PLANNING COMMISSION

STAFF REPORT

MEETING DATE: Wednesday, May 16, 2018

TO: Glenn County Planning Commission

FROM: Andy Popper, Associate Planner

SUBJECT: General Plan Amendment 2017-001 and Zone Change 2017-002

APPLICANT: North Valley Building Systems, Inc.
Attn: Bret Wood

LANDOWNER: Baker Trucking, Inc.
Attn: Tony Hobbs

Attachments:

1. Planning Commission Resolution
2. General Plan/Zone Change Map
3. Negative Declaration and Initial Study
4. Request for Review, Application, Agency Comments
5. Vicinity/Legal Notice
1  PROJECT SUMMARY

North Valley Building Systems, Inc. with Baker Trucking, Inc. have applied for a General Plan Amendment and Zone Change. If the proposal is approved, the applicant has also applied for a Site Plan Review (SPR 2017-018) to develop the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc.

The General Plan Amendment proposes to change the land use designation from the existing “Rural Residential” to the proposed “Industrial” and the existing “RE-5” (Rural Residential Estate Zone, 4.25-acre minimum parcel size) Zoning to “M” (Industrial, 1-acre minimum parcel size).

The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code §15.440.020 (B) (13). The proposed warehouse requires an application for a Site Plan Review, which has been applied for concurrently and will be recommended to the Director for approval.

The project site is located on the east side of North Tehama Street (County Road 99W), south of County Road 48, west of County Road KK, and north of the City of Willows, within the unincorporated area of Glenn County, California. APN: 017-013-042 (5.0± acres).

The project and project setting is described in more detail in the attached Negative Declaration and Initial Study.

1.1 Recommendation

That the Planning Commission recommend, that the Board of Supervisors adopt, the proposed Negative Declaration prepared for the project and approve General Plan Amendment 2017-001 and Zone Change 2017-002 with the Findings as presented in the Staff Report.

2.  ANALYSIS

The proposed project is consistent with surrounding land uses. The proposed General Plan Amendment and Zone Change will integrate with the adjacent Industrial land use designations and “M” (Industrial) zoning south of the proposed project site. The project will not be detrimental to the health, safety, or general welfare of persons residing or working in the vicinity. The project is analyzed in more detail in the attached Negative Declaration and Initial Study.

2.1 Environmental Determination

A copy of the proposed Negative Declaration and Initial Study is attached. The Initial Study is a detailed discussion and analysis of the project and a discussion of the project’s potential environmental impacts as required by the California Environmental Quality Act (CEQA). Based on the Initial Study, this project will result in no Potentially Significant Impacts to the environment.
The Initial Study concludes that there is no substantial evidence in light of the whole record that the project will have a significant impact on the environment either cumulatively or individually. Therefore, a Negative Declaration has been prepared.

3 BACKGROUND

3.1 General Plan Definitions of Existing and Proposed Land Use Designations

Existing: Rural Residential (General Plan, Volume I, Section 3.0.6)

The subject 5.0± parcel is currently designated as “Rural Residential” in the General Plan.

Definition and Purpose: *The Rural Residential classification is utilized to identify areas suitable for large lot, low density residential use that provide for development which is compatible with a rural character and life-style.*

Permitted Uses: *Examples of uses which are considered appropriate under this classification include, but are not limited to, single-family residences, agricultural and domestic livestock farming on a limited scale, and home occupations.*

Proposed: Industrial (General Plan, Volume I, Section 3.0.14)

The Parcel (5.0± acres) is proposed to be designated as “Industrial” in the General Plan.

Definition and Purpose: *The purpose of the Industrial classification is to provide for a range of manufacturing operations; the processing of natural resources; and the processing of agricultural products. The intent is to encourage appropriate industrial/manufacturing development that will be compatible with adjacent land uses and will not create adverse environmental impacts.*

Permitted Uses: *Examples of uses which are considered appropriate under this classification include, but are not limited to: light manufacturing uses; uses permitted in the Service Commercial category; fabrication shops; large warehouses; equipment storage yards; distribution sales; batch plants; lumber mills; auto wrecking, salvage and junk yards; fuel tank farms; and energy facilities.*

3.2 Summary of Amendment Process (General Plan, Volume I, Section 1.1.4)

The process of amending the General Plan is established in state law. The County may amend each of the seven mandatory elements (land use, circulation, housing, noise, safety, open space and conservation) no more than four times in one calendar year, although some exceptions apply. General Plan Amendments can be initiated by the Planning Commission or Board of Supervisors, or can be applied for by private parties.
The Policy Plan establishes standards for some types of General Plan Amendments that must be considered when approving or denying the request. The types of amendments to which standards apply include the amendment of urban limit lines, establishing new planned communities, and changing roadway functional classifications. These standards are not applicable to the proposed General Plan Amendment.

3.3 **Land Use Classifications (General Plan, Volume I, Section 3.0)**

A set of land use classifications were adopted with the General Plan to serve as a guide for designating the general land use distribution. Determining the land use designation for an area is generally based on the following criteria:

- Desire to protect agricultural areas from non-agricultural uses
- Existing uses of land when compatible with the goals and policies of the Plan
- Accessibility/circulation
- Soils classification
- Vegetation
- Existing parcel size, when consistent with goals and policies of the Plan
- Availability of public services and facilities and potential for expansion
- General characteristics of the area, such as slope, flood zone or biological significance
- Desire to remedy previous poor or obsolete land use decisions

4 **GENERAL PLAN CONSISTENCY**

This proposal to amend the land use designation from “Rural Residential” to “Industrial” and to change the zoning from “RE-5” to “M” for a five-acre parcel can be considered consistent with the General Plan for Glenn County. The following discussion describes how this project would be consistent with the General Plan. The Vision Statement of the General Plan discusses and defines each of the below criteria in general concepts to form a vision for the County. Below, these criteria are discussed for General Plan consistency in relation to this specific project.

4.1 **Growth and Development**

The proposed General Plan Amendment can be considered consistent with the growth and development objectives of the General Plan because this proposal is consistent with the existing surrounding uses, specifically to the south and west. The area consists of Industrial and Commercial uses. The project will integrate with the adjacent Industrial land use designations and “M” zoning south of the project site.

General Plan Natural Resource Policy 15 (NRP-15) states that *it shall be the policy of Glenn County to recognize that, in order to realistically provide for the necessary diversity and growth required in the local economy, some lands presently committed to agriculture may be consumed by other development activities, and plan for and monitor such conversion to assure that it does not hinder or restrict existing agricultural operations.*
This proposal is consistent with this policy because development in this area would preserve and protect agricultural land by allowing this type of development in an area that is not designated for intensive agricultural uses and is not in a land conservation contract.

Community Development Policy 20 (CDP-20) states that *it shall be the policy of Glenn County to assure that adequate provision is made in this General Plan for all types of uses and establish coherent land use patterns*. Community Development Policy 40 (CDP-40) states that *it shall be the policy of Glenn County to discourage scattered unplanned urban development*. This proposal is consistent with these policies because it establishes a coherent land use pattern of industrial development by directly adjoining to the existing industrial parcels to south. The general area provides a buffer zone between urban and agricultural uses. The properties adjacent to the south are designated Industrial and zoned “M”. The proposal avoids scattered, unplanned development as well as spot zoning.

As defined in the *California Planning Guide: An Introduction to Planning in California*, spot zoning is defined as the zoning of an isolated parcel in a manner, which is inconsistent or incompatible with surrounding zoning or land uses. The project is compatible and consistent with the surrounding land uses and zoning; therefore, it is not considered spot zoning.

4.2 **Housing**

Community Development Goals of the General Plan are outlined in the Housing Element to accommodate the County for its projected population growth and to provide opportunities for all income groups to have access to housing throughout the County. The proposal will create jobs to support housing in the community.

Community Development Policy 89 (CDP-89) states that *it shall be the policy of Glenn County to support efforts which coordinate and improve the ability of the housing delivery system to effectively respond to local housing needs*. This proposal responds to those local housing needs by changing the zoning for a proposed warehouse in a Commercial and Industrial zoned that is following the uses directly to the south and west.

Community Development Policy 92 (CDP-92) states that *it shall be the policy of Glenn County to accommodate and encourage development of a full range of housing types in the unincorporated communities of Glenn County*. The proposal will provide additional areas for industrial uses within a compatible use area.

4.3 **Agricultural Land**

The proposed General Plan Amendment does not significantly affect the conservation of agricultural land. As discussed in the Agriculture and Forest Resources of the Initial Study, the project will not have a significant impact on agricultural land. Agriculture will continue to be an allowed use on parcels to the north. The proposed warehouse will continue the character of the area and provide a transitional area between urban and agricultural uses.
The subject parcel is not under a land conservation contract. Development at this location will offset the conversion of agricultural land for development elsewhere in the unincorporated area and thereby preserve existing intensive agricultural land uses elsewhere.

Natural Resource Policy 13 (NRP-13) states: Establish urban limit lines around existing and planned future communities, development nodes and other areas of urban use, in an effort to protect agricultural land and to encourage infill and concentric growth. Community Development Policy 6 (CDP-6) states: Utilize urban limit lines as a method to preserve agricultural land and promote orderly growth in the county. An urban limit line has been established around the City of Willows. The project site is located within the boundary of the urban limit line. Higher density development will occur within the urban limit line, which will continue to serve to preserve agricultural lands out of the municipal planning areas.

4.4 Adequate Public Services and Facilities

The proposed General Plan Amendment can be considered consistent with the General Plan because adequate public services and facilities exist to serve the project site. As discussed in Section XIV (Public Services) of the Initial Study, the project will not have a significant impact on public services such as fire, police, schools, and parks. Therefore, this proposal can be considered as consistent with General Plan Community Development Goal-17 (CDG-17), which is the provision of adequate and cost-effective public services in this area. Adequate public services and facilities will be available for this proposed project. The project site will be served by well and on-site sewage disposal system.

4.5 Economic Development

The proposed General Plan Amendment involves commercial or industrial development; therefore, it creates long term employment opportunities related to economic development. Construction contributes to a temporary economic development because local labor and supplies are often used that will fiscally enhance the economy.

4.6 Circulation

The project site is the northern boundary of numerous industrially zoned properties along the eastern side of the County Road 99W corridor; from County Road 48 to County Road 57. A similar commercial zoned corridor is along the western side of County Road 99W. The proposed General Plan Amendment is consistent with the existing zoning. Adequate access to the project site will continue to be provided by 600 feet of County Road 48.

General Plan Community Development Policy-54 (CDP-54) states that it shall be the policy of Glenn County to support actions at the local level that ensure roadways are adequate to accommodate present and future traffic. The project site has 600 feet of County Road 48 frontage access along its northern boundary.
General Plan Community Development Policy-57 (CDP-57) states that it shall be the policy of Glenn County to *determine the impact proposed development will have on the local road system and ensure that the established level of service is maintained.*

General Plan Community Development Policy-58 (CDP-58) states that it shall be the policy of Glenn County to *require new development to pay its fair share for the improvement of roadways.* Road improvements and/or additions on the property would be provided and paid for by the applicant/developer. This will ensure that the established level of service for roadways is maintained.

### 4.7 Open Space/Conservation

The General Plan Amendment does not involve loss of significant open space or conservation areas. This proposal can be considered consistent with the General Plan vision of protecting, preserving and providing for open space and resource conservation because the development is not proposed on agricultural preserve property. The project site consists of a field previously used as horse pasture. Future development at the site will not affect existing conservation areas because there are no conservation areas in the direct vicinity of the proposal.

### 4.8 Water

The General Plan Amendment is consistent with General Plan Community Development Policy. There will be sufficient water capacity for this proposed project. The goals, policies, implementation strategies, and programs discussed in Section 5.1.2 of the General Plan reflect the County’s approach to protecting and managing local water resources. Natural Resources Goal 2 (NRG-2) is the protection and management of local water resources. The proposed General Plan Amendment can be considered consistent with the General Plan in protecting water quality. The proposal would not exceed the existing water supply. Impacts on hydrology and water quality are further discussed within the Initial Study.

### 5 ZONING CONSISTENCY

The purpose of the Zoning Code is to facilitate and guide growth in accordance with the General Plan. Below is a discussion of the proposal’s consistency with the purpose of the Zoning Code.

#### 5.1 Glenn County Code Section 15.010.020 (Purpose of Title 15, Zoning)

A. *To promote and protect the public health, safety, peace, morals, comfort, convenience and general welfare;*

Future development will be required to be consistent with the established rules of the proposed zoning district. The zoning requirements allowed under the proposed zone change will be subject to all local and state regulations including, but not limited to, Air Pollution Control District regulations, Public Works Department regulations, Health Department regulations, and Building Department regulations.
The proposal meets the purpose of the Unified Development Code, as it will be consistent with the established rules of the “M” Zoning District. The “M” Zoning District and its uses outlined in the Unified Development Code will be met.

B. To implement the County General Plan, and to facilitate and guide growth in accordance with the General Plan;

The proposed zone change will implement the Glenn County General Plan and facilitate and guide growth in accordance with the General Plan. The proposed zone change will allow for uses which are compatible with the land use pattern of the area. The proposed zone change is in conformance with the Elements of the General Plan.

C. To protect the social and economic stability of residential, commercial, industrial, resource production, and recreational activities within the County through the orderly, planned use of real property.

The proposed zone change will protect the social and economic stability of residential, commercial, industrial, resource production, and recreational activities within the County through the orderly, planned use of real property. The project is consistent with surrounding uses and zoning. All requirements of the “M” Zoning District will be met with approval of this proposal.

5.2 Proposed Zoning

The following section discusses the project site’s consistency with the proposed zoning category.

This zoning classification is established for the following purposes:
A. To reserve appropriately located areas for industrial plants and related activities;
B. To protect areas appropriate for industrial use from intrusion by residential dwellings and other conflicting uses;
C. To protect residential and commercial properties and nuisance-free, nonhazardous industrial uses from noise, odor, dust, dirt, smoke, vibration, heat, glare, fire, explosion, noxious fumes, radiation and other hazards and objectionable influence incidental to certain industrial uses;
D. To promote the most desirable use of land and development in accordance with the general plan of Glenn County.

The proposed “M” zone will be consistent with the adjacent Industrial and vicinity Commercial land uses and zoning.

Site Area and Configuration (Glenn County Code §15.440.050)

A. The minimum area of any lot or parcel of land shall be ten thousand square feet net if served by public sewer and public water facilities except in a planned unit development project.
B. The minimum area of any lot or parcel of land shall be twenty thousand square feet net if served by either a public sewer or a public water facility except in a planned unit development project.
C. The minimum area of any lot or parcel of land shall be as indicated below, except in a planned unit development project, if served with a septic tank and a well:

Sub-Zone: M-, Minimum Parcel Size: 1 acre; Sub-Zone: M-5 Minimum Parcel Size: 5 acres

D. The minimum lot width and public street frontage of any lot or parcel of land shall be sixty feet; providing, the lot width ratio is met, except in a planned unit development project.

E. Lots which are less than ten acres in size shall conform to a 3:1 length to width ratio.

The existing 5.0± acre parcel meets the minimum lot size; has approximately 600 feet of frontage, and a lot width (depth) of 351± feet. Therefore, the property conforms to the 3:1 length to width ratio and will be adequate in size and shape to conform to the proposed zoning.

Minimum Yard Requirements (Glenn County Code §15.440.060)

A. Front Yard. No front yard shall be required, except where the frontage in a block is partially in a residential district, in which case the front yard shall be the same as required in such residential district.

