires a permit, the local agency shall not require additional parking or charge a fee for a water or sewer connection as a condition of granting a permit for a JADU. For more information, see below.

Why Adopt a JADU Ordinance?

JADUs offer the simplest and most affordable housing option. They bridge the gap between a roommate and a tenant by offering an interior connection between the unit and main living area. The doors between the two spaces can be secured from both sides, allowing them to be easily privatized or incorporated back into the main living area. These units share central systems, require no fire separation, and have a basic kitchen, utilizing small plug in appliances, reducing development costs. This provides flexibility and an insurance policy in homes in case additional income or housing is needed. They present no additional stress on utility services or infrastructure because they simply repurpose spare bedrooms that do not expand the homes planned occupancy. No additional address is required on the property because an interior connection remains. By adopting a JADU ordinance, local governments can offer homeowners additional options to take advantage of underutilized space and better address its housing needs.

Can JADUs Count towards the RHNA?

Yes, as part of the housing element portion of their general plan, local governments are required to identify sites with appropriate zoning that will accommodate projected housing needs in their regional housing need allocation (RHNA) and report on their progress pursuant to Government Code Section 65400. To credit a unit toward the RHNA, HCD and the Department of Finance (DOF) utilize the census definition of a housing unit. Generally, a JADU, including with shared sanitation facilities, that meets the census definition and is reported to the Department of Finance as part of the DOF annual City and County Housing Unit Change Survey can be credited toward the RHNA based on the appropriate income level. Local governments can track actual or anticipated affordability to assure the JADU is counted to the appropriate income category. For example, some local governments request and track information such as anticipated affordability as part of the building permit application.

Can the JADU Be Sold Independent of the Primary Dwelling?

No, the JADU cannot be sold separate from the primary dwelling.

Are JADUs Subject to Connection and Capacity Fees?

No, JADUs shall not be considered a separate or new dwelling unit for the purposes of fees and as a result should not be charged a fee for providing water, sewer or power, including a connection fee. These requirements apply to all providers of water, sewer and power, including non-municipal providers.

Local governments may adopt requirements for fees related to parking, other service or connection for water, sewer or power, however, these requirements must be uniform for all single family residences and JADUs are not considered a new or separate unit.
Are There Requirements for Fire Separation and Fire Sprinklers?

Yes, a local government may adopt requirements related to fire and life protection requirements. However, a JADU shall not be considered a new or separate unit. In other words, if the primary unit is not subject to fire or life protection requirements, then the JADU must be treated the same.

Attachment 1: Statutory Changes (Strikeout/Underline)

**Government Code Section 65852.2**

(a) (1) Any local agency may, by ordinance, provide for the creation of **second accessory dwelling** units in single-family and multifamily residential zones. The ordinance may **shall** do any of the following:

(A) Designate areas within the jurisdiction of the local agency where **second accessory dwelling** units may be permitted. The designation of areas may be based on criteria, that may include, but are not limited to, the adequacy of water and sewer services and the impact of **second accessory dwelling** units on traffic flow, **flow and public safety**.

(B) (i) Impose standards on **second accessory dwelling** units that include, but are not limited to, parking, height, setback, lot coverage, **landscape**, architectural review, maximum size of a unit, and standards that prevent adverse impacts on any real property that is listed in the California Register of Historic Places.

(ii) Notwithstanding clause (i), a local agency may reduce or eliminate parking requirements for any accessory dwelling unit located within its jurisdiction.

(C) Provide that **second accessory dwelling** units do not exceed the allowable density for the lot upon which the **second accessory dwelling** unit is located, and that **second accessory dwelling** units are a residential use that is consistent with the existing general plan and zoning designation for the lot.

(D) Require the accessory dwelling units to comply with all of the following:

(i) The unit is not intended for sale separate from the primary residence and may be rented.

(ii) The lot is zoned for single-family or multifamily use and contains an existing, single-family dwelling.

(iii) The accessory dwelling unit is either attached to the existing dwelling or located within the living area of the existing dwelling or detached from the existing dwelling and located on the same lot as the existing dwelling.

(iv) The increased floor area of an attached accessory dwelling unit shall not exceed 50 percent of the existing living area, with a maximum increase in floor area of 1,200 square feet.

(v) The total area of floorspace for a detached accessory dwelling unit shall not exceed 1,200 square feet.

(vi) No passageway shall be required in conjunction with the construction of an accessory dwelling unit.

(vii) No setback shall be required for an existing garage that is converted to an accessory dwelling unit, and a setback of no more than five feet from the side and rear lot lines shall be required for an accessory dwelling unit that is constructed above a garage.

(viii) Local building code requirements that apply to detached dwellings, as appropriate.

(ix) Approval by the local health officer where a private sewage disposal system is being used, if required.

(x) (I) Parking requirements for accessory dwelling units shall not exceed one parking space per unit or per bedroom. These spaces may be provided as tandem parking on an existing driveway.

(II) Offstreet parking shall be permitted in setback areas in locations determined by the local agency or through tandem parking, unless specific findings are made that parking in setback areas or tandem parking is not feasible based upon specific site or regional topographical or fire and life safety conditions, or that it is not permitted anywhere else in the jurisdiction.

(III) This clause shall not apply to a unit that is described in subdivision (d).
(xi) When a garage, carport, or covered parking structure is demolished in conjunction with the construction of an accessory dwelling unit, and the local agency requires that those offstreet parking spaces be replaced, the replacement spaces may be located in any configuration on the same lot as the accessory dwelling unit, including, but not limited to, as covered spaces, uncovered spaces, or tandem spaces, or by the use of mechanical automobile parking lifts. This clause shall not apply to a unit that is described in subdivision (d).

(2) The ordinance shall not be considered in the application of any local ordinance, policy, or program to limit residential growth.

(3) When a local agency receives its first application on or after July 1, 2003, for a permit pursuant to this subdivision, the application shall be considered ministerially without discretionary review or a hearing, notwithstanding Section 65901 or 65906 or any local ordinance regulating the issuance of variances or special use permits. Nothing in this paragraph may be construed to require a local government to adopt an ordinance for the creation of ADUs, permits, within 120 days after receiving the application. A local agency may charge a fee to reimburse it for costs that it incurs as a result of amendments to this paragraph enacted during the 2001–02 Regular Session of the Legislature, including the costs of adopting or amending any ordinance that provides for the creation of ADUs, an accessory dwelling unit.

(b) (4) (1) An existing ordinance governing the creation of an accessory dwelling unit by a local agency which has not adopted an ordinance governing ADUs in accordance with subdivision (a) or (c) receives its first application on or after July 1, 1983, for a permit pursuant to this subdivision, the local agency shall accept the application and approve or disapprove the application ministerially without discretionary review pursuant to this subdivision unless it or an accessory dwelling ordinance adopted by a local agency subsequent to the effective date of the act adding this paragraph shall provide an approval process that includes only ministerial provisions for the approval of accessory dwelling units and shall not include any discretionary processes, provisions, or requirements for those units, except as otherwise provided in this subdivision. In the event that a local agency has an existing accessory dwelling unit ordinance that fails to meet the requirements of this subdivision, that ordinance shall be null and void upon the effective date of the act adding this paragraph and that agency shall thereafter apply the standards established in this subdivision for the approval of accessory dwelling units, unless and until the agency adopts an ordinance in accordance with subdivision (a) or (c) within 120 days after receiving the application. Notwithstanding Section 65901 or 65906, every local agency shall grant a variance or special use permit for the creation of a ADU if the ADU complies with all of the following: that complies with this section.

(A) The unit is not intended for sale and may be rented.

(B) The lot is zoned for single-family or multifamily use.

(C) The lot contains an existing single-family dwelling.

(D) The ADU is either attached to the existing dwelling and located within the living area of the existing dwelling or detached from the existing dwelling and located on the same lot as the existing dwelling.

(E) The increased floor area of an attached ADU shall not exceed 30 percent of the existing living area.

(F) The total area of floorspace for a detached ADU shall not exceed 1,200 square feet.

(G) Requirements relating to height, setback, lot coverage, architectural review, site plan review, fees, charges, and other zoning requirements generally applicable to residential construction in the zone in which the property is located.

(H) Local building code requirements which apply to detached dwellings, as appropriate.

(I) Approval by the local health officer where a private sewage disposal system is being used, if required.
(2) No other local ordinance, policy, or regulation shall be the basis for the denial of a building permit or a use permit under this subdivision.

(3) This subdivision establishes the maximum standards that local agencies shall use to evaluate proposed ADUs on lots, a proposed accessory dwelling unit on a lot zoned for residential use which contains an existing single-family dwelling. No additional standards, other than those provided in this subdivision or subdivision (a), shall be utilized or imposed, except that a local agency may require an applicant for a permit issued pursuant to this subdivision to be an owner-occupant, owner-occupant or that the property be used for rentals of terms longer than 30 days.

(4) No changes in zoning ordinances or other ordinances or any changes in the general plan shall be required to implement this subdivision. Any local agency may amend its zoning ordinance or general plan to incorporate the policies, procedures, or other provisions applicable to the creation of ADUs if these provisions are consistent with the limitations of this subdivision.