B. Side Yard: No side yard shall be required, except that a 25-foot setback with a solid wall, solid fence, or landscaping, shall be required where a parcel occurs within a block lying partly within a residential district. Each Site Plan Review shall be evaluated on a project-specific basis.

C. Rear Yard: No rear yard shall be required, except where the rear of a lot abuts a residential district, in which case the rear yard shall be not less than twenty-five (25) feet with a solid wall, solid fence, or landscaping. Each Site Plan Review shall be evaluated on a project-specific basis.

D. The wall, fence, and/or landscaping shall be continuously maintained. This provision shall be met before a Certificate of Occupancy Permit may be issued for such use by the building official.

E. Any expansions of existing facilities are exempt from this Chapter 15.440, unless recommended by the Director and approved by the Planning Commission. Each Site Plan Review for any expansion of an existing facility shall be evaluated on a project-specific basis.

The proposed structure meets the required setbacks for the proposed zoning.

Site Plan Review (Glenn County Code §15.440.090)

Prior to or concurrent with the application for a building permit, the applicant shall submit to the agency a complete site plan and all necessary supporting documentation for review by the agency to ensure compliance with all the requirements of the Glenn County Code.

The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code §15.440.020 (B) (13). The proposed warehouse requires an application for a Site Plan Review, which has been applied for concurrently and will be recommended to the Director for approval.

6. ADDITIONAL PROJECT REQUIREMENTS

Prior to any work being done in the County Right-of-Way, an Encroachment Permit shall be required (Glenn County Code §15.120).
The necessary permits shall be secured in all affected federal, state, and local agencies. It is the responsibility of the applicant to make certain all requirements are met and permits are obtained from all other agencies.

In addition to the Conditions of Approval, the applicant’s and technical or project management representative’s attention is directed to the attached memoranda from other agencies reflecting their comments on reviewing the application. The items noted are a guide to assist the applicant in meeting the requirements of the Conditions of Approval and applicable government codes. The memoranda may also note unusual circumstances that need special attention. The items listed are a guide and not intended to be a comprehensive summary of all codified requirements or site-specific requirements.

7  FINDINGS

7.1  Findings for Negative Declaration

The Initial Study prepared for the project documents reasons to support the following findings. The following findings shall be made prior to recommending approval of a negative declaration.

Finding 1 (Aesthetics)

The project will not have a significant impact on aesthetics because there are no scenic vistas or scenic resources in the area. The adopted standards for lighting and construction will minimize impacts from future development. The project is compatible with and similar to existing uses in the area. Impacts are considered less than significant.

Finding 2 (Agricultural and Forest Resources)

The project will not have a significant impact on agriculture or forest resources. Agricultural activities within the vicinity will not be adversely impacted by this project. There are no forest resources located within the vicinity of the project. Impacts are considered less than significant.

Finding 3 (Air Quality)

The project will not have a significant impact on air quality because the project will not violate air quality standards or contribute substantially to an existing air quality violation. Federal, state, and local standards and codes reduce any potential impacts to less than significant. Impacts are considered less than significant.
Finding 4 (Biological Resources)

The project will not have a significant impact on biological resources. The sensitive habitats or natural communities as defined by the Department of Fish and Wildlife or the U.S. Fish and Wildlife Service will not be adversely impacted by this project. Impacts are considered less than significant.

Finding 5 (Cultural Resources)

The project will not have significant impact on cultural resources. Historically, the project site has experienced agricultural uses, which disturbed the project surface and soils to varying depths. State laws are in place in case of accidental discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 6 (Geology and Soils)

The project will not have a significant impact on geology and soils because geologic hazards in the area are minimal and the building codes will require new construction to meet standards for soil conditions. New on-site sewage disposal systems will be required to meet the standards set forth in the Glenn County Code and by the Glenn County Environmental Health Department. Impacts are considered less than significant.

Finding 7 (Greenhouse Gas Emissions)

The project will not have a significant impact on global climate change as a result of greenhouse gas emissions. The project is not in conflict with existing guidelines or standards. The project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The project will not create significant changes in GHG emissions. Impacts are considered less than significant.

Finding 8 (Hazards and Hazardous Materials)

Hazards and hazardous materials will not have a significant impact on the environment as a result of the proposed project. The project will not interfere with an adopted emergency response plan nor expose people to risk of loss, injury, or death. Impacts are considered less than significant.

Finding 9 (Hydrology/Water Quality)

The project will not have a significant impact on hydrology and water quality because the project will not substantially deplete groundwater supplies or expose people or structures to a significant risk of loss, injury, or death involving flooding. The project will not violate water quality standards or waste discharge requirements. Impacts are considered less than significant.
Finding 10 (Land Use and Planning)

The project will not have a significant impact on land use and planning because the project would not physically divide an established community. The project site will meet the size and density requirements of the General Plan and Title 15 of the Glenn County Code. The project is consistent with the proposed Glenn County General Plan land use designation of “Industrial”. The project will not conflict with an existing habitat conservation plan or natural community conservation plan.

Finding 11 (Mineral Resources)

The project will not have a significant impact on mineral resources. The project would not have a significant impact on aggregate or natural gas resources. Impacts are considered less than significant.

Finding 12 (Noise)

The project will not have a significant impact on people residing or working in the area from excessive noise levels. Noise generating activities are required to meet the established standards prescribed by the County Code. The project site is not within an airport land use plan and not in the vicinity of a private airstrip which would expose people in the area to unacceptable noise levels. Impacts are considered less than significant.

Finding 13 (Population and Housing)

The project will not have a significant impact on population and housing because the project will not displace people or housing. This project would not induce substantial population growth directly or indirectly. Impacts are considered less than significant.

Finding 14 (Public Services)

The project will not have a significant impact on public services. The services of fire protection, police protection, schools, parks, and other public facilities are sufficient to accommodate the proposed project. Impacts are considered less than significant.

Finding 15 (Recreation)

The project will not have a significant impact on recreation because it would not substantially increase the use of existing recreational facilities nor does the project include such facilities. Impacts are considered less than significant.
Finding 16 (Transportation/Traffic)

The project will not have a significant impact on transportation/circulation because it will not significantly increase traffic volumes on existing roads. The project will not change air traffic patterns. There is adequate access to the project site. Access roads will provide adequate emergency access to the project site. Alternative transportation plans will not be impacted. Impacts are considered less than significant.

Finding 17 (Tribal Cultural Resources)

The project will not have significant impact on cultural resources. State laws are in place in case of discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 18 (Utilities and Service Systems)

The project will not have a significant impact on utilities and service systems. The project can adequately be served by existing utilities and service systems. Impacts are considered less than significant.

Finding 19 (Mandatory Findings of Significance)

There is no substantial evidence in light of the whole record that the project may have a significant impact on the environment either cumulatively or individually. Impacts are considered less than significant.

7.2 Findings for General Plan Amendment

Finding 1 (Growth and Development)

The proposed General Plan Amendment can be considered consistent with the growth and development objectives of the General Plan because this proposal is consistent with the existing surrounding uses. The area consists of Industrial and Commercial uses. The project will integrate with the adjacent Industrial land use designations and “M” zoning south of the project site.

Finding 2 (Housing)

The proposed General Plan Amendment is consistent with the provision of adequate housing. The proposal will provide additional areas for industrial uses within a compatible use area. The proposal responds to local housing needs by changing the zoning for a proposed warehouse in a Commercial and Industrial area that is following the uses directly to the south and west.
Finding 3 (Agricultural Land)

The proposed General Plan Amendment does not affect the conservation of agricultural land. As discussed in Section II (Agriculture and Forest Resources) of the Initial Study, the project will not have a significant impact on agricultural land. This proposal will conserve, protect and preserve intensive agricultural land elsewhere in the unincorporated area while providing additional land for Industrial uses.

Finding 4 (Adequate Public Services and Facilities)

The proposed General Plan Amendment can be considered consistent with the General Plan because adequate public services and facilities exist to serve the project site. As discussed in Section XIV (Public Services) of the Initial Study, the project will not have a significant impact on public services such as fire, police, schools, and parks.

Finding 5 (Economic Development)

The proposed General Plan Amendment involves commercial or industrial development; therefore, it creates long term employment opportunities related to economic development. Construction contributes to a temporary economic development because local labor and supplies are often used that will fiscally enhance the economy.

Finding 6 (Circulation)

The project surrounding has similar residential and agricultural uses. The proposed General Plan Amendment is consistent with the Circulation Element of the General Plan. Adequate access to the project site will continue to be served by County roads.

Finding 7 (Open Space/Conservation)

This proposal can be considered consistent with the General Plan vision of protecting, preserving and providing for open space and resource conservation because the development is not proposed on agricultural preserve property. Future development at the site will not affect existing conservation areas because there are no conservation areas in the direct vicinity of the proposal.

Finding 8 (Water)

There will be sufficient water capacity for this proposed project. The proposed General Plan Amendment can be considered consistent with the General Plan in protecting water quality. The proposal would not exceed the existing water supply. Impacts on hydrology and water quality are further discussed within the Initial Study.
7.3 **Findings for Zone Change**

**Finding 1**

Development allowed under the proposed zone change will be subject to all local and state regulations including, but not limited to, Air Pollution Control District regulations, Public Works Department regulations, Health Department regulations, and Building Department regulations. The “M” Zoning District and its uses outlined in the Unified Development Code will be met.

**Finding 2**

The proposed zone change will implement the Glenn County General Plan and facilitate and guide growth in accordance with the General Plan. The proposed zone change will allow for uses which are compatible with the land use pattern of the area. The proposed zone change is in conformance with the Elements of the General Plan.

**Finding 3**

The proposed zone change will protect the social and economic stability of residential, commercial, industrial, resource production, and recreational activities within the County through the orderly, planned use of real property. The project is consistent with surrounding uses and zoning. All requirements of the “M” Zoning District will be met with approval of this proposal.

8 **SAMPLE MOTIONS**

**Environmental Determination**

I move that the Planning Commission, with the Findings as presented in the Staff Report, recommend that the Board of Supervisors adopt the Negative Declaration for General Plan Amendment 2017-001 and Zone Change 2017-002.

**General Plan Amendment**

I (further) move that the Planning Commission recommend that the Board of Supervisors adopt a Resolution to approve General Plan Amendment 2017-001, to amend the General Plan land use designation for 5± acres from “Rural Residential” to “Industrial”.

**Zone Change**

I (further) move that the Planning Commission recommend that the Board of Supervisors adopt an Ordinance to approve Zone Change 2017-002, to change the zoning for 5± acres from Existing “RE-5” (Rural Residential Estate Zone) to “M” (Industrial).
RESOLUTION NO. 2018-001

RESOLUTION MAKING FINDINGS AND RECOMMENDING APPROVAL OF GENERAL PLAN AMENDMENT 2017-001 AND ZONE CHANGE 2017-002 TO THE GLENN COUNTY BOARD OF SUPERVISORS

WHEREAS, on Wednesday, May 16, 2018, pursuant to the Glenn County Code, a public hearing was held to amend the Land Use Element of the Glenn County General Plan and to amend the Glenn County Zoning Maps as described in Exhibit “A” attached hereto and incorporated herein; and

WHEREAS, the Glenn County Planning & Community Development Services Agency has reviewed the proposed General Plan Amendment 2017-001 and Zone Change 2017-002 and placed the matter as an item for review on the agenda of the Planning Commission on Wednesday, May 16, 2018; and

WHEREAS, pursuant to Section 65090 of the California Government Code, notice was given of a public hearing by publication in a newspaper of general circulation in the County of Glenn; and

WHEREAS, the Planning Commission after considering all the evidence, both written and oral, presented at said public hearing, did find that there was sufficient information available to enable them to make a fair and impartial decision.

NOW, THEREFORE, BE IT RESOLVED that the Glenn County Planning Commission does hereby make the following findings and recommends approval of General Plan Amendment 2017-001 and Zone Change 2017-002 to the Glenn County Board of Supervisors:

The Initial Study prepared for the project documents reasons to support the following findings. The following findings shall be made prior to recommending approval of a negative declaration.

Finding 1 (Aesthetics)

The project will not have a significant impact on aesthetics because there are no scenic vistas or scenic resources in the area. The adopted standards for lighting and construction will minimize impacts from future development. The project is compatible with and similar to existing uses in the area. Impacts are considered less than significant.
Finding 2 (Agricultural and Forest Resources)

The project will not have a significant impact on agriculture or forest resources. Agricultural activities within the vicinity will not be adversely impacted by this project. There are no forest resources located within the vicinity of the project. Impacts are considered less than significant.

Finding 3 (Air Quality)

The project will not have a significant impact on air quality because the project will not violate air quality standards or contribute substantially to an existing air quality violation. Federal, state, and local standards and codes reduce any potential impacts to less than significant. Impacts are considered less than significant.

Finding 4 (Biological Resources)

The project will not have a significant impact on biological resources. The sensitive habitats or natural communities as defined by the Department of Fish and Wildlife or the U.S. Fish and Wildlife Service will not be adversely impacted by this project. Impacts are considered less than significant.

Finding 5 (Cultural Resources)

The project will not have significant impact on cultural resources. Historically, the project site has experienced agricultural uses, which disturbed the project surface and soils to varying depths. State laws are in place in case of accidental discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 6 (Geology and Soils)

The project will not have a significant impact on geology and soils because geologic hazards in the area are minimal and the building codes will require new construction to meet standards for soil conditions. New on-site sewage disposal systems will be required to meet the standards set forth in the Glenn County Code and by the Glenn County Environmental Health Department. Impacts are considered less than significant.

Finding 7 (Greenhouse Gas Emissions)

The project will not have a significant impact on global climate change as a result of greenhouse gas emissions. The project is not in conflict with existing guidelines or standards. The project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The project will not create significant changes in GHG emissions. Impacts are considered less than significant.
Finding 8 (Hazards and Hazardous Materials)

Hazards and hazardous materials will not have a significant impact on the environment as a result of the proposed project. The project will not interfere with an adopted emergency response plan nor expose people to risk of loss, injury, or death. Impacts are considered less than significant.

Finding 9 (Hydrology/Water Quality)

The project will not have a significant impact on hydrology and water quality because the project will not substantially deplete groundwater supplies or expose people or structures to a significant risk of loss, injury, or death involving flooding. The project will not violate water quality standards or waste discharge requirements. Impacts are considered less than significant.

Finding 10 (Land Use and Planning)

The project will not have a significant impact on land use and planning because the project would not physically divide an established community. The project site will meet the size and density requirements of the General Plan and Title 15 of the Glenn County Code. The project is consistent with the proposed Glenn County General Plan land use designation of “Industrial”. The project will not conflict with an existing habitat conservation plan or natural community conservation plan.

Finding 11 (Mineral Resources)

The project will not have a significant impact on mineral resources. The project would not have a significant impact on aggregate or natural gas resources. Impacts are considered less than significant.

Finding 12 (Noise)

The project will not have a significant impact on people residing or working in the area from excessive noise levels. Noise generating activities are required to meet the established standards prescribed by the County Code. The project site is not within an airport land use plan and not in the vicinity of a private airstrip which would expose people in the area to unacceptable noise levels. Impacts are considered less than significant.

Finding 13 (Population and Housing)

The project will not have a significant impact on population and housing because the project will not displace people or housing. This project would not induce substantial population growth directly or indirectly. Impacts are considered less than significant.
Finding 14 (Public Services)

The project will not have a significant impact on public services. The services of fire protection, police protection, schools, parks, and other public facilities are sufficient to accommodate the proposed project. Impacts are considered less than significant.