(5) A ADU which conforms to the requirements of this subdivision shall be deemed to be an accessory use or an accessory building and shall not be considered to exceed the allowable density for the lot upon which it is located, and shall be deemed to be a residential use which is consistent with the existing general plan and zoning designations for the lot. ADUs shall not be considered in the application of any local ordinance, policy, or program to limit residential growth.

(6) No When a local agency shall adopt an ordinance which totally precludes ADUs within single-family or multifamily zoned areas unless the ordinance contains findings acknowledging that the ordinance may limit housing opportunities of the region and further contains findings that specific adverse impacts on the public health, safety, and welfare that would result from allowing ADUs within single-family and multifamily zoned areas justify adopting the ordinance. that has not adopted an ordinance governing accessory dwelling units in accordance with subdivision (a) receives its first application on or after July 1, 1983, for a permit to create an accessory dwelling unit pursuant to this subdivision, the local agency shall accept the application and approve or disapprove the application ministerially without discretionary review pursuant to subdivision (a) within 120 days after receiving the application.

(7) A local agency may establish minimum and maximum unit size requirements for both attached and detached second accessory dwelling units. No minimum or maximum size for a second an accessory dwelling unit, or size based upon a percentage of the existing dwelling, shall be established by ordinance for either attached or detached dwellings which does not permit at least an efficiency unit to be constructed in compliance with local development standards. Accessory dwelling units shall not be required to provide fire sprinklers if they are not required for the primary residence.

(d) Notwithstanding any other law, a local agency, whether or not it has adopted an ordinance governing accessory dwelling units in accordance with subdivision (a), shall not impose parking standards for an accessory dwelling unit in any of the following instances:

(1) The accessory dwelling unit is located within one-half mile of public transit.

(2) The accessory dwelling unit is located within an architecturally and historically significant historic district.

(3) The accessory dwelling unit is part of the existing primary residence or an existing accessory structure.

(4) When on-street parking permits are required but not offered to the occupant of the accessory dwelling unit.

(5) When there is a car share vehicle located within one block of the accessory dwelling unit.

(e) Parking requirements for ADUs shall not exceed one parking space per unit or per bedroom. Additional parking may be required provided that a finding is made that the additional parking requirements are directly related to the
use of the ADU and are consistent with existing neighborhood standards applicable to existing dwellings. Off-street parking shall be permitted in setback areas in locations determined by the local agency or through tandem parking, unless specific findings are made that parking in setback areas or tandem parking is not feasible based upon specific site or regional topographical or fire and life safety conditions, or that it is not permitted anywhere else in the jurisdiction. Notwithstanding subdivisions (a) to (d), inclusive, a local agency shall ministerially approve an application for a building permit to create within a single-family residential zone one accessory dwelling unit per single-family lot if the unit is contained within the existing space of a single-family residence or accessory structure, has independent exterior access from the existing residence, and the side and rear setbacks are sufficient for fire safety. Accessory dwelling units shall not be required to provide fire sprinklers if they are not required for the primary residence.

(f) (1) Fees charged for the construction of second accessory dwelling units shall be determined in accordance with Chapter 5 (commencing with Section 66000), Chapter 66000) and Chapter 7 (commencing with Section 66012).

(2) Accessory dwelling units shall not be considered new residential uses for the purposes of calculating local agency connection fees or capacity charges for utilities, including water and sewer service.

(A) For an accessory dwelling unit described in subdivision (e), a local agency shall not require the applicant to install a new or separate utility connection directly between the accessory dwelling unit and the utility or impose a related connection fee or capacity charge.

(B) For an accessory dwelling unit that is not described in subdivision (e), a local agency may require a new or separate utility connection directly between the accessory dwelling unit and the utility. Consistent with Section 66013, the connection may be subject to a connection fee or capacity charge that shall be proportionate to the burden of the proposed accessory dwelling unit, based upon either its size or the number of its plumbing fixtures, upon the water or sewer system. This fee or charge shall not exceed the reasonable cost of providing this service.

(g) This section does not limit the authority of local agencies to adopt less restrictive requirements for the creation of ADUs.

(h) Local agencies shall submit a copy of the ordinances adopted pursuant to subdivision (a) or (c) to the Department of Housing and Community Development within 60 days after adoption.

(i) As used in this section, the following terms mean:

(1) “Living area,” area” means the interior habitable area of a dwelling unit including basements and attics but does not include a garage or any accessory structure.

(2) “Local agency” means a city, county, or city and county, whether general law or chartered.

(3) For purposes of this section, “neighborhood” has the same meaning as set forth in Section 65589.5.

(4) “Second Accessory dwelling unit” means an attached or a detached residential dwelling unit which provides complete independent living facilities for one or more persons. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family dwelling is situated. An accessory dwelling unit also includes the following:

(A) An efficiency unit, as defined in Section 17958.1 of Health and Safety Code.

(B) A manufactured home, as defined in Section 18007 of the Health and Safety Code.

(5) “Passageway” means a pathway that is unobstructed clear to the sky and extends from a street to one entrance of the accessory dwelling unit.
(j) Nothing in this section shall be construed to supersede or in any way alter or lessen the effect or application of the California Coastal Act (Division 20 (commencing with Section 30000) of the Public Resources Code), except that the local government shall not be required to hold public hearings for coastal development permit applications for second accessory dwelling units.

**Government Code Section 65852.22.**

(a) Notwithstanding Section 65852.2, a local agency may, by ordinance, provide for the creation of junior accessory dwelling units in single-family residential zones. The ordinance may require a permit to be obtained for the creation of a junior accessory dwelling unit, and shall do all of the following:

1. Limit the number of junior accessory dwelling units to one per residential lot zoned for single-family residences with a single-family residence already built on the lot.

2. Require owner-occupancy in the single-family residence in which the junior accessory dwelling unit will be permitted. The owner may reside in either the remaining portion of the structure or the newly created junior accessory dwelling unit. Owner-occupancy shall not be required if the owner is another governmental agency, land trust, or housing organization.

3. Require the recordation of a deed restriction, which shall run with the land, shall be filed with the permitting agency, and shall include both of the following:

   A. A prohibition on the sale of the junior accessory dwelling unit separate from the sale of the single-family residence, including a statement that the deed restriction may be enforced against future purchasers.

   B. A restriction on the size and attributes of the junior accessory dwelling unit that conforms with this section.

4. Require a permitted junior accessory dwelling unit to be constructed within the existing walls of the structure, and require the inclusion of an existing bedroom.

5. Require a permitted junior accessory dwelling to include a separate entrance from the main entrance to the structure, with an interior entry to the main living area. A permitted junior accessory dwelling may include a second interior doorway for sound attenuation.

6. Require the permitted junior accessory dwelling unit to include an efficiency kitchen, which shall include all of the following:

   A. A sink with a maximum waste line diameter of 1.5 inches.

   B. A cooking facility with appliances that do not require electrical service greater than 120 volts, or natural or propane gas.

   C. A food preparation counter and storage cabinets that are of reasonable size in relation to the size of the junior accessory dwelling unit.

(b) (1) An ordinance shall not require additional parking as a condition to grant a permit.

(2) This subdivision shall not be interpreted to prohibit the requirement of an inspection, including the imposition of a fee for that inspection, to determine whether the junior accessory dwelling unit is in compliance with applicable building standards.

(c) An application for a permit pursuant to this section shall, notwithstanding Section 65901 or 65906 or any local ordinance regulating the issuance of variances or special use permits, be considered ministerially, without discretionary review or a hearing. A permit shall be issued within 120 days of submission of an application for a
permit pursuant to this section. A local agency may charge a fee to reimburse the local agency for costs incurred in connection with the issuance of a permit pursuant to this section.

(d) For the purposes of any fire or life protection ordinance or regulation, a junior accessory dwelling unit shall not be considered a separate or new dwelling unit. This section shall not be construed to prohibit a city, county, city and county, or other local public entity from adopting an ordinance or regulation relating to fire and life protection requirements within a single-family residence that contains a junior accessory dwelling unit so long as the ordinance or regulation applies uniformly to all single-family residences within the zone regardless of whether the single-family residence includes a junior accessory dwelling unit or not.

(e) For the purposes of providing service for water, sewer, or power, including a connection fee, a junior accessory dwelling unit shall not be considered a separate or new dwelling unit.

(f) This section shall not be construed to prohibit a local agency from adopting an ordinance or regulation, related to parking or a service or a connection fee for water, sewer, or power, that applies to a single-family residence that contains a junior accessory dwelling unit, so long as that ordinance or regulation applies uniformly to all single-family residences regardless of whether the single-family residence includes a junior accessory dwelling unit.

(g) For purposes of this section, the following terms have the following meanings:

(1) "Junior accessory dwelling unit" means a unit that is no more than 500 square feet in size and contained entirely within an existing single-family structure. A junior accessory dwelling unit may include separate sanitation facilities, or may share sanitation facilities with the existing structure.

(2) "Local agency" means a city, county, or city and county, whether general law or chartered.
Attachment 2: Sample ADU Ordinance

Section XXX1XXX: Purpose

This Chapter provides for accessory dwelling units on lots developed or proposed to be developed with single-family dwellings. Such accessory dwellings contribute needed housing to the community’s housing stock. Thus, accessory dwelling units are a residential use which is consistent with the General Plan objectives and zoning regulations and which enhances housing opportunities, including near transit on single family lots.