Finding 15 (Recreation)

The project will not have a significant impact on recreation because it would not substantially increase the use of existing recreational facilities nor does the project include such facilities. Impacts are considered less than significant.

Finding 16 (Transportation/Traffic)

The project will not have a significant impact on transportation/circulation because it will not significantly increase traffic volumes on existing roads. The project will not change air traffic patterns. There is adequate access to the project site. Access roads will provide adequate emergency access to the project site. Alternative transportation plans will not be impacted. Impacts are considered less than significant.

Finding 17 (Tribal Cultural Resources)

The project will not have significant impact on cultural resources. State laws are in place in case of discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 18 (Utilities and Service Systems)

The project will not have a significant impact on utilities and service systems. The project can adequately be served by existing utilities and service systems. Impacts are considered less than significant.

Finding 19 (Mandatory Findings of Significance)

There is no substantial evidence in light of the whole record that the project may have a significant impact on the environment either cumulatively or individually. Impacts are considered less than significant.
Findings for General Plan Amendment

Finding 1 (Growth and Development)

The proposed General Plan Amendment can be considered consistent with the growth and development objectives of the General Plan because this proposal is consistent with the existing surrounding uses. The area consists of Industrial and Commercial uses. The project will integrate with the adjacent Industrial land use designations and “M” zoning south of the project site.

Finding 2 (Housing)

The proposed General Plan Amendment is consistent with the provision of adequate housing. The proposal will provide additional areas for industrial uses within a compatible use area. The proposal responds to local housing needs by changing the zoning for a proposed warehouse in a Commercial and Industrial area that is following the uses directly to the south and west.

Finding 3 (Agricultural Land)

The proposed General Plan Amendment does not affect the conservation of agricultural land. As discussed in Section II (Agriculture and Forest Resources) of the Initial Study, the project will not have a significant impact on agricultural land. This proposal will conserve, protect and preserve intensive agricultural land elsewhere in the unincorporated area while providing additional land for Industrial uses.

Finding 4 (Adequate Public Services and Facilities)

The proposed General Plan Amendment can be considered consistent with the General Plan because adequate public services and facilities exist to serve the project site. As discussed in Section XIV (Public Services) of the Initial Study, the project will not have a significant impact on public services such as fire, police, schools, and parks.

Finding 5 (Economic Development)

The proposed General Plan Amendment involves commercial or industrial development; therefore, it creates long term employment opportunities related to economic development. Construction contributes to a temporary economic development because local labor and supplies are often used that will fiscally enhance the economy.

Finding 6 (Circulation)

The project surrounding has similar residential and agricultural uses. The proposed General Plan Amendment is consistent with the Circulation Element of the General Plan. Adequate access to the project site will continue to be served by County roads.
Finding 7 (Open Space/Conservation)

This proposal can be considered consistent with the General Plan vision of protecting, preserving and providing for open space and resource conservation because the development is not proposed on agricultural preserve property. Future development at the site will not affect existing conservation areas because there are no conservation areas in the direct vicinity of the proposal.

Finding 8 (Water)

There will be sufficient water capacity for this proposed project. The proposed General Plan Amendment can be considered consistent with the General Plan in protecting water quality. The proposal would not exceed the existing water supply. Impacts on hydrology and water quality are further discussed within the Initial Study.

Findings for Zone Change

Finding 1

Development allowed under the proposed zone change will be subject to all local and state regulations including, but not limited to, Air Pollution Control District regulations, Public Works Department regulations, Health Department regulations, and Building Department regulations. The “M” Zoning District and its uses outlined in the Unified Development Code will be met.

Finding 2

The proposed zone change will implement the Glenn County General Plan and facilitate and guide growth in accordance with the General Plan. The proposed zone change will allow for uses which are compatible with the land use pattern of the area. The proposed zone change is in conformance with the Elements of the General Plan.

Finding 3

The proposed zone change will protect the social and economic stability of residential, commercial, industrial, resource production, and recreational activities within the County through the orderly, planned use of real property. The project is consistent with surrounding uses and zoning. All requirements of the “M” Zoning District will be met with approval of this proposal.
PASSED AND ADOPTED by the Planning Commission of the County of Glenn at a regular meeting thereof held on Wednesday, May 16, 2018, by the following vote:

AYES: Commissioner Costa, Commissioner Cawthra, Commissioner Amaro, Chair Carriere

NOES: None

ABSENT: Commissioner Olney

ABSTAIN: None

Existing General Plan Designation: “Rural Residential”

Proposed General Plan Designation: “Industrial”

Existing Zoning: “RE-5” (Rural Residential Estate Zone, 4.25-acre minimum parcel size)

Proposed Zoning: “M” (Industrial, 1-acre minimum parcel size)

Project Summary:

If the proposal is approved, the applicant has applied for a Site Plan Review (SPR 2017-018) to develop the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc.

The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code §15.440.020 (B) (13). The proposed warehouse requires an application for a Site Plan Review, which has been applied for concurrently and will be recommended for subsequent Director for approval.

Surrounding Land Uses and Setting:

Surrounding land uses and setting is further described in Section 2.1 below.

Other Public Agencies Whose Approval is Required (e.g. permits, financing approval, or participation agreement):

Other agencies may require permits that were not specifically listed or have yet to be recognized through the Initial Study and Glenn County permitting process. It is the responsibility of the applicant/agent to recognize and acquire any/all necessary permit approvals.

FINDINGS FOR NEGATIVE DECLARATION

An Initial Study has been prepared by the Glenn County Planning & Community Development Services. Based on this study, it is determined that the proposed project will not have a significant effect on the environment. The following Findings are made based on the Initial Study to support a Negative Declaration:

Finding 1 (Aesthetics)

The project will not have a significant impact on aesthetics because there are no scenic vistas or scenic resources in the area. The adopted standards for lighting and construction will minimize impacts from future development. The project is compatible with and similar to existing uses in the area. Impacts are considered less than significant.
Finding 2 (Agricultural and Forest Resources)

The project will not have a significant impact on agriculture or forest resources. Agricultural activities within the vicinity will not be adversely impacted by this project. There are no forest resources located within the vicinity of the project. Impacts are considered less than significant.

Finding 3 (Air Quality)

The project will not have a significant impact on air quality because the project will not violate air quality standards or contribute substantially to an existing air quality violation. Federal, state, and local standards and codes reduce any potential impacts to less than significant. Impacts are considered less than significant.

Finding 4 (Biological Resources)

The project will not have a significant impact on biological resources. The sensitive habitats or natural communities as defined by the Department of Fish and Wildlife or the U.S. Fish and Wildlife Service will not be adversely impacted by this project. Impacts are considered less than significant.

Finding 5 (Cultural Resources)

The project will not have significant impact on cultural resources. Historically, the project site has experienced agricultural uses, which disturbed the project surface and soils to varying depths. State laws are in place in case of accidental discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 6 (Geology and Soils)

The project will not have a significant impact on geology and soils because geologic hazards in the area are minimal and the building codes will require new construction to meet standards for soil conditions. New on-site sewage disposal systems will be required to meet the standards set forth in the Glenn County Code and by the Glenn County Environmental Health Department. Impacts are considered less than significant.

Finding 7 (Greenhouse Gas Emissions)

The project will not have a significant impact on global climate change as a result of greenhouse gas emissions. The project is not in conflict with existing guidelines or standards. The project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The project will not create significant changes in GHG emissions. Impacts are considered less than significant.
Finding 8 (Hazards and Hazardous Materials)

Hazards and hazardous materials will not have a significant impact on the environment as a result of the proposed project. The project will not interfere with an adopted emergency response plan nor expose people to risk of loss, injury, or death. Impacts are considered less than significant.

Finding 9 (Hydrology/Water Quality)

The project will not have a significant impact on hydrology and water quality because the project will not substantially deplete groundwater supplies or expose people or structures to a significant risk of loss, injury, or death involving flooding. The project will not violate water quality standards or waste discharge requirements. Impacts are considered less than significant.

Finding 10 (Land Use and Planning)

The project will not have a significant impact on land use and planning because the project would not physically divide an established community. The project site will meet the size and density requirements of the General Plan and Title 15 of the Glenn County Code. The project is consistent with the proposed Glenn County General Plan land use designation of “Industrial”. The project will not conflict with an existing habitat conservation plan or natural community conservation plan.

Finding 11 (Mineral Resources)

The project will not have a significant impact on mineral resources. The project would not have a significant impact on aggregate or natural gas resources. Impacts are considered less than significant.

Finding 12 (Noise)

The project will not have a significant impact on people residing or working in the area from excessive noise levels. Noise generating activities are required to meet the established standards prescribed by the County Code. The project site is not within an airport land use plan and not in the vicinity of a private airstrip which would expose people in the area to unacceptable noise levels. Impacts are considered less than significant.

Finding 13 (Population and Housing)

The project will not have a significant impact on population and housing because the project will not displace people or housing. This project would not induce substantial population growth directly or indirectly. Impacts are considered less than significant.
Finding 14 (Public Services)

The project will not have a significant impact on public services. The services of fire protection, police protection, schools, parks, and other public facilities are sufficient to accommodate the proposed project. Impacts are considered less than significant.

Finding 15 (Recreation)

The project will not have a significant impact on recreation because it would not substantially increase the use of existing recreational facilities nor does the project include such facilities. Impacts are considered less than significant.

Finding 16 (Transportation/Traffic)

The project will not have a significant impact on transportation/circulation because it will not significantly increase traffic volumes on existing roads. The project will not change air traffic patterns. There is adequate access to the project site. Access roads will provide adequate emergency access to the project site. Alternative transportation plans will not be impacted. Impacts are considered less than significant.

Finding 17 (Tribal Cultural Resources)

The project will not have significant impact on cultural resources. State laws are in place in case of discoveries made during future ground disturbing activities. Impacts are considered less than significant.

Finding 18 (Utilities and Service Systems)

The project will not have a significant impact on utilities and service systems. The project can adequately be served by existing utilities and service systems. Impacts are considered less than significant.

Finding 19 (Mandatory Findings of Significance)

There is no substantial evidence in light of the whole record that the project may have a significant impact on the environment either cumulatively or individually. Impacts are considered less than significant.

An Initial Study has been conducted for the proposed project, which revealed that the project would not have a significant impact on the environment. Negative Declaration status is therefore granted for this project and an Environmental Impact Report is thereby not necessary.
CHAPTER 1
INTRODUCTION

1.1 INTRODUCTION AND REGULATORY GUIDANCE

This Initial Study has been prepared by the County of Glenn to evaluate the potential impacts on the environment that could result from the implementation of the proposed project and to identify, if necessary, any mitigation measures that will reduce, offset, minimize, avoid, or otherwise compensate for significant environmental impacts.

This Initial Study has been prepared in accordance with the requirements of the California Environmental Quality Act (CEQA), encoded in Sections 21000 et seq. of the Public Resources Code (PRC) with Guidelines for Implementation codified in the California Code of Regulations (CCR), Title 14, Chapter 3, Sections 15000 et seq.

An initial study is conducted by a lead agency to determine if a project may have a significant effect on the environment [CEQA Guidelines §15063(a)]. If there is substantial evidence that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) must be prepared, in accordance with CEQA Guidelines §15064(a). However, if the lead agency determines that there is no substantial evidence that the project may have a significant effect on the environment, a Negative Declaration may be prepared [CEQA Guidelines §15064(f)(3)]. The lead agency prepares a written statement describing the reasons a proposed project would not have a significant effect on the environment and, therefore, why an EIR need not be prepared. This document conforms to the content requirements under CEQA Guidelines §15071.

Alternatively, a Mitigated Negative Declaration may be prepared if the Initial Study identifies a potentially significant effect for which the project’s proponent, before public release of a proposed Mitigated Negative Declaration, has made or agrees to make project revisions that mitigate the effects [CEQA Guidelines §15064(f)(2)].

Approval of the proposed project requires discretionary action by the County. According to CEQA Guidelines, a discretionary action or project must be reviewed by the lead agency, to determine its potential effects on the environment. Prior to preparation of the Initial Study, a Request for Review, which included a copy of the application and project description, was sent out by the County of Glenn to responsible and trustee state agencies, and local agencies and organizations to identify issues to be addressed in the Initial Study. Comments that were received were considered during the preparation of the Initial Study.

1.2 LEAD AGENCY

The lead agency is the public agency with primary approval authority over the proposed project. In accordance with CEQA Guidelines §15051(b)(1), "the lead agency will normally be an agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose." The lead agency for the proposed project is Glenn County Planning & Community Development Services.
The contact person for the lead agency to whom all inquiries and comments on this environmental document should be addressed is:

Andy Popper, Associate Planner
Glenn County Planning & Community Development Services
777 North Colusa Street, Willows, CA 95988
(530) 934-6540, (530) 934-6533 fax

1.3 SUMMARY OF FINDINGS

Chapter 3 of this document contains the Environmental (Initial Study) Checklist that identifies the potential environmental impacts (by environmental issue) and a brief discussion of each impact resulting from implementation of the proposed project.

In accordance with §15064(f)(3) of the CEQA Guidelines, a Negative Declaration shall be prepared if there is no substantial evidence that the project may have a significant effect on the environment. Based on the available project information and the environmental analysis presented in this document, there is no substantial evidence that the proposed project would have a significant effect on the environment. It is proposed that a Negative Declaration be adopted in accordance with the CEQA Guidelines.
CHAPTER 2
PROJECT DESCRIPTION

2.1 PROJECT DESCRIPTION

This Initial Study has been prepared for a General Plan Amendment, Zone Change, and a subsequent Site Plan Review for a vacant 5.0± acre parcel.

Pending approval of the General Plan Amendment and Zone Change, the applicant intends on developing the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc., which would not be a permitted use under the existing RE-5 zoning.

The applicant has applied for a General Plan Amendment from “Rural Residential” to “Industrial” and Zone Change from “RE-5” (Rural Residential Estate Zone, 4.25-acre minimum parcel size) to “M” (Industrial, 1-acre minimum parcel size). The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code §15.440.020.B.13. The warehouse also requires an application for a Site Plan Review, which has been applied for concurrently.

2.2 PROJECT LOCATION AND BOUNDARY

The project site is located on the east side of North Tehama Street (County Road 99W), south of County Road 48, west of County Road KK, and north of the City of Willows, within the unincorporated area of Glenn County, California. APN: 017-013-042 (5.0± acres).

2.3 PROJECT SETTING

The property generally consists of tilled and leveled ground, previously horse pasture. Properties within this area consist of existing industrial, commercial, agricultural, and rural residential uses.

There are several similar Industrial zoned parcels and uses south of the project site, as well as, commercially zoned parcels and uses to the west along County Road 99W.

The project site is relatively flat and generally slopes to the southeast. Elevation is approximately 130 feet above sea level.

Willow Creek and the Glenn Colusa Irrigation Canal are located to the east of the project site. There are no streams or ponds on the property. The project site is located within (adjacent to the border) the Sphere of Influence and the Urban Limit Line for the City of Willows. The City of Willows boundary is located approximately one half of a mile southwest of the project site.
The following table identifies the existing uses, General Plan designation and Zoning designations for the subject property and neighboring properties:

<table>
<thead>
<tr>
<th></th>
<th>Existing Uses</th>
<th>General Plan</th>
<th>Zoning Designations</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Topography in the area is relatively flat with a gentle slope. Parcels in the area are generally served by domestic wells and individual onsite sewage disposal systems. The project is compatible and consistent with the surrounding land uses.

2.4 PROJECT COMPONENTS

General Plan
The role of the General Plan is to establish the overall goals and vision for future phases of development and establish the land use characteristics and maximum development intensity permitted in the County for a given property. The subject parcel is currently designated as “Rural Residential” in the General Plan (General Plan, Volume I, Section 3.0.6).

Rural Residential
The Rural Residential classification is utilized to identify areas suitable for large lot, low density residential use that provide for development which is compatible with a rural character and lifestyle. Examples of uses which are considered appropriate under this classification include, but are not limited to, single-family residences, agricultural and domestic livestock farming on a limited scale, and home occupations.

Industrial
The Industrial classification is to provide for a range of manufacturing operations; the processing of natural resources; and the processing of agricultural products. The intent is to encourage appropriate industrial/manufacturing development that will be compatible with adjacent land uses and will not create adverse environmental impacts. Examples of uses which are be considered appropriate under this classification include, but are not limited to: light manufacturing uses; uses permitted in the Service Commercial category; fabrication shops; large warehouses; equipment storage yards; distribution sales; batch plants; lumber mills; auto wrecking, salvage and junk yards; fuel tank farms; and energy facilities.

Zoning
The proposed project will change the zoning of the property from “RE-5” (Rural Residential Estate Zone, 4.25-acre minimum parcel size) to “M” (Industrial). The “RE” and “M” zones are described within Glenn County Code Chapters 15.350 and 15.440 respectfully. The proposed General Plan Amendment and Zone Change will integrate with the adjacent Industrial land use designations and zoning located south of the project site. The zone change is compatible with existing zoning and land uses in the area.
CHAPTER 3
ENVIRONMENTAL CHECKLIST

PURPOSE OF THIS INITIAL STUDY

This Initial Study has been prepared consistent with CEQA Guidelines Section 15063, to determine if the project, as proposed, may have a significant effect upon the environment.

A significant impact is considered a substantial adverse effect, one that exceeds some critical and accepted threshold for negative environmental effects. CEQA defines a significant effect on the environment as “...a substantial, or potentially substantial, adverse (i.e., negative) change in any of the physical conditions within the area directly or indirectly caused by the Project, including effects on land, air, water, flora, fauna, ambient noise, and objects of historic or aesthetic “significance” (CEQA Guidelines, §15382). As recommended in the CEQA Guidelines, impacts are also identified as “potentially significant” prior to mitigation.

Mitigation Measures are measures to mitigate, avoid, or substantially lessen impacts identified as significant or potentially significant. According to CEQA, the term “mitigation measures” refers to those items that are in addition to standard conditions, uniform codes, or project features that may also reduce potential impacts.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a “Potentially Significant Impact” as indicated by the checklist, and corresponding discussion on the following pages.

| ☐ | Aesthetics | ☐ | Agriculture and Forestry Resources | ☐ | Air Quality |
| ☐ | Biological Resources | ☐ | Cultural Resources | ☐ | Geology/Soils |
| ☐ | Greenhouse Gas Emissions | ☐ | Hazards & Hazardous Materials | ☐ | Hydrology/Water Quality |
| ☐ | Land Use/Planning | ☐ | Mineral Resources | ☐ | Noise |
| ☐ | Population/Housing | ☐ | Public Services | ☐ | Recreation |
| ☐ | Transportation/Traffic | ☐ | Utilities/Service Systems | ☐ | Mandatory Findings of Significance |
DETERMINATION:
On the basis of this initial evaluation:

- [x] I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

- [ ] I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

- [ ] I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

- [ ] I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

- [ ] I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Andy Popper, Associate Planner
April 2018
I. AESTHETICS

<table>
<thead>
<tr>
<th>Would the project:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant Impact With Mitigation Incorporated</th>

<tr>
<td>d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

a) Would the project have a substantial adverse effect on a scenic vista?

**Less Than Significant Impact.** A scenic vista is defined as a viewpoint that provides expansive views of a highly valued landscape for the benefit of the general public. The project site generally consists of a field. There are no designated scenic vistas on or adjacent to the project site. The surrounding topography is generally flat with a gentle slope. The project site itself is not a notably visible or scenic vista within the County. Surrounding properties consist of industrial, commercial, agricultural, and rural residential uses. It is concluded that there will be a less than significant impact.

b) Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

**No Impact.** Scenic resources are defined as those landscape patterns and features that are visually or aesthetically pleasing and that, therefore, contribute affirmatively to the definition of a distinct community or region. Scenic areas, open spaces, rural landscapes, vistas, and other factors interact to produce a net visual benefit upon individuals or communities. Those visual resources that uniquely contribute to that public benefit are scenic resources under CEQA.
The proposed project would not remove scenic resources such as buildings (historic or otherwise), rock outcroppings, or trees within a state scenic highway. There are no unique scenic resources or structures located at the project site. The roadways in Glenn County are not listed as Eligible or as Officially Designated Scenic Highways according to the California Department of Transportation.\(^1\) The project will not damage scenic resources in the area. Therefore, it is concluded that there will be no impact.

c) **Would the project substantially degrade the existing visual character or quality of the site and its surroundings?**

**Less Than Significant Impact.** Properties within this area primarily consist of industrial, commercial, and agricultural uses.

The surrounding land uses and setting are further described in Section 2.3. The project proposes a General Plan Amendment, Zone Change, and subsequent Site Plan Review for a vacant 5.0± acre parcel. The Industrial zone provides standards for the height and placement of future structures to ensure the visual quality of the area (Glenn County Code Chapter 15.440). There are several similarly zoned parcels south of the project site, and Service Commercial Zoning on the west side of County Road 99W. These parcels have been developed with Industrial and Commercial structures and uses. The project is compatible and consistent with the surrounding land uses. The visual character of the area will not significantly change. It is concluded that there will be a less than significant impact on the existing visual character or quality of the site and its surroundings as a result of this project.

d) **Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?**

**Less Than Significant Impact.** The area surrounding the project site has existing levels of ambient lighting predominately from surrounding uses and vehicle headlights on roads. Future development include new lighting. New development will not create a new source of substantial light or glare that would adversely affect existing day or nighttime views in the area. Installation of all future lighting will be required to conform to the Glenn County Code. Glenn County Code §15.560.080 (Glare and Heat) states the following: *All exterior lighting accessory to any use shall be hooded, shielded or opaque. No unobstructed beam of light shall be directed beyond any exterior lot line.* New exterior lighting will be required to be hooded to reduce glare and retain light to limited areas. Additionally, the light shall not be directed beyond the property lines. It is concluded that there will be a less than significant impact.

---

II. AGRICULTURE AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

a) Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?
Less Than Significant Impact. The California Department of Conservation, Division of Land Resource Protection, Farmland Mapping and Monitoring Program (FMMP), tracks and categories land with respect to agricultural resources. Farmland is classified according to its ability to support crops or livestock. In Glenn County, land is designated as one of the following and each has a specific definition: Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, Farmland of Local Potential, Grazing Land, Urban and Built-Up Land, Other Land and Water.

Based on the 2016 FMMP map, the entire project site is designated as other land. Other land is land not included in any other mapping category. Common examples include low density rural developments, brush, timber, wetland, and riparian areas not suitable for livestock grazing, confined livestock, poultry, or aquaculture facilities, strip mines, borrow pits, and water bodies smaller than 40 acres. Vacant and nonagricultural land surrounded on all sides by urban development and greater than 40 acres is mapped as other land.² The majority of the land within the valley area of Glenn County is classified as either Prime Farmland or Farmland of Statewide Importance.

The project site consists of a field previously used as a horse pasture. It is concluded that there will be a less than significant impact.

b) Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

Less Than Significant Impact. The project site is not subject to an agricultural contract under the Williamson Act. Properties within this area consist of industrial, commercial, and agricultural uses.

The parcel would be zoned M, which is similar to existing uses in the area; therefore, there will be a less than significant impact on existing zoning for agricultural use or a Williamson Act contract.

c) Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

No Impact. The proposed project will not conflict with existing zoning for, or cause rezoning of, forestland, timberland, or timberland zoned Timberland Production. The project site is not zoned for forestland or timberland nor is it adjacent to land that is zoned for forestland or timberland. The “FA” Foothill Agricultural/Forestry Zone and “TPZ” Timberland Preserve Zone (Chapters 15.320 and 15.450 of the Glenn County Code) are meant to protect timber and forest lands.

Areas zoned “FA” and “TPZ” are located within the Mendocino National Forest in the western part of Glenn County. Therefore, it is concluded that the project will have no impact.

d) Would the project result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. Forest land is defined in Public Resources Code section 12220(g) as land that can support 10-percent native tree cover of any species, including hardwoods, under natural conditions, and that allows for management of one or more forest resources, including timber, aesthetics, fish and wildlife, biodiversity, water quality, recreation, and other public benefits. This project will not result in the loss of forestland as the project site does not contain forestland. Therefore, there will be no impact as a result of this project.

e) Would the project involve other changes in the existing environment, which due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

Less Than Significant Impact. This project will not involve a change of agricultural-related uses on surrounding parcels. Impacts to agricultural resources or forest land have been discussed above. It is concluded that there will be a less than significant impact.
III. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.

<table>
<thead>
<tr>
<th>Would the project:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Conflict with or obstruct implementation of the applicable air quality plan?</td>
<td>☐</td>
<td>☐</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?</td>
<td>☐</td>
<td>☐</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?</td>
<td>☐</td>
<td>☐</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>d) Expose sensitive receptors to substantial pollutant concentrations?</td>
<td>☐</td>
<td>☐</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>e) Create objectionable odors affecting a substantial number of people?</td>
<td>☐</td>
<td>☐</td>
<td>☑</td>
<td>☐</td>
</tr>
</tbody>
</table>

The Air Quality section addresses the impacts of the proposed project on ambient air quality and the exposure of people, especially sensitive individuals, to unhealthful pollutant concentrations. The primary air pollutants of concern for which ambient air quality standards (AAQS) have been established are ozone (O₃), carbon monoxide (CO), course inhalable particulate matter (PM₁₀), fine inhalable particulate matter (PM₂.₅), sulfur oxides (SOₓ), nitrogen dioxide (NO₂), and lead (Pb). Geographic areas are classified under the federal and California Clean Air Act as either attainment or nonattainment for each criteria pollutant based on whether the AAQS have been achieved.

a) Would the project conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant Impact. Air quality standards are set at both the federal and state levels. The Glenn County Air Pollution Control District (GCAPCD) is responsible for the planning and maintenance/attainment of these standards at the local level. The GCAPCD sets operational rules and limitations for businesses that emit significant amounts of criteria...
pollutants. The GCAPCD is supervised by the U.S. Environmental Protection Agency. Under the federal Clean Air Act, local air quality districts must produce and implement plans for cleaning up any pollutant that exceeds federal standards.

Local air districts are not able to enact rules that restrict "mobile sources" including cars, trucks, locomotives, and other vehicles. Only "stationary sources" of air pollution fall under their control. Mobile sources are regulated by the California Air Resources Board.

The proposal will not conflict with or obstruct implementation of an applicable air quality plan. The Air Quality section of the Glenn County General Plan establishes mitigation measures designed to reduce particulate matter (PM) and ozone precursors in the ambient air as a result of emissions from sources that attract or generate motor vehicle activity.

Glenn County lies within the Sacramento Valley Air Basin (SVAB). The SVAB includes Shasta, Tehama, Glenn, Butte, Colusa, Yolo, Solano (north-east portion), Sacramento, Sutter, Placer (south-east portion), and Yuba (south-east portion) counties. The entire air basin is currently designated as nonattainment for the State 24-hour and the annual particulate matter (PM10) standards. A “nonattainment” area is defined as a geographic area in which the level of a criteria air pollutant is higher than the level allowed by the federal and state standards.

Glenn County is designated as being nonattainment for the particulate matter (PM10) California ambient air quality standards and is designated either as attainment or unclassified for the remaining criteria pollutants. Pursuant to the California Clean Air Act of 1988, an updated 2012 Air Quality Attainment Plan has been prepared for the Northern Sacramento Valley Planning Area (NSVPA). The NSVPA Districts have committed to jointly prepare and adopt the uniform air quality attainment plan for the purpose of achieving and maintaining healthful air quality throughout the air basin. The 2012 Plan addresses the progress made in implementing the 2009 Plan and proposes modifications to the strategies necessary to attain the California ambient air quality standard for the 8-hour ozone at the earliest practicable date. The 2012 Plan identifies those portions of the NSVPA designated as “non-attainment” for the State ambient air quality standards and discusses the health effects related to the various air pollutants. The Plan identifies the air pollution problems, which are to be cooperatively addressed on as many fronts as possible in order to make the region a healthier place to live now and in the future. The Plan focuses on the adoption and implementation of control measures for stationary sources, area wide sources, and indirect sources, and addresses public education and information programs. The 2012 Plan also addresses the effect that pollutant transport has on the ability of the NSVPA to meet and attain the state standards.

The project would not significantly contribute to air quality impacts during future construction and operation. All future development is to comply with the requirements of the GCAPCD.

---

An increase in vehicle trips would result with additional development on the property, which would increase pollutants, but the increase is anticipated to have a less than significant impact on air pollution standards.

Future development at the sites would generate short-term emissions related to the construction phase of the project; however, these emissions would be relatively short in duration. Particulate matter emissions can be expected to occur during the construction phase. The project area would be watered during construction for dust control. Construction will also produce exhaust emissions with transport of workers and machinery to and from the site as well as operation of equipment on-site. All engines used shall be maintained in compliance with the U.S. Environmental Protection Agency (USEPA) and the California Air Resources Board engine standards. The project would not significantly contribute to air quality impacts during future construction. All future development is to comply with the requirements of the GCAPCD. Given this information, it is concluded that there will be a less than significant impact on air pollution standards or an applicable air quality plan.

b) Would the project violate any air quality standard or contribute substantially to an existing or projected air quality violation?

Less Than Significant Impact.

See Section III a) above.

c) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

Less Than Significant Impact.

See Section III a) above.

Each project with emissions falling under regulatory standards must individually comply with the Glenn County Air Pollution Control District regulations. When adopting the General Plan, the Glenn County Board of Supervisors adopted a Statement of Overriding Considerations finding that the unavoidable impact to air quality could be overridden because any project would represent a cumulative impact and that the General Plan employed all feasible mitigations. In addition, each project would be required to utilize the best available control technology to mitigate impacts to air quality.
d) **Would the project expose sensitive receptors to substantial pollutant concentrations?**

**Less Than Significant Impact.** Neither California statutes nor regulations define “sensitive receptors” but this term normally refers to locations where uses and/or activities result in increased exposure of persons more sensitive to the unhealthful effects of emissions (such as children, the elderly, and the like). Examples of receptors include schools, hospitals, churches, and residential areas. The proposed project would not expose sensitive receptors to substantial pollutant concentrations.

The proposed project consists of a change of land use designation in a generally commercial and industrial area. The project is compatible to the surrounding land uses and will not result in substantial pollutant concentrations.

All future uses at the site shall comply with applicable local, state and federal laws and regulations regarding contaminants and pollutants (Glenn County Code §15.560.040). This requirement includes, but is not limited to, emissions of suspended particles, carbon monoxide, hydrocarbons, odors, toxic or obnoxious gases and fumes. Glenn County Air Pollution Control District regulations manage uses that may generate pollutants. It is concluded that there will be a less than significant impact as a result of this project.

e) **Would the project create objectionable odors affecting a substantial number of people?**

**Less Than Significant Impact.** Odors are generally labeled as a nuisance and not a health risk to a community. Land uses primarily associated with odor complaints include: water transfer and recycling stations, wastewater treatment plants, landfills, composting operations, petroleum operations, food and byproduct processes, factories, and agricultural activities, such as livestock operations. These uses are not proposed with this project.