Section XXX2XXX: Applicability

The provisions of this Chapter apply to all lots that are occupied with a single family dwelling unit and zoned residential. Accessory dwelling units do exceed the allowable density for the lot upon which the accessory dwelling unit is located, and are a residential use that is consistent with the existing general plan and zoning designation for the lot.

Section XXX3XXX: Development Standards

Accessory Structures within Existing Space

An accessory dwelling unit within an existing space including the primary structure, attached or detached garage or other accessory structure shall be permitted ministerially with a building permit regardless of all other standards within the Chapter if complying with:

1. Building and safety codes
2. Independent exterior access from the existing residence
3. Sufficient side and rear setbacks for fire safety.

Accessory Structures (Attached and Detached)

General:

1. The unit is not intended for sale separate from the primary residence and may be rented.
2. The lot is zoned for residential and contains an existing, single-family dwelling.
3. The accessory dwelling unit is either attached to the existing dwelling or detached from the existing dwelling and located on the same lot as the existing dwelling.
4. The increased floor area of an attached accessory dwelling unit shall not exceed 50 percent of the existing living area, with a maximum increase in floor area of 1,200 square feet.
5. The total area of floor space for a detached accessory dwelling unit shall not exceed 1,200 square feet.
6. Local building code requirements that apply to detached dwellings, as appropriate.
7. No passageway shall be required in conjunction with the construction of an accessory dwelling unit.
8. No setback shall be required for an existing garage that is converted to a accessory dwelling unit, and a setback of no more than five feet from the side and rear lot lines shall be required for an accessory dwelling unit that is constructed above a garage.
9. Accessory dwelling units shall not be required to provide fire sprinklers if they are not required for the primary residence and may employ alternative methods for fire protection.

Parking:

1. Parking requirements for accessory dwelling units shall not exceed one parking space per unit or per bedroom. These spaces may be provided as tandem parking, including on an existing driveway or in setback areas, excluding the non-driveway front yard setback.
2. Parking is not required in the following instances:
   - The accessory dwelling unit is located within one-half mile of public transit, including transit stations and bus stations.
• The accessory dwelling unit is located in the WWWW Downtown, XXX Area, YYY Corridor and ZZZ Opportunity Area.
• The accessory dwelling unit is located within an architecturally and historically significant historic district.
• When on-street parking permits are required but not offered to the occupant of the accessory dwelling unit.
• When there is a car share vehicle located within one block of the accessory dwelling unit.

3. Replacement Parking: When a garage, carport, or covered parking structure is demolished or converted in conjunction with the construction of an accessory dwelling unit, replacement parking shall not be required and may be located in any configuration on the same lot as the accessory dwelling unit.

Section XXX4XXX: Permit Requirements

ADUs shall be permitted ministerially, in compliance with this Chapter within 120 days of application. The Community Development Director shall issue a building permit or zoning certificate to establish an accessory dwelling unit in compliance with this Chapter if all applicable requirements are met in Section XXX3XXX, as appropriate. The Community Development Director may approve an accessory dwelling unit that is not in compliance with Section XXX3XXX as set forth in Section XXX5XXX. The XXXX Health Officer shall approve an application in conformance with XXXXXX where a private sewage disposal system is being used.

Section XXX5XXX: Review Process for Accessory Structure Not Complying with Development Standards

An accessory dwelling unit that does not comply with standards in Section XXX3XX may permitted with a zoning certificate or an administrative use permit at the discretion of the Community Development Director subject to findings in Section XXX6XX

Section XXX6XXX: Findings

A. In order to deny an administrative use permit under Section XXX5XXX, the Community Development Director shall find that the Accessory Dwelling Unit would be detrimental to the public health and safety or would introduce unreasonable privacy impacts to the immediate neighbors.

B. In order to approve an administrative use permit under Section XXX5XXX to waive required accessory dwelling unit parking, the Community Development Director shall find that additional or new on-site parking would be detrimental, and that granting the waiver will meet the purposes of this Chapter.

Section XXX7XXX: Definitions

(1) “Living area means the interior habitable area of a dwelling unit including basements and attics but does not include a garage or any accessory structure.

(2) “Accessory dwelling unit” means an attached or a detached residential dwelling unit which provides complete independent living facilities for one or more persons. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family dwelling is situated. An accessory dwelling unit also includes the following:

(A) An efficiency unit, as defined in Section 17958.1 of Health and Safety Code.

(B) A manufactured home, as defined in Section 18007 of the Health and Safety Code.

(3) “Passageway” means a pathway that is unobstructed clear to the sky and extends from a street to one entrance of the accessory dwelling unit.
(4) (1) “Existing Structure” for the purposes of defining an allowable space that can be converted to an ADU means within the four walls and roofline of any structure existing on or after January 1, 2017 that can be made safely habitable under local building codes at the determination of the building official regardless of any non-compliance with zoning standards.
Draft Junior Accessory Dwelling Units (JADU) – Flexible Housing

Findings:

1. Causation: Critical need for housing for lower income families and individuals given the high cost of living and low supply of affordable homes for rent or purchase, and the difficulty, given the current social and economic environment, in building more affordable housing

2. Mitigation: Create a simple and inexpensive permitting track for the development of junior accessory dwelling units that allows spare bedrooms in homes to serve as a flexible form of infill housing

3. Endangerment: Provisions currently required under agency ordinances are so arbitrary, excessive, or burdensome as to restrict the ability of homeowners to legally develop these units therefore encouraging homeowners to bypass safety standards and procedures that make the creation of these units a benefit to the whole of the community

4. Co-Benefits: Homeowners (particularly retired seniors and young families, groups that tend to have the lowest incomes) – generating extra revenue, allowing people facing unexpected financial obstacles to remain in their homes, housing parents, children or caregivers; Homebuyers - providing rental income which aids in mortgage qualification under new government guidelines; Renters – creating more low-cost housing options in the community where they work, go to school or have family, also reducing commute time and expenses; Municipalities – helping to meet RHNA goals, increasing property and sales tax revenue, insuring safety standard code compliance, providing an abundant source of affordable housing with no additional infrastructure needed; Community - housing vital workers, decreasing traffic, creating economic growth both in the remodeling sector and new customers for local businesses; Planet - reducing carbon emissions, using resources more efficiently;

5. Benefits of Junior ADUs: offer a more affordable housing option to both homeowners and renters, creating economically healthy, diverse, multi-generational communities;

Therefore the following ordinance is hereby enacted:

This Section provides standards for the establishment of junior accessory dwelling units, an alternative to the standard accessory dwelling unit, permitted as set forth under State Law AB 1866 (Chapter 1062, Statutes of 2002) Sections 65852.150 and 65852.2 and subject to different provisions under fire safety codes based on the fact that junior accessory dwelling units do not qualify as “complete independent living facilities” given that the interior connection from the junior accessory dwelling unit to the main living area remains, therefore not redefining the single-family home status of the dwelling unit.

A) Development Standards. Junior accessory dwelling units shall comply with the following standards, including the standards in Table below:

1) Number of Units Allowed. Only one accessory dwelling unit or, junior accessory dwelling unit, may be located on any residentially zoned lot that permits a single-family dwelling except as otherwise regulated or restricted by an adopted Master Plan or Precise Development Plan. A junior accessory dwelling unit may only be located on a lot which already contains one legal single-family dwelling.

2) Owner Occupancy: The owner of a parcel proposed for a junior accessory dwelling unit shall occupy as a principal residence either the primary dwelling or the accessory dwelling, except when the home is held by an agency such as a land trust or housing organization in an effort to create affordable housing.

3) Sale Prohibited: A junior accessory dwelling unit shall not be sold independently of the primary dwelling on the parcel.
4) **Deed Restriction:** A deed restriction shall be completed and recorded, in compliance with Section B below.

5) **Location of Junior Accessory Dwelling Unit:** A junior accessory dwelling unit must be created within the existing walls of an existing primary dwelling, and must include conversion of an existing bedroom.

6) **Separate Entry Required:** A separate exterior entry shall be provided to serve a junior accessory dwelling unit.

7) **Interior Entry Remains:** The interior connection to the main living area must be maintained, but a second door may be added for sound attenuation.

8) **Kitchen Requirements:** The junior accessory dwelling unit shall include an efficiency kitchen, requiring and limited to the following components:
   a) A sink with a maximum waste line diameter of one-and-a-half (1.5) inches,
   b) A cooking facility with appliance which do not require electrical service greater than one-hundred-and-twenty (120) volts or natural or propane gas, and
   c) A food preparation counter and storage cabinets that are reasonable to size of the unit.

9) **Parking:** No additional parking is required beyond that required when the existing primary dwelling was constructed.

</tr>
<tr>
<td>Parking</td>
<td>No additional parking required</td>
</tr>
</tbody>
</table>

B) **Deed Restriction:** Prior to obtaining a building permit for a junior accessory dwelling unit, a deed restriction, approved by the City Attorney, shall be recorded with the County Recorder's office, which shall include the pertinent restrictions and limitations of a junior accessory dwelling unit identified in this Section. Said deed restriction shall run with the land, and shall be binding upon any future owners, heirs, or assigns. A copy of the recorded deed restriction shall be filed with the Department stating that:

1) The junior accessory dwelling unit shall not be sold separately from the primary dwelling unit;

2) The junior accessory dwelling unit is restricted to the maximum size allowed per the development standards;

3) The junior accessory dwelling unit shall be considered legal only so long as either the primary residence, or the accessory dwelling unit, is occupied by the owner of record of the property, except when the home is owned by an agency such as a land trust or housing organization in an effort to create affordable housing;

4) The restrictions shall be binding upon any successor in ownership of the property and lack of compliance with this provision may result in legal action against the property owner, including revocation of any right to maintain a junior accessory dwelling unit on the property.