The proposed project consists of a change of land use designation and a proposed warehouse. The project is compatible and consistent with the surrounding land uses. The project would not be a source of odors because future construction would be consistent with existing and surrounding uses. The project would not directly result in the creation of objectionable odors.

All future uses at the site shall comply with applicable local, state and federal laws and regulations regarding contaminants and pollutants (Glenn County Code §15.560.040). This requirement includes, but is not limited to, emissions of suspended particles, carbon monoxide, hydrocarbons, odors, toxic or obnoxious gases and fumes. Glenn County Air Pollution Control District regulations manage uses that may generate objectionable odors. It is concluded that there will be a less than significant impact.

**Regulatory Background**

**Special-Status Species**
Special-status species include those plants and wildlife species that have been formally listed, are proposed as endangered or threatened, or are candidates for such listing under the federal Endangered Species Act (ESA) or California Endangered Species Act (CESA). These acts afford protection to both listed and proposed species. In addition, California Department of Fish and Wildlife (CDFW) Species of Special Concern, which are species that face extirpation in California if current population and habitat trends continue, U.S. Fish and Wildlife Service (USFWS) Birds
of Conservation Concern, and CDFW special-status invertebrates are all considered special-status species. Although CDFW Species of Special Concern generally have no special legal status, they are given special consideration under the California Environmental Quality Act (CEQA). In addition to regulations for special-status species, most birds in the United States, including non-status species, are protected by the Migratory Bird Treaty Act of 1918. Under this legislation, destroying active nests, eggs, and young is illegal. Plant species on the California Native Plant Society (CNPS) Rare and Endangered Plant Inventory (Inventory) with California Rare Plant Ranks (Rank) of 1 and 2 are also considered special-status plant species and must be considered under CEQA. Rank 3 and Rank 4 species are afforded little or no protection under CEQA.

**Waters of the United States**

The U.S. Army Corps of Engineers (Corps) regulates “Waters of the United States” under Section 404 of the Clean Water Act. Waters of the U.S. are defined in the Code of Federal Regulations (CFR) as waters susceptible to use in commerce, including interstate waters and wetlands, all other waters (intrastate waterbodies, including wetlands), and their tributaries (33 CFR 328.3). Potential wetland areas, according to the three criteria used to delineate wetlands as defined in the *Corps of Engineers Wetlands Delineation Manual*[^4], are identified by the presence of (1) hydrophytic vegetation, (2) hydric soils, and (3) wetland hydrology. Areas that are inundated at a sufficient depth and for a sufficient duration to exclude growth of hydrophytic vegetation are subject to Section 404 jurisdiction as “other waters” and are often characterized by an ordinary high water mark. Other waters, for example, generally include lakes, rivers, and streams. The placement of fill material into Waters of the U.S. generally requires an individual or nationwide permit from the Corps under Section 404 of the Clean Water Act.

**Waters of the State**

The term “Waters of the State” is defined by the Porter-Cologne Act as “any surface water or groundwater, including saline waters, within the boundaries of the state.” The Regional Water Quality Control Board (RWQCB) protects all waters in its regulatory scope and has special responsibility for wetlands, riparian areas, and headwaters. These waterbodies have high resource value, are vulnerable to filling, and are not systematically protected by other programs. RWQCB jurisdiction includes “isolated” wetlands and waters that may not be regulated by the Corps under Section 404. Waters of the State are regulated by the RWQCB under the State Water Quality Certification Program, which regulates discharges of fill and dredged material under Section 401 of the Clean Water Act and the Porter-Cologne Water Quality Control Act. Projects that require a Corps permit, or fall under other federal jurisdiction, and have the potential to impact Waters of the State, are required to comply with the terms of the Water Quality Certification determination. If a proposed project does not require a federal permit, but does involve dredge or fill activities that may result in a discharge to Waters of the State, the RWQCB has the option to regulate the dredge and fill activities under its state authority in the form of Waste Discharge Requirements.

Streams, Lakes, and Riparian Habitat
Streams and lakes, as habitat for fish and wildlife species, are subject to jurisdiction by CDFW under Sections 1600-1616 of California Fish and Wildlife Code. Alterations to or work within or adjacent to streambeds or lakes generally require a 1602 Lake and Streambed Alteration Agreement. The term “stream”, which includes creeks and rivers, is defined in the California Code of Regulations (CCR) as “a body of water that flows at least periodically or intermittently through a bed or channel having banks and supports fish or other aquatic life [including] watercourses having a surface or subsurface flow that supports or has supported riparian vegetation” (14 CCR 1.72). In addition, the term “stream” can include ephemeral streams, dry washes, watercourses with subsurface flows, canals, aqueducts, irrigation ditches, and other means of water conveyance if they support aquatic life, riparian vegetation, or stream-dependent terrestrial wildlife.\(^5\) “Riparian” is defined as “on, or pertaining to, the banks of a stream.” Riparian vegetation is defined as “vegetation which occurs in and/or adjacent to a stream and is dependent on, and occurs because of, the stream itself”.\(^6\) Removal of riparian vegetation also requires a Section 1602 Lake and Streambed Alteration Agreement from CDFW.

a) **Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?**

Less Than Significant Impact.

Properties within this area consist of industrial, commercial, agricultural, and rural residential uses. The surrounding land uses and setting are further described in Section 2.3. The project site is located north of the City of Willows. The site fronts along County Road 48. The project site consists of approximately 5 acres. The majority of the existing parcel consists of previous horse pasture. The project site has been subjected to grading, disk, and re-contouring associated with past uses. There are several similar parcels south of the project site on the east side of County Road 99W. The parcel adjacent to the south is a trucking company.

This project will not have a substantial adverse effect on species identified as a candidate, sensitive, or special status species. The California Natural Diversity Database (CNDDB) is a positive-sighting database managed by the California Department of Fish and Wildlife (CDFW).\(^7\) According to the CNDDB, no sensitive species have been known to be located within the project site or surrounding area. The project site is not within an area of special biological importance as shown on Figure 3-14 of Volume I of the General Plan.\(^8\)

---

\(^5\) California Department of Fish and Game. 1994. *A Field Guide to Lake and Streambed Alteration Agreements, Sections 1600-1607, California Fish and Game Code*. Environmental Services Division, Sacramento, CA.

\(^6\) California Department of Fish and Game. 1994. *A Field Guide to Lake and Streambed Alteration Agreements, Sections 1600-1607, California Fish and Game Code*. Environmental Services Division, Sacramento, CA.

\(^8\) Quad Consultants. June 15, 1993. *Glenn County General Plan, Volume I, Policy Plan*, Figure 3-14.
Many of the plant and wildlife species occur in specialized habitats, such as riparian, wetlands, marshes, ponds, and other aquatic habitats. As discussed below in the next sections, the project site does not contain and is not considered, associated with, or located within the vicinity of any riparian habitat, wetlands, or other sensitive natural community.

In addition, the following records were searched and no special status species have been identified within the project site:
- U.S. Fish and Wildlife Service (USFWS) Critical Habitat Mapper
- California Native Plant Society (CNPS) Electronic Inventory
- Aerial photographs

Birds and other animals can continue to forage in the surrounding area. No endangered plant species are known to exist within the project site due to long-term disturbance. The project does not include activities that would adversely affect fisheries because the site is not located near major watercourses.

It is concluded that the project will have a less than significant impact on species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service.

b) Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or US Fish and Wildlife Service?

**Less Than Significant Impact.** According to the Glenn County General Plan, riparian communities formerly occupied extensive stands within Glenn County; however, current riparian communities are principally located along the Sacramento River, Willow Creek, and Walker Creek.\(^9\) The project site is not located within the vicinity of these water courses.

According to the California Central Valley Wetlands and Riparian GIS data sets of the California Department of Fish and Wildlife\(^10\), the project site does not contain riparian areas. The project site is adjacent near a “Riverine” to the north, however it will not be disturbed by this project.

The project site is not located near the twelve important biological areas defined in Table 2-5 of Volume III of the General Plan.\(^11\) These important biological areas are mostly located within the riparian zones of the Sacramento River.

---

The project site is not located within an area of special biological importance as shown on Figure 3-14 of Volume I of the General Plan.\(^\text{12}\) The project does not involve changes to the physical environment, which would alter or destroy sensitive natural communities. It is concluded that there would be a less than significant impact on riparian habitat or other sensitive natural community.

c) **Would the project have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?**

**Less Than Significant Impact.** According to the Confined Animal Facilities Element of the Glenn County General Plan, wetlands comprise approximately 4,000 acres of Glenn County, and include marshes, ponds, fringes of small lakes, sloughs, and swamps. The largest wetland assemblages occur within the Sacramento River floodplain, including the managed wetlands of the Sacramento National Wildlife Refuge. Wetlands may also be found in areas with suitable soil and hydrologic conditions.\(^\text{13}\)

Since the 1970s, the U.S. Army Corps of Engineers and the U.S. Environmental Protection Agency have used the following definition for wetlands for regulatory purposes: “Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.”

According to the National Wetlands Inventory of the U.S. Fish and Wildlife Service\(^\text{14}\), the project site does not contain wetlands, there is a “Riverine” to the north of the project site. According to the California Central Valley Wetlands and Riparian GIS data sets of the California Department of Fish and Wildlife\(^\text{15}\), the project site is not designated as a protected wetland site. The project will not directly remove, fill, interrupt the hydrology of, or otherwise affect federally protected wetlands. Therefore, it is concluded that there will be a less than significant impact on federally protected wetlands as a result of this project.

d) **Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?**

\(^\text{13}\) Quad Knopf. May 2005. *Confined Animal Facilities Element of the Glenn County General Plan*, Section 2.4, Biological Resources.

\(^\text{15}\) California Department of Fish and Wildlife. *California Central Valley Wetlands and Riparian GIS Data Sets*: https://www.dfg.ca.gov/biogeodata/gis/clearinghouse.asp.
Less Than Significant Impact. According to the Glenn County General Plan, there is a large expanse of deer range located in the western portion of the County next to the Mendocino National Forest. Major migration corridors are located in the western part of the County. Based on the project’s location in the center portion of the County, there will be a less than significant impact on migration corridors.

Glenn County is located within the Pacific Flyway; a migratory corridor for birds moving between their winter and summer ranges. Winter waterfowl habitat is located within and surrounding the Sacramento National Wildlife Refuge, which is located in the southern part of the County. Many of these birds are protected by the Migratory Bird Treaty Act which prohibits killing, possessing, or trading in migratory birds except in accordance with regulations prescribed by the United States Secretary of the Interior. The project would have no impact on migratory waterfowl and other birds migrating through the region because the project does not include features, which would draw migratory fowl to the immediate area.

The project does not involve new activities on previously undisturbed ground. The project would not alter or destroy migratory wildlife corridors. The project would not significantly impede migratory wildlife corridors. The proposed project would have a less than significant impact upon the movement of any native or migratory wildlife species.

e) Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact. The proposed project would not create a conflict with local policies or ordinances protecting biological resources because there are none within the area of the project. Therefore, it is concluded that there will be no impact.

f) Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The proposed project would not create a conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan or other approved local, regional, or state habitat conservation plan because no plans have been adopted for this specific area. Therefore, it is concluded that there will be no impact.

</tbody>
</table>

Cultural resources include prehistoric and historic period archeological sites; historical features, such as rock walls, cemeteries, water ditches and flumes, and architectural features. Cultural resources consist of any human-made site, object (i.e., artifact), or feature that defines and illuminates the past.

a) Would the project cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?

b) Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Less Than Significant Impact. In compliance with CEQA Guideline §15064.5 (Determining the Significance of Impacts to Archaeological and Historical Resources), a request for a records search was submitted to the Northeast Information Center (NEIC), a member of the California Historic Resources Information System (CHRIS), to determine if any cultural places are located within the project site.

Prehistoric Resources

According to the records of the NEIC, no sites of this type have been recorded in the project area or vicinity; however, unrecorded prehistoric cultural resources may be located in the project area.
Historic Resources
According to the records of the NEIC, no sites of this type have been recorded in the project area or vicinity. The NEIC stated that unrecorded historic cultural resources may be located in the project area.

The NEIC has recommended that a cultural resources survey of the project site be conducted because the project site appears to be located in an area considered to be sensitive for prehistoric and historical resources and based on the lack of prior survey in the project area. The project site has experienced land leveling, which have repeatedly disturbed the project surface and soils to varying depths. Similar projects have had archeological surveys completed prior to construction yielding no historical resources due to past surface disturbance. The project site consists of pasture where the land has frequently been disturbed therefore, a cultural resources survey was not made a requirement for this project.

Based on the information provided above, it is concluded that the impact is less than significant.

c) Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less Than Significant Impact.
See Section V a) b) above.

d) Would the project disturb any human remains, including those interred outside of formal cemeteries?

Less Than Significant Impact. The majority of the project site is graded. The potential exists during construction to possibly uncover previously unidentified resources. Future development would be required to comply with the required procedures of conduct following the accidental discovery of human remains as mandated in the Health and Safety Code Section 7050.5, Public Resources Code Section 5097.98 and the California Code of Regulations Section 15064.5(e)(CEQA). Section 7050.5 of the California Health and Safety Code states that if human remains are found during construction activities, all operations are to cease until the County coroner has determined that the remains are not subject to the provisions of law concerning investigation of the circumstances in the manner provided in Section 5097.98 of the Public Resources Code. Based on this information, it is concluded that there is a less than significant impact.

</tbody>
</table>
a) Would the project expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

ii) Strong seismic ground shaking?

**Less Than Significant Impact.** Fault rupture occurs when an active fault displaces in two separate directions during an earthquake. Concern about the growing number of structures located on or near active and potentially active faults led the State of California to enact the Alquist-Priolo Geologic Hazard Zone Act of 1972. The Act was revised in 1975 and renamed the Alquist-Priolo Special Studies Zone Act. Sudden surface rupture from severe earthquakes can cause extensive property damage, but even the slow movement known as “fault creep” can cause displacement that results in offset or disfiguring of curbs, streets, and buildings.

According to the Glenn County General Plan, Glenn County is in a relatively inactive seismic area. There are no Alquist-Priolo Special Studies Zones within the County. During the past 100 years, the County has experienced only minor earthquakes within its boundaries and secondary impacts from earthquakes centered out of the area. Projections of future impacts are low to moderate. A construction in the County is required to meet the standard set by the California Building Code (CBC).

According to the Glenn County General Plan, the highest historic intensity rating for an earthquake affecting Glenn County is VII as measured by the Modified Mercalli Intensity Scale. The CBC establishes standards for structures to survive earthquakes of an intensity of VII with little or no damage. The CBC also classifies all of Glenn County as being within a Seismic Risk Zone 3. Seismic risk zones are based, in part, on the distribution of earthquakes and the Modified Mercalli Intensity Scale rating of known earthquakes. A Seismic Risk Zone 3 requires that special precautions be taken, in accordance with the CBC, during construction to avoid or minimize earthquake damage.

The United States Geologic Survey (USGS) and California Geologic Survey (CGS) produced a Seismic Shaking Hazards in California map (revised April 2003), which depicts the peak ground acceleration (pga) percentage that has a 10% potential of

---

occurring in the next fifty years.\textsuperscript{19} Glenn County, as well as areas on the west side of the central valley, are rated as 10\%-30\% on a scale of 0\%-100\%. Additionally, no earthquake greater than a magnitude 5.5 has occurred in Glenn County in over 200 years.\textsuperscript{20}

The seismic history of Glenn County shows the area to be generally stable. Glenn County’s stability can be correlated with its location away from tectonic plate boundary convergence/divergence and its location away from major active faults with high slip rates. Given this data, seismic related activities such as rupture of known earthquake faults and strong seismic ground shaking would have a less than significant impact on people and structures in the area of the project.