C) **No Water Connection Fees:** No agency should require a water connection fee for the development of a junior accessory dwelling unit. An inspection fee to confirm that the dwelling unit complies with development standard may be assessed.

D) **No Sewer Connection Fees:** No agency should require a sewer connection fee for the development of a junior accessory dwelling unit. An inspection fee to confirm that the dwelling unit complies with development standard
may be assessed.

E) **No Fire Sprinklers and Fire Attenuation:** No agency should require fire sprinkler or fire attenuation specifications for the development of a junior accessory dwelling unit. An inspection fee to confirm that the dwelling unit complies with development standard may be assessed.

**Definitions of Specialized Terms and Phrases.**

"Accessory dwelling unit" means an attached or a detached residential dwelling unit which provides complete independent living facilities for one or more persons. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family dwelling is situated. An accessory dwelling unit also includes the following:

1. An efficiency unit, as defined in Section 17958.1 of Health and Safety Code.

2. A manufactured home, as defined in Section 18007 of the Health and Safety Code.

"Junior accessory dwelling unit" means a unit that is no more than 500 square feet in size and contained entirely within an existing single-family structure. A junior accessory dwelling unit may include separate sanitation facilities, or may share sanitation facilities with the existing structure.

ACCESSORY DWELLING UNITS: CASE STUDY (26 pp.)
Introduction: Accessory dwelling units (ADUs) — also referred to as accessory apartments, ADUs, or granny flats — are additional living quarters on single-family lots that are independent of the primary dwelling unit. The separate living spaces are equipped with kitchen and bathroom facilities, and can be either attached or detached from the main residence. This case study explores how the adoption of ordinances, with reduced regulatory restrictions to encourage ADUs, can be advantageous for communities. Following an explanation of the various types of ADUs and their benefits, this case study provides examples of municipalities with successful ADU legislation and programs. Section titles include: History of ADUs; Types of Accessory Dwelling Units; Benefits of Accessory Dwelling Units; and Examples of ADU Ordinances and Programs.

THE MACRO VIEW ON MICRO UNITS (46 pp.)
Library Call #: H43 4.21 M33 2014
The Urban Land Institute Multifamily Housing Councils were awarded a ULI Foundation research grant in fall 2013 to evaluate from multiple perspectives the market performance and market acceptance of micro and small units.

RESPONDING TO CHANGING HOUSEHOLDS: Regulatory Challenges for Micro-units and Accessory Dwelling Units (76 pp.)
By Vicki Been, Benjamin Gross, and John Infranca (2014)
New York University: Furman Center for Real Estate & Urban Policy
Library Call # D55 3 I47 2014
This White Paper fills two gaps in the discussion regarding compact units. First, we provide a detailed analysis of the regulatory and other challenges to developing both ADUs and micro-units, focusing on five cities: New York; Washington, DC; Austin; Denver; and Seattle. That analysis will be helpful not only to the specific jurisdictions we study, but also can serve as a model for those who want to catalogue regulations that might get in the way of the development of compact units in their own jurisdictions. Second, as more local governments permit or encourage compact units, researchers will need to evaluate how well the units built serve the goals proponents claim they will.

SCALING UP SECONDARY UNIT PRODUCTION IN THE EAST BAY: Impacts and Policy Implications (25 pp.)
By Jake Webmann, Alison Nemirow, and Karen Chapple (2012)
UC Berkeley: Institute of Urban and Regional Development (IURD)
Library Call # H44 1.1 S33 2012
This paper begins by analyzing how many secondary units of one particular type, detached backyard cottages, might be built in the East Bay, focusing on the Flatlands portions of Berkeley, El Cerrito, and Oakland. We then investigate the potential impacts of scaling up the strategy with regard to housing affordability, smart growth, alternative transportation, the economy, and city budgets. A final section details policy recommendations, focusing on regulatory reforms and other actions cities can take to encourage secondary unit construction, such as promoting carsharing programs, educating residents, and providing access to finance.
SECONDARY UNITS AND URBAN INFILL: A literature Review (12 pp.)