\textbf{iii) Seismic-related ground failure, including liquefaction?}

\textbf{Less Than Significant Impact.} Liquefaction is defined as the transformation of a granular material from a solid state into a liquefied state as a consequence of increased pore water pressure. Ground shaking resulting from an earthquake is capable of providing the mechanism for liquefaction.

Due to the lack of seismic activity in Glenn County, it is unlikely that liquefaction or other ground failure of this type would occur. Liquefaction generally occurs in low-lying areas with saturated soils and its effects are commonly observed near water bodies. Soils with a loose structure, such as sand, are more susceptible to liquefaction when saturated.

Depending on the level of saturation, soils at the project areas may be subject to liquefaction during strong shaking in a seismic event. However; since 1800, there have been no recorded earthquakes in Glenn County above a magnitude 5.5. The Earthquake Shaking Potential for California map published by the California Geologic Survey in 2008 indicates that Glenn County is in an area that only will experience lower levels of ground shaking.\textsuperscript{21} Further, the California Geologic Survey does not list Glenn County as an area where seismic activity affects soil stability. It is concluded that there is a less than significant impact.

Also see a) i-ii) above.

\textsuperscript{19} United States Geological Survey and California Geologic Survey. \textit{Seismic Shaking Hazards in California}. \url{http://www.consrv.ca.gov/cgs/rghm/psha/Pages/pga.aspx}.

\textsuperscript{20} California Department of Conservation, California Geologic Survey. \textit{Map 49, California Earthquakes, 1800-2000}. \url{http://www.consrv.ca.gov/CGS/rghm/quakes/Pages/index.aspx}.

iv) **Landslides?**

**No Impact.** Landslides include phenomena that involve the downslope displacement and movement of material, either triggered by static (gravity) or dynamic (earthquake) forces. Areas susceptible to landslides are typically characterized by steep, unstable slopes in weak soil or bedrock units. The highest potential for landslides exists in the western portion of the County. Figure 4-2 of Volume II of the General Plan depicts the project areas as being in an area of least landslide potential.\(^2\) The topography of the project areas is relatively flat; therefore, they are not susceptible to slope failures and landslides. It is concluded that there will be no impact.

Also see Section VI. a) i) above.

b) **Would the project result in substantial soil erosion or the loss of topsoil?**

**Less Than Significant Impact.** Soil erosion occurs through either water or wind action. Erosion by water includes sheet, rill, ephemeral gully, classical gully, and streambank erosion. The project site is relatively flat and has been graded in the past to accommodate the existing use of the site. Severe erosion typically occurs on moderate slopes of sand and steep slopes of clay subjected to concentrated water runoff. These topographic conditions do not exist at the site.

Disruption of soils on the site is not expected to create significant soil erosion due to the flat topography. All future construction at the site is required to conform to the Glenn County Code, which includes Glenn County Code Section 15.700 (Leveling of Land-Drainage Changes).

If future development disturbs more than one acre, the development would be subject to the National Pollutant Discharge Elimination System (NPDES) General Construction Activities Storm Water permit program regulated by the Regional Water Quality Control Board. This program requires implementation of erosion control measures during and immediately after construction that are designed to avoid significant erosion during the construction period. The NPDES construction permit requires implementation of a Storm Water Pollution Prevention Program (SWPPP) that includes storm water best management practices to control runoff, erosion, and sedimentation from the site both during and after construction. The SWPPP must be obtained prior to any soil disturbance activities.

The project would therefore not result in substantial soil erosion or the loss of topsoil. Codified standards are in place for any future development. It is concluded that there will be a less than significant impact.

---

c) Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

**Less Than Significant Impact.** The project will have a less than significant impact on soil involving unstable soils that may result in landslides, lateral spreading, subsidence, liquefaction, or collapse. Soils and the geology of the project area is generally stable because of the area’s seismic stability and low relief (see Section VI. a) i) above).

**On or Off-Site Landslide**

Landslide potential in the County generally correlates with relief. Landslides are not a threat because the project area is not located in an area with a great amount of relief. Figure 4-2 of Volume II of the General Plan shows that the project area is in an area of least landslide potential.23

**Lateral Spreading**

There is a low probability for lateral spreading to occur because of the area’s seismic stability. All future construction is required to meet the standards set by the California Building Code, which will reduce impacts from lateral spreading.

**Subsidence**

Land subsidence is a gradual settling or sudden sinking of the Earth's surface owing to subsurface movement of earth materials. The principal causes of subsidence are aquifer-system compaction, drainage of organic soils, underground mining, hydrocompaction, natural compaction, sinkholes, and thawing permafrost.24

According to the Glenn County General Plan, potential subsidence areas occur in the eastern portion of the County where extensive groundwater withdrawals have occurred.25 Extraction of natural gas reservoirs located in these same areas may also contribute to local subsidence of the land surface.

There are no known areas of subsidence within Glenn County at this time. The problem is potentially a widespread one, affecting the entire valley floor. All future construction is required to meet the standards set by the California Building Code, which will reduce impacts from subsidence.

**Liquefaction/Collapse**

Liquefaction occurs when loosely packed sandy or silty materials saturated with water are shaken hard enough to lose strength and stiffness. Liquefied soils behave like a liquid and

---

are responsible for damage during an earthquake, causing pipes to leak, roads and airport runways to buckle, and building foundations to be damaged. There is a low probability for liquefaction and ground collapse to occur because of the area’s seismic stability. Future construction in compliance with the California Building Code will reduce impacts from liquefaction and collapse.

There is no record of any incidents of unstable geologic units in the project area. Based on the information provided above, it is concluded that there will be a less than significant impact.

d) Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

**Less Than Significant Impact.** Expansive soils are those that shrink or swell with the change in moisture content. The volume of change is influenced by the quantity of moisture, by the kind and amount of clay in the soil, and by the original porosity of the soil. According to Figure 4-5 of Volume II of the Glenn County General Plan, most of Glenn County has high expansive soils. Soils containing a high clay content often exhibit a relatively high potential to expand when saturated, and contract when dried out. This shrink/swell movement can adversely affect building foundations, often causing them to crack or shift, with resulting damage to the buildings they support.

There would be no substantial risks to life or property from this project because all future development will require compliance with the California Building Code (CBC) to avoid potential unstable earth conditions or changes in geologic substructures. As part of the building permit process for future structures, the Glenn County Building Division will ensure that the foundations of all new structures are adequately designed for the shrink/swell characteristics of expansive soils and no significant impacts to life or property are expected. An engineer will be required to design the footings for all future structures to address this soil condition. CBC compliance reduces potential impacts from expansive soils to less than significant. Therefore, it is concluded that there is a less than significant impact.

e) Would the project have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

**Less Than Significant Impact.** Currently, the project area relies solely on the use of septic tanks for the disposal of wastewater, as there is no sewer system available in the area of the project. The closest sewer system is located within the City of Willows. The project site does not currently have an onsite sewage disposal system.

---

New sewage disposal systems are required to comply with applicable provisions of Chapters 15.660 and 07.100 of the Glenn County Code and by the Glenn County Environmental Health Department.

Glenn County Environmental Health Department has reviewed the project and provided comments regarding existing statutes, and therefore, are not made Conditions of Approval for the project.

“The parcel will be re-zoned from “Rural Residential” (RE-5, 4.25-acre minimum parcel size) to “Industrial” (M, 1-acre minimum parcel size) and is not planned to have city services. A properly permitted and installed sewage disposal system and water well would be required before an approved development permit could be approved.”

“Soil testing for this property was provided on April 11th, 2007. The soil is very poor and Glenn County Environmental Health has requested percolation testing be done by an engineer for any sewage disposal system on the property.”

Based on the information provided above, it is concluded that the impact is less than significant.
VII. GREENHOUSE GAS EMISSIONS

<td>b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

Legislative/Regulatory

The Governor of California signed Executive Order S-3-05 (EO), in June 2005, which established statewide reduction targets for greenhouse gases. The EO states that emissions shall be reduced to 2000 levels by 2010, to 1990 levels by 2020, and by 2050 reduced to 80 percent of the 1990 levels. Assembly Bill 32, the California Global Warming Solutions Act, 2006 (AB 32), was signed into law in September 2006. AB 32 finds that global warming poses a serious threat to the economic wellbeing, public health, natural resources, and the California environment. It establishes a state goal of reducing greenhouse gas emissions to 1990 levels by the year 2020, which would be a 25 percent reduction from forecasted emission levels.

Senate Bill 97 (SB 97) was approved by the Governor of California in August 2007. SB 97 requires the Governor’s Office of Planning and Research (OPR) to prepare, develop, and transmit guidelines to the Resources Agency for the feasible mitigation of greenhouse gas emissions or the effects of greenhouse gas emissions, as required by CEQA. In April 2009, OPR submitted to the Secretary for Natural Resources its proposed amendments to the CEQA Guidelines for greenhouse gas emissions, as required by Senate Bill 97 (Chapter 185, 2007). The Natural Resources Agency (Resources Agency) conducted formal rulemaking prior to certifying and adopting the amendments, as required by Senate Bill 97. The Resources Agency adopted the proposed amendments, and transmitted the amendments to the Office of Administrative Law on December 31, 2009. The Office of Administrative Law reviewed the Adopted Amendments and the Natural Resources Agency’s rulemaking file. The Adopted Amendments were filed with the Secretary of State, and became effective March 18, 2010.

These CEQA Guidelines amendments provide guidance to public agencies regarding the analysis and mitigation of the effects of greenhouse gas emissions in draft CEQA documents. The greenhouse gas guidelines fit within the existing CEQA framework by amending existing Guidelines to reference climate change.

Greenhouse gases (GHGs), as defined by the Health and Safety code, include but are not limited to water vapor, carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), ozone (O₃), and chlorofluorocarbons (CFCs) (Health and Safety Code §38500 et seq.). These gases all act as effective global insulators, reflecting back to earth visible light and infrared radiation.
GHGs are present in the atmosphere naturally, released by natural sources, or formed from secondary reactions taking place in the atmosphere. In the last 200 years, substantial quantities of GHGs have been released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere, enhancing the natural greenhouse effect, which is believed to be causing global warming. While manmade GHGs include carbon dioxide (CO\(_2\)), methane (CH\(_4\)), nitrous oxide (N\(_2\)O), some (like CFCs) are completely new to the atmosphere.

Natural sources of carbon dioxide (CO\(_2\)) include respiration (breathing) of animals and plants and evaporation from the oceans. Together, these natural sources release about 150 billion tons of CO\(_2\) each year, outweighing the seven billion tons of manmade emissions from fossil fuel burning, waste incineration, deforestation, and cement manufacture. Natural removal processes such as photosynthesis by land and ocean-dwelling plant species is under pace with input of manmade CO\(_2\), and consequently the gas is building up in the atmosphere.

Methane (CH\(_4\)) is produced when organic matter decomposes in environments lacking sufficient oxygen. Natural sources include wetlands, termites, and oceans. Manmade sources include the mining and burning of fossil fuels, digestive processes in ruminant animals such as cattle, rice paddies, and the burying of waste in landfills. Total annual emissions of CH\(_4\) are about 500 million tons, with manmade emissions accounting for the majority. The major removal process of atmospheric methane – chemical breakdown in the atmosphere – cannot keep pace with source emissions, and CH\(_4\) concentrations in the atmosphere are increasing.

a) Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

**Less Than Significant Impact.** This project will not generate enough GHG emissions to significantly influence global climate change. A project participates in potential climate change by its incremental contribution (positive or negative) of GHG emissions that, when combined with the cumulative increase of all other natural and anthropogenic sources of GHGs, impact global climate change. Therefore, global climate change is a type of cumulative impact and a project’s participation in this cumulative impact is through its incremental contribution of GHG emissions.

As discussed in Section III above, the project is to construct a warehouse. Future construction would generate air emissions during construction activities, some of which may be greenhouse gases. However, construction activities would be temporary. It is anticipated that these emissions would not prevent the state from reaching its GHG reduction targets.

Based on the analysis provided above, it is concluded that the proposed project would have a less than significant impact on emissions of GHG’s and climate change.

---

b) Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less Than Significant Impact. See discussion in section VII a) above. AB 32 is the State of California’s primary GHG emissions regulation. The project would not conflict with the state’s ability to achieve the reduction targets under AB 32. Impacts are anticipated to be less than significant.
VIII. HAZARDS AND HAZARDOUS MATERIALS

<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

a) Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?
Less Than Significant Impact. The California Health and Safety Code defines a Hazardous Material as “any material that because of its quantity, concentration, or physical or chemical characteristics poses a significant present or potential hazard to human health and safety or the environment if released into the workplace or environment”. Thus, hazardous material is a broad term for all substances that may be hazardous (there is no single list) and includes hazardous substances and hazardous wastes. Substances that are flammable, corrosive, reactive oxidizers, radioactive, combustible, or toxic are considered hazardous. Examples include: oil, fuels, paints, thinners, cleaning solvents, compressed gasses (acetylene, carbon dioxide, oxygen, nitrogen, etc.), radioactive materials, and pesticides.

The Glenn County Air Pollution Control District (GCAPCD) is the Administering Agency and the Certified Unified Program Agency (CUPA) for Glenn County with responsibility for regulating hazardous materials handlers, hazardous waste generators, underground storage tank facilities, above ground storage tanks, and stationary sources handling regulated substances. The storage and handling of hazardous materials are closely monitored by the GCAPCD.

The project site is subject to Glenn County Code §15.560.070 for fire and explosion hazards. This section states: All uses involving the use or storage of combustible, explosive, caustic or otherwise hazardous materials shall comply with all applicable local, state and federal safety standards and shall be provided with adequate safety devices against the hazard of fire and explosion, and adequate fire-fighting and fire suppression equipment.

Although residential uses do not typically use or store large quantities of hazardous materials, potentially hazardous materials such as fuels, lubricants, and solvents would be used during construction on the project site. The transport, use, and storage of hazardous materials during construction would be subject to and therefore conducted in accordance with all applicable state and federal laws, such as the Hazardous Materials Transportation Act, Resource Conservation and Recovery Act, the California Hazardous Material Management Act, and the California Code of Regulations, Title 8 and Title 22. Based on the information provided above, it is concluded that there will be a less than significant impact.

b) Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant Impact.
Refer to subsection VIII a) above.

All uses involving the storage and handling of hazardous materials would be closely monitored by the GCAPCD, which is the CUPA for Glenn County. Housing construction indirectly resulting from the implementation of the project would not normally involve significant hazardous emissions or require handling of hazardous or acutely hazardous materials, substances, or waste. Local, state, and federal regulations for use and handling
of hazardous materials will reduce impacts to the public and the environment. Therefore, it is concluded that there will be a less than significant impact.

c) Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

No Impact. The proposed project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. There are no schools located within one-quarter mile of the project site. There are no proposed schools within the vicinity of the project site. Therefore, it is concluded that there will be no impact as a result of this project.

d) Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. The project is not located on a site which is included on a list of hazardous materials sites compiled pursuant to California Government Code §65962.5. According to the database of cleanup sites provided through the California Department of Toxic Substance Control (DTSC), there are no cleanup sites within the vicinity of the project. Therefore, it is concluded that there will be no impact.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

No Impact. The project site is located approximately 1.5 miles northeast of the Willows-Glenn County Airport and it is located outside of the adopted airport land use planning boundary. This airport is the closest public use airport in the vicinity of the project site. The project site is not located within the overflight safety areas, clear zone safety areas, or approach zone safety areas for this airport. The project would not result in a safety hazard for people residing or working in the project area. Therefore, it is concluded that there is no impact.

f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

No Impact. There are no private airports or private airstrips located within the vicinity of the project. After a review of topographic maps and aerial photos, no private airstrips were identified within the vicinity of the project.