By Jake Wegmann and Alison Nemirow (2011)
UC Berkeley: IURD
Library Call # D44 4.21 S43 2011

This literature review examines the research on both infill development in general, and secondary units in particular, with an eye towards understanding the similarities and differences between infill as it is more traditionally understood – i.e., the development or redevelopment of entire parcels of land in an already urbanized area – and the incremental type of infill that secondary unit development constitutes.

YES, BUT WILL THEY LET US BUILD? The Feasibility of Secondary Units in the East Bay (17 pp.)

By Alison Nemirow and Karen Chapple (2012)
UC Berkeley: IURD
Library Call # H44.5 1.1 Y47 2012

This paper begins with a discussion of how to determine the development potential for secondary units, and then provides an overview of how many secondary units can be built in the East Bay of San Francisco Bay Area under current regulations. The next two sections examine key regulatory barriers in detail for the five cities in the study (Albany, Berkeley, El Cerrito, Oakland, and Richmond), looking at lot size, setbacks, parking requirements, and procedural barriers. A sensitivity analysis then determines how many units could be built were the regulations to be relaxed.

YES IN MY BACKYARD: Mobilizing the Market for Secondary Units (20 pp.)

By Karen Chapple, J. Weigmann, A. Nemirow, and C. Dentel-Post (2011)
UC Berkeley: Center for Community Innovation.
Library Call # B92 1.1 Y47 2011

This study examines two puzzles that must be solved in order to scale up a secondary unit strategy: first, how can city regulations best enable their construction? And second, what is the market for secondary units? Because parking is such an important issue, we also examine the potential for secondary unit residents to rely on alternative transportation modes, particular car share programs. The study looks at five adjacent cities in the East Bay of the San Francisco Bay Area (Figure 1) -- Oakland, Berkeley, Albany, El Cerrito, and Richmond -- focusing on the areas within ½ mile of five Bay Area Rapid Transit (BART) stations.

"HIDDEN" DENSITY: THE POTENTIAL OF SMALL-SCALE INFILL DEVELOPMENT (2 pp.)
By Karen Chapple (2011)
UC Berkeley: IURD Policy Brief.
Library Call # D44 1.2 H53 2011

California’s implementation of SB 375, the Sustainable Communities and Climate Protection Act of 2008, is putting new pressure on communities to support infill development. As metropolitan planning organizations struggle to communicate the need for density, they should take note of strategies that make increasing density an attractive choice for neighborhoods and regions.

HIDDEN DENSITY IN SINGLE-FAMILY NEIGHBORHOODS: Backyard cottages as an equitable smart growth strategy (22 pp.)

Abstract (not available in full text): Secondary units, or separate small dwellings embedded within single-family residential properties, constitute a frequently overlooked strategy for urban infill in high-cost metropolitan areas in the United States. This study, which is situated within California’s San Francisco Bay Area, draws upon data collected from a homeowners’ survey and a Rental Market Analysis to provide evidence that a scaled-up strategy emphasizing one type of secondary unit – the backyard cottage – could yield substantial infill growth with minimal public subsidy. In addition, it is found that this strategy compares favorably in terms of affordability with infill of the sort traditionally favored in the ‘smart growth’ literature, i.e. the construction of dense multifamily housing developments.

HOW ONE COLORADO CITY INSTANTLY CREATED AFFORDABLE HOUSING
By Anthony Flint. The Atlantic-CityLab. (May 17, 2016).

In Durango, Colorado, zoning rules were changed to allow, for instance, non-family members as residents in already-existing accessory dwelling units.

NEW HAMPSHIRE WINS PROTECTIONS FOR ACCESSORY DWELLING UNITS (1 p.)
NLIHC (March 28, 2016)
Affordable housing advocates in New Hampshire celebrated a significant victory this month when Governor Maggie Hassan (D) signed Senate Bill 146, legislation that allows single-family homeowners to add an accessory
dwelling unit as a matter of right through a conditional use permit or by special exception as determined by their municipalities. The bill removes a significant regulatory barrier to increasing rental homes at no cost to taxpayers.

NEW IN-LAW SUITE RULES BOOST AFFORDABLE HOUSING IN SAN FRANCISCO. (3 pp.)
By Rob Poole. Shareable. (June 10, 2014).

The San Francisco Board of Supervisors recently approved two significant pieces of legislation that support accessory dwelling units (ADUs), also known as “in-law” or secondary units, in the city...

USING ACCESSORY DWELLING UNITS TO BOLSTER AFFORDABLE HOUSING (3 pp.)
By Michael Ryan. Smart Growth America. (December 12, 2014).
I/we have no reservations regarding Robert & Mary Shadley having a manufactured home placed on the property owned by her daughter Mary Ann and her husband Patrick Otterson. The property is located at 1070 Pacific Ave in Willows.