The project would not result in a safety hazard for people residing or working in the project area. Therefore, it is concluded that there is no impact.

g) **Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?**

**Less Than Significant Impact.** The project would not substantially interfere with an adopted emergency response or evacuation plan. All emergency roads in the area would remain open. The project site is located on private property with adequate access to county roads. The project will not interfere with adjacent roadways that may be used for emergency response or evacuation. The project will not prohibit subsequent plans from being established or prevent the goals and objectives of existing plans from being carried out.

Designated emergency evacuation routes in the event of flood or dam failure are listed in Section 3.7 of Volume II of the Glenn County General Plan. This list of roads includes the state highways and arterial and collector roads within the County. The project does not have frontage along one of the designated evacuation routes. The project does not pose a unique or unusual use or activity that would impair the effective and efficient implementation of an adopted emergency response or evacuation plan. The project will not obstruct or compromise the safety of emergency response vehicles or aircraft and their ability to effectively respond in an emergency. Therefore, it is concluded that there is a less than significant impact.

h) **Would the project expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?**

**No Impact.** The proposed project would not expose people or structures to a significant risk of loss, injury or death involving wildland fires because there are no wildlands surrounding the project site. The project site is not located within or adjacent to a State Responsible Area (SRA) managed by the California Department of Forestry and Fire Protection (CAL FIRE); therefore, the site is not ranked by CAL FIRE. According to Figure 3-2 of Volume II of the Glenn County General Plan, the project site is not located within a fire hazard severity zone. The most severe wildland fires occur in the western portion of the County within the Mendocino National Forest. It is concluded that there will be no impact on the project from wildland fires.

---

<td>j) Inundation by seiche, tsunami, or mudflow?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
</tbody>
</table>
a) Would the project violate any water quality standards or waste discharge requirements?

No Impact. The proposed project will not violate water quality standards or waste discharge requirements. There is no integrated sewer system in the project area. The project site relies on individual sewage disposal systems for wastewater treatment. Future development will utilize an on-site sewage disposal system and will be required to comply with Glenn County Environmental Health Department standards. Any future uses that require waste discharge to land will be required to comply with Central Valley Regional Water Quality Control Board regulations. Therefore, it is concluded that there will be no impact as a result of this project.

b) Would the project substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

Less Than Significant Impact. The proposed project would not substantially deplete groundwater supplies or interfere substantially with groundwater recharge. According to the Glenn County General Plan, the eastern portion of Glenn County overlies the Sacramento Valley Groundwater Basin, which contains abundant supplies of high quality groundwater to depths of 800 feet.33

The project site consists of vacant land. The project proposes to construct a warehouse on “M” Industrial Zone. The project would rely on an individual well.

According to the US EPA, the average American family of four uses 400 gallons of water per day. On average, approximately 70 percent of that water is used indoors, with the bathroom being the largest consumer (a toilet alone can use 27 percent). Standard toilets use 1.6 gallons per flush, while older toilets can use as much as 3.5 to 7 gallons per flush.34 The 2013 California Green Building Code Water Use Modifications states that a new three-bedroom single family home with four occupants is modeled to use 174,000 gallons of water per year. The majority being for landscaping. The largest indoor use is by showers. Future residential uses must comply with standard green building and energy efficiency standards. Consistent with the CBC and Title 24 Energy Code standards, the incorporation of green building measures, as applicable for a residence, would reduce energy and water consumption. Water uses associated with future development is not anticipated to substantially increase from existing levels and will not include heavy uses of water; therefore, would not have a significant impact upon groundwater decline.

Irrigation water is currently used to support agricultural uses in the vicinity of the project. Irrigation of agricultural fields has been considered a major contributor to groundwater recharge. Soils in the project area allow a moderate amount of water to percolate through. Groundwater in the area is recharged it appears, in part, by the irrigation of field crops in the surrounding areas. Groundwater recharge in the project area will potentially continue to take place as crops are irrigated. Therefore, it is concluded that there will be a less than significant impact on groundwater supplies and groundwater recharge as a result of this project.

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

**Less Than Significant Impact.** Drainage at the project site slopes slightly to the southeast. There will not be a significant increase in surface runoff, which would result in erosion or siltation on- or off-site. No streams or rivers flow through the project site. The project site is relatively flat and has been previously graded and leveled. All future construction at the site is required to conform to the Glenn County Code, which includes Glenn County Code Section 15.700 (Leveling of Land-Drainage Changes) and Glenn County Code Section 15.560.060 (Erosion Control). It is concluded that there will be a less than significant impact.

d) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

**Less Than Significant Impact.** See discussion in Section IX. c) above.

The proposed project site is relatively flat. There are no streams or rivers located on the site. Given that the drainage pattern of the project site will not substantially change as a result of this project, there will be no substantial increase in surface runoff, which would result in flooding on- or off-site. Therefore, it is concluded that there will be a less than significant impact.

e) Would the project create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

**Less Than Significant Impact.** The project would not create or contribute runoff water, which would exceed the current capacity. The proposed project should not in itself create hydraulic, hydrology, and water quality impacts to drainage facilities; however, commercial development of the site will increase impervious surface area through the construction of driveways and buildings with a corresponding increase in surface water (storm water) runoff. Commercial development will be designed to ensure that there is no direct or indirect increase of runoff or backwater effects.
It is the developer’s responsibility to ensure that runoff from the project site will meet all Regional Water Quality Control Board standards. This may be accomplished with the implementation of Best Management Practices such as detention/retention ponds or basins, on-site storage, and vegetated swales. The project will not generate substantial additional sources of polluted runoff. Therefore, it is concluded that there will be a less than significant impact.

f) Would the project otherwise substantially degrade water quality?

**Less Than Significant Impact.**
See Sections IX. a) c) d) and e) above. The project does not involve activities or use materials that could otherwise have significant potential to degrade surface or groundwater quality.

g) Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

**Less Than Significant Impact.** The project property is in Flood Zones “X” according to Flood Insurance Rate Map (FIRM) No. 06021C 0612D, dated August 5, 2010, issued by the Federal Emergency Management Agency (FEMA).

Flood Zone “X” (shaded) is a moderate flood hazard area and consists of areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood. It is concluded that there will be a less than significant impact due to the property being within Flood Zone “X”.

h) Would the project place within a 100-year flood hazard area structures which would impede or redirect flood flows?

**Less Than Significant Impact.** The project site is not located within 300 feet of a state designated floodway or regulated stream; therefore, the project site is not subject to obtaining an encroachment permit from the Central Valley Flood Protection Board for new construction.

The project site is not located adjacent to a levee that could fail and cause flooding. Willow Creek is located approximately .50 miles northeast of the project site. There are no other creeks or streams within the vicinity of the project.

Black Butte Reservoir dam is located northwest of the City of Orland. Black Butte Reservoir was constructed for flood control purposes. Dam failure is a possibility, but is
not an immediate danger given the seismic stability of the region and the rarity for this hazard to occur. In the unlikely event of dam failure, the Glenn County Sheriff’s Department and emergency personnel would initiate the Glenn County Emergency Operations Plan. The plan would take effect immediately, outline evacuation routes, and begin the evacuation process. In addition, Glenn County’s Multi-Jurisdictional Hazard Mitigation Plan shows that the project site is located outside of the dam failure inundation area. It is concluded that there will be a less than significant impact.

j) Would the project be subject to inundation by seiche, tsunami, or mudflow?

No Impact. A seiche is a surface wave created when a body of water is shaken, usually by earthquake activity. Seiches are potentially hazardous when the wave action created in lakes or swimming pools is strong enough to threaten life and property. Tsunamis are large ocean waves generated by major seismic events and mudflows are landslide events in which a mass of saturated soil flows downhill as a very thick liquid.

There would be no impact on the project site from inundation by seiche or tsunami because the project area is not located near large bodies of water that would pose a seiche or tsunami hazard. Intensive mudflows occur in areas with steep terrain, heavy rain, and loose soils. The site is not located near steep terrain, mountains, or steep slopes that would pose a mudflow hazard. Therefore, it is concluded that there will be no impact.
X. **LAND USE AND PLANNING**

<table>
<thead>
<tr>
<th>Would the project:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant with Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Physically divide an established community?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
<tr>
<td>b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
<tr>
<td>c) Conflict with any applicable habitat conservation plan or natural community conservation plan?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
</tbody>
</table>

**a) Would the project physically divide an established community?**

*No Impact.* The proposed project is not of the scale or nature that could physically divide an established community. The project would not block a public street, trail, or other access route or result in a physical barrier that would divide a community. The project will not physically divide an established community. It is concluded that there will be no impact as a result of this project.

**b) Would the project conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?**

*Less Than Significant Impact.* The project would not conflict with an applicable land use plan, policy, or regulation of an agency with jurisdiction over the project. Therefore, no significant impacts are anticipated. There would not be conflicts between the proposed zoning district and proposed General Plan land use designation for each site, and no conflicts between the project and the rest of the General Plan and zoning ordinance.

All future development is required to meet the policies set forth in Title 15 of the Glenn County Code, regarding allowable uses and development standards, including setbacks, lot coverage, open space, and parking.

This project is consistent with and will not conflict with the proposed “M” zoning designation. All future uses at the project site would be developed consistent with the General Plan land use goals and policies and the zoning code. There are similar parcels.
south of the project site on both sides of N Tehama. The project is compatible and consistent with the surrounding land uses and zoning.

As defined in the California Planning Guide: An Introduction to Planning in California\textsuperscript{35}, spot zoning is defined as the zoning of an isolated parcel in a manner, which is inconsistent or incompatible with surrounding zoning or land uses. The project is compatible and consistent with the surrounding land uses and zoning; therefore, it is not considered spot zoning. This project will not create conflict with policies, and regulations have been identified. Therefore, impacts would be less than significant.

c) **Would the project conflict with any applicable habitat conservation plan or natural community conservation plan**

**No Impact.** There are no adopted habitat conservation plans, natural community conservation plans, or local, regional, or state habitat conservation plans that include the project area. As a result, there will be no impact.

---

XI. MINERAL RESOURCES

<table>
<thead>
<tr>
<th>Would the project:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
<tr>
<td>b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

The purpose of the Mineral Resources section is to identify and evaluate the potential for the project to adversely affect the availability of known mineral resources. The mineral resources of concern include metals, industrial minerals (e.g., aggregate, sand and gravel), oil and gas, and geothermal resources that would be of value to the region and residents of the State of California.

Notable mineral resources in Glenn County include natural gas and construction grade aggregate material. In addition, published reports indicate past attempts to exploit deposits of chromite, molybdenite and copper. Primary areas for gravel extraction occur along Stony Creek and the Sacramento River, although there are other pockets of gravel scattered throughout the County.

Several gas fields contribute to a significant quantity of natural gas production in Glenn County. Of these, the Malton-Black Butte field located on the border with Tehama County in eastern Glenn County, and the Willows-Beehive Bend field located in southeastern Glenn County account for nearly 80 percent of total gas production in the County. No oil or geothermal resources have been discovered in the County.

Mining in Glenn County was primarily related to the extraction of strategic minerals during World Wars I and II. The extraction of chrome and manganese essentially ended in the late 1940s with the loss of government demand and subsidies. 36

a) Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

b) Would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

**Less Than Significant Impact.** According to the California Department of Conservation, the project site is not located within a Mineral Resource Zone, which are areas that have a high likelihood of containing significant aggregate deposits.  

Mineral extraction activities are not present at the project site and there is no indication that such activities have occurred on the project site in the past.

Glenn County does not contain oil or geothermal fields but contains several natural gas fields. Additionally, no oil or geothermal resources have been discovered in the County. The project site does not lie within a natural gas field or known reserve and no natural gas wells have been located within the project vicinity.

No locally-important mineral resource recovery sites are located on or near the project site. Therefore, no significant impacts to mineral resources are anticipated. It is concluded that the project would have a less than significant impact on mineral resources.

---

XII. NOISE

<table>
<thead>
<tr>
<th>Would the project result in:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>

<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
<tr>
<td>e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
<tr>
<td>f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
</tbody>
</table>

a) Would the project result in exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less Than Significant Impact. The Glenn County General Plan Noise Element provides a basis for local policies to control and abate environmental noise, and to protect the citizens of Glenn County from excessive noise exposure. The County also enforces its Noise Ordinance (Chapter 15.560.100) in the County Code. This ordinance contains noise level standards for residential and non-residential land uses. Future uses at the project site will be required to operate in a manner that meets the noise level standards.
No persons would be exposed to and noise levels would not be generated in excess of standards established in the Glenn County General Plan or noise ordinance. The project site is located in an area with existing industrial and commercial uses and zoning. The surrounding land uses and setting are further described in Section 2.3. The noise environment in the vicinity of the project is primarily influenced by roadway traffic, commercial activities and agricultural operations.

Future development would temporarily increase noise levels in the project vicinity during the construction period. Construction activities, including site clearing, excavation, grading, building construction, and paving, would be considered an intermittent noise impact throughout the construction period of the project. Noise levels would fluctuate depending upon construction activity, equipment type, and duration of use, and the distance between noise source and receiver. Glenn County Code §15.160.100 states that construction site sounds between 7:00 a.m. and 7:00 p.m. are exempt from local noise standards. These hours are so defined because they include a period of time where noise sensitivity is at its lowest. Trucks and/or loaders may create groundborne vibrations, but none that are excessive. Vibrations are regulated by Glenn County Code §15.560.130, which states that no use shall generate ground vibrations which are perceptible without instruments beyond the lot line. Ground vibration caused by motor vehicles, aircraft, temporary construction work or agricultural equipment are exempt from the vibration performance standard as stated under Glenn County Code §15.560.130. Temporary noise generated during construction would not be a significant impact.

Noise impacts associated with on-site activities and traffic is not anticipated to exceed the area’s existing ambient noise levels. Future development at the project site would be subject to policies in the General Plan and to development standards set forth by the Glenn County Code to minimize noise impacts. No significant increase in noise is anticipated as a result of this project. Based on the aforementioned information, it is concluded that there will be a less than significant impact.

b) Would the project result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact. The proposed project would not generate excessive groundborne vibrations. Vibrations are regulated by Glenn County Code §15.560.130, which states that no use shall generate ground vibrations which are perceptible without instruments beyond the lot line. Ground vibration caused by motor vehicles, aircraft, temporary construction work or agricultural equipment are exempt from the vibration performance standard as stated under Glenn County Code §15.560.130. Since the duration of construction impact would be temporary and would occur during less sensitive daytime hours (i.e., between 7:00 a.m. and 7:00 p.m.), the impact from construction-related groundborne vibration and groundborne noise is considered less than significant.

c) Would the project result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?
Less Than Significant Impact. The primary contributors to the existing noise environment within and adjacent to the project site include nearby trucking businesses, vehicle traffic along roadways, and agricultural uses. It is anticipated that noise levels will continue to remain similar or less than significantly increase than current levels. No substantial increase in ambient noise levels in the project vicinity will result. Therefore, impacts are concluded to be less than significant. Also see Section XII a) and b) above.

d) Would the project result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

Less Than Significant Impact. There may be periodic increases in noise during future construction activities. Construction-related noises between the hours of 7 A.M. and 7:00 P.M. are exempt from the local noise standards per Glenn County Code §15.560.100(F)(5). Construction-related noise levels at other times are regulated by the above-referenced County Code section. No significant increase in noise is anticipated as a result of this project. Therefore, impacts are concluded to be less than significant. Also see Section XII a) and b) above.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. The project site is located approximately 1.5 miles northeast of the Willows-Glenn County Airport and it is located outside of the adopted airport land use planning boundary. This airport is the closest public use airport in the vicinity of the project site. The project site is not located within the overflight safety areas, clear zone safety areas, or approach zone safety areas for this airport. This airport would not expose people in the project area to excessive noise levels. Therefore, there would be no impact on people working or residing in the project area from noise levels generated from public airports.

f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. There are no private airports or private airstrips located within the vicinity of the project site. After a review of topographic maps and aerial photos, no private airstrips were identified within the vicinity of the project. Therefore, it is concluded that there will be no impact to people working or residing in the project area from excessive noise levels generated by a private airstrip.

---

### XIII. POPULATION AND HOUSING

<table>
<thead>
<tr>
<th>Would the project:</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>

<td>☒</td>
</tr>
<tr>
<td>c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
</tbody>
</table>

Population impacts are often associated with substantial increases in population from a project. Housing impacts may result directly from the construction of new housing units or indirectly from changes in housing demand associated with new non-residential development, such as office, manufacturing, and industrial uses that increase employment in an area.

a) **Would the project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?**

   **Less Than Significant Impact.** The proposed project would not directly or indirectly induce substantial population growth. The project site currently consists of one parcel zoned RE-5 and is vacant. The project proposes to rezone the parcel Industrial and construct a warehouse. No new residences are being proposed. New businesses and/or the extension of roads that may lead to significant population growth are not included with this project. The proposed project would not induce substantial population growth directly or indirectly. Therefore, it is concluded that there will be a less than significant impact on population growth.

b) **Would the project displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?**

c) **Would the project displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?**

   **No Impact.** The proposal would not displace existing housing or people within the area of the project. Construction of replacement housing would not be necessary with this proposal. Therefore, it is concluded that there will be no impact.
XIV. PUBLIC SERVICES

<table>
<thead>
<tr>
<th></th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>i) Fire protection?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>

<tr>
<td>v) Other public facilities?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i) Fire protection?

Less Than Significant Impact. Glenn County is primarily serviced by volunteer fire protection districts. The community of Hamilton City and the City of Willows are the only areas that have paid firefighter personnel. The project site is served by the Willows Rural Fire Protection District. The project site is located in a developed area with existing residential uses and access to public streets. Response time would not be affected by the proposed project. All future development will be required to meet fire and building codes for fire safety and emergency access. Compliance with building and fire codes will be determined by the Building Inspection Division. All of the fire protection regulations of the affected fire district shall be complied with. As a result, the project would not create significant demand for fire protection services to the extent that new fire facilities must be constructed to provide added protection capacity. It is concluded that there will be a less than significant impact on fire protection as a result of this project.
ii) Police protection?

**Less Than Significant Impact.** Law enforcement for unincorporated portions of Glenn County, including the project site, is provided by the Glenn County Sheriff’s Department. The Glenn County Sheriff’s office is located in the City of Willows and a substation is located in the City of Orland. The California Highway Patrol is responsible for patrolling all interstate and state highways (including Interstate 5). Transportation routes to the project site are adequate for law enforcement to reach the area in the event of an emergency. Response time would not be affected by the proposed project. This project is not anticipated to require the staffing of additional peace officers or the purchase of additional equipment to support law enforcement activities. The project will not generate additional population in the area and therefore would not require additional police surveillance over existing conditions. Based on this information, it is concluded that the project would have a less than significant impact on police protection.

iii) Schools?

**Less Than Significant Impact.** The project site lies within the Willows Unified School District. All future development at the site will be required to pay school fees associated with construction at the time of issuance of each building permit. Under Section 65996 of the California Government Code, the payment of such fees is deemed to mitigate the impacts of new development on school facilities. Therefore, it is concluded that the project would have a less than significant impact on schools.

iv) Parks?

**Less Than Significant Impact.** Glenn County has several parks and recreational facilities owned and maintained by federal, state, and local governments and special districts. The closest parks located near the project site are located within the City of Willows. The proposed project would not have a significant impact on a government’s ability to maintain its parks and no significant demands on the current facilities would be generated by this proposal. The project will not generate additional population to the area and therefore will not result in the need for additional parkland. As a result, there will be a less than significant impact.

v) Other public facilities?

**Less Than Significant Impact.** The proposed project may have incremental increases on demands for other public services and facilities; however, this would be a less than significant impact. The project will not generate additional population to the area and therefore will not have a need for public facilities such as libraries, postal service, hospitals, etc. Public agencies have reviewed this proposal for impacts to public services and facilities and a potentially significant impact has not been identified for this proposed project. Therefore, it is concluded that there is a less than significant impact to other public facilities.
XV. RECREATION

<table>
<thead>
<tr>
<th></th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?</td>
<td>[ ]</td>
<td>[ ]</td>

<td>[ ]</td>
</tr>
<tr>
<td>b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?</td>
<td>[ ]</td>
<td>[ ]</td>
<td>[ ]</td>
<td>[ ]</td>
</tr>
</tbody>
</table>

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

No Impact. Glenn County has several parks and recreational facilities owned and maintained by federal, state, and local governments and special districts. The closest parks located near the project site are located within the City of Willows. There are no park facilities within the immediate area of the project. The project would not induce population growth and therefore would not increase the use of existing neighborhood, regional, or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. Therefore, it is concluded that there will be a less than significant impact.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

No Impact. The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, there will be no impact from the proposed project.
## XVI. TRANSPORTATION/TRAFFIC

<table>

### Glenn County Roads Overview:

The major north-south road is Interstate 5 (I-5), which provides major connection between Glenn County and major cities to the north, such as Red Bluff and Redding, and to the south to cities such as Sacramento. East of I-5, Routes 32 and 162 are the major east-west roads. Route 32 provides a connection through Orland to Chico, the closest of the major urban areas of California to Glenn County residents. To the south, approximately 2 miles, Highway 162 provides a similar connection to Oroville. The next major east-west road to the south is Highway 20 (approximately 23 miles south of Highway 162), which provides a connection to the Yuba City-Marysville area.
Highway 45 is the only major north-south road east of I-5. It serves adjoining land uses as well as providing a connection between State Routes 32, 162, and 20.

State Route 162 is the only state route west of I-5. The route originally began at Highway 101 in Mendocino County and continued into Glenn County, but a 70-mile break currently exists (34 miles of which is in Mendocino County and 36 miles in Glenn County). The intermediate mileage is a seasonal road owned and maintained by Mendocino and Glenn Counties. This travel corridor is the only east-west route between I-5 and Highway 101 between State Routes 20 and 36, a distance of approximately 75 miles.

The jurisdictions responsible for public roads within Glenn County include the County of Glenn, incorporated cities (Orland, Willows), the State of California, and the U.S. Forest Service.

a) Would the project conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?

**Less Than Significant Impact.** The project will not conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system.

The project site has frontage along County Road 48 to the north and N Tehama Street to the west. Traffic in the area of the project is related to agricultural and rural residential uses. The rural areas of Glenn County experience a wide array of agricultural related traffic. Additional vehicle traffic as a result of this project would not have a significant impact on current access roads or nearby connecting roads.

County roads in the area of the project have limited attraction with low traffic volumes of pedestrians, bicyclists, and leisure drivers due to the sparse local population and distance from urban areas.

The development of a warehouse will increase vehicle trips coming to and from the site compared to existing vehicle trips; however, the increase in traffic is not anticipated to have a significant impact. The increase in traffic would not be substantial in relation to the existing traffic volumes or road capacities.

According to the Institute of Transportation Engineers, a detached single-family residence averages 9.53 weekday vehicle trips. If two residences were constructed at the project site on the proposed parcels, this would potentially result in 19.06 vehicle trips per day during weekdays. The increase in vehicle trips from the existing zoning and the proposed industrial use would have a less than significant impact on traffic. Vehicle trips related to

---

future construction of the site will be generally short in duration and will not have a significant impact on traffic.

The additional vehicle trips per day would fall within the expected traffic volumes. The increase is not substantial based on roadway capacity. The increase in traffic will not exceed applicable county standards and guidelines for Level of Service on streets near the site. Consequently, it is concluded that there will be a less than significant impact on transportation and traffic.

b) Would the project conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

Less Than Significant Impact. The project site has access from County Road 48. Project related traffic would not adversely affect the level of service that currently exists on the aforementioned road. Therefore, it is concluded that there will be a less than significant impact as a result of this project.

c) Would the project result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

No Impact. The proposed project would not result in a change in air traffic patterns that would result in safety risks. The project is not dependent upon air transport related materials, labor, or services, and would therefore not result in increases of air traffic levels or changes in air traffic locations. No project design feature will obstruct air traffic patterns. Therefore, it is concluded that there will be no impact as a result of this project.

d) Would the project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Less Than Significant Impact. The proposed project would not substantially increase traffic hazards due to a design feature or incompatible uses. The project does not include potentially hazardous design features such as sharp curves or dangerous intersections. Roads in the area of the project are straight, two-lane roads in a relatively flat rural area. The project will not render existing features of nearby roadways hazardous. The project will not be incompatible with other uses of nearby roadways. The project site fronts along County Road 48, which will provide adequate ingress and egress.

All future work or traffic control that would encroach onto the County Right-of-Way will require an encroachment permit from Glenn County (Glenn County Code §15.120). The Glenn County Engineering & Surveying Division has reviewed the proposed project with regard to roads serving the project site. Based on the aforesaid information, it is concluded that there will be a less than significant impact.
e) Would the project result in inadequate emergency access?

**Less Than Significant Impact.** There will be adequate emergency access to the project site and the project will not inhibit emergency vehicle access to surrounding parcels. The project site fronts along County Road 48. Emergency services agencies have been contacted and have no objections to the proposal. The site will be accessible to fire, ambulance, and law enforcement vehicles. Future development at the site may temporarily impact emergency access adjacent to the project area as vehicles and equipment are brought on- and off-site during development. However, any such interruptions would be extremely localized and limited in duration and would cease upon completion of improvements. It is concluded that there will be a less than significant impact on emergency access.

f) Would the project conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?

**No Impact.** The project will not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities. Glenn County has a deviated fixed bus system (Glenn Ride). There are no stops located in the immediate vicinity of the project site. This project will not conflict with plans, policies or programs related to the transit system. There are no bicycle or pedestrian facilities located within the vicinity of the project. It is concluded that the project will have no impact.
XVII. TRIBAL CULTURAL RESOURCES

a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or

ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.
i) and ii) No Impact.

The proposed project will not cause a substantial adverse change in the significance of a tribal cultural resource, as defined in Public Resources Code section 21074. A request for project review was sent to the Northeast Information Center of the California Historical Resources Information System. According to their records, there are no prehistoric or historic resources in the project area or vicinity. Therefore, no significant adverse impacts are identified or anticipated.

<td>g) Comply with federal, state, and local statutes and regulations related to solid waste?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### a) Would the project exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

**Less Than Significant Impact.** The proposed project will not exceed wastewater treatment requirements of the Regional Water Quality Control Board. There is no municipal wastewater treatment facility proposed with this project. The project site relies on individual sewage disposal systems for wastewater treatment. Future development must comply with requirements of the Regional Water Quality Control Board. It is concluded that there will be no impact.
b) **Would the project require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?**

**No Impact.** The project will not require new water or wastewater treatment facilities. The project will not require or result in new or expanded facilities, which could cause significant environmental effects. There is no wastewater treatment provider serving the project area. On-site wastewater treatment systems will serve future development, which must be approved by the Glenn County Environmental Health Department. Therefore, it is concluded that there is no impact.

c) **Would the project require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?**

**Less Than Significant Impact.** As stated in Section IX c) above, the proposed project should not in itself create hydraulic, hydrology, and water quality impacts to drainage facilities; however, industrial development of the site will increase impervious surface area through the construction of driveways and buildings with a corresponding increase in surface water (storm water) runoff. Industrial development will be designed to ensure that there is no direct or indirect increase of runoff or backwater effects. It is the developer’s responsibility to ensure that runoff from the project site will meet all Regional Water Quality Control Board standards. This may be accomplished with the implementation of Best Management Practices such as detention/retention ponds or basins, on-site storage, and vegetated swales. The project will not generate substantial additional sources of polluted runoff. Therefore, it is concluded that there will be a less than significant impact.

d) **Would the project have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?**

**Less Than Significant Impact.** The project does not require new or expanded entitlements for water supplies. Existing groundwater entitlements and resources would be sufficient to serve the project. It is concluded that there will be a less than significant impact.

e) **Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project’s projected demand in addition to the provider’s existing commitments?**

**No Impact.** There is no municipal wastewater treatment provider for the area. Individual sewage disposal systems are currently the only method of providing sewage disposal for the project area. No wastewater treatment facilities will need to be constructed or expanded. As a result, there is no impact.

f) **Would the project be served by a landfill with sufficient permitted capacity to accommodate the project’s solid waste disposal needs?**
Less Than Significant Impact. The proposed project will be required to comply with all solid waste regulations as implemented and enforced by the County of Glenn. Solid waste disposal is currently provided at the Glenn County landfill. Glenn County is planning on the future closure of the landfill and updating the solid waste system.

While future development at the project site would generate solid waste, the amount of additional waste will depend upon the nature of the development. Development at the project site would generate moderate amounts of solid waste during construction. Construction materials would be sorted on site throughout construction and transported to appropriate waste management facilities. Recyclable materials would be separated from non-recyclable items and stored until they could be transported to a designated recycling facility. Normal waste/garbage will be collected in a container and disposed of by a private carrier such as Waste Management. Waste disposal is not anticipated to be a significant issue. The cumulative impacts on the landfill will be offset in the future from increased requirements for sorting and diversion and increases in disposal costs. It is concluded that there will be a less than significant impact.

g) Would the project comply with federal, state, and local statutes and regulations related to solid waste?

No Impact. The proposed project will be required to comply with all federal, state, and local statutes and regulations related to solid waste disposal. As a result, there would be no impact on solid waste regulations.
XIX. MANDATORY FINDINGS OF SIGNIFICANCE

<table>
<thead>
<tr>
<th>a)</th>
<th>Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?</th>

</table>

| b) | Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)? | | | | |
|---|---|---|---|---|
| | | | | | |

| c) | Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | | | | |
|---|---|---|---|---|
| | | | | | |

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant Impact. All impacts associated with the project have been identified in this document. Impacts on biological resources and cultural resources were discussed in sections IV and V above. The project would not degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. All uses at the site are subject to applicable codified federal, state, and local laws and regulations. It is concluded that there will be a less than significant impact.
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

**Less Than Significant Impact.** The proposed project would have a less than significant impact. Each impact will be less than significant with implementation of applicable federal, state, and county standards or adopted best practices. Total impacts from the project will not be cumulatively considerable. Therefore, impacts are considered less than significant.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

**Less Than Significant Impact.** The proposed project would not create significant hazards or health safety concerns. Aspects of this project, which have the potential to have an effect on human beings or the environment, have been discussed in this document. The impacts of the project have been concluded to be less than significant. The project as proposed will not have substantial adverse effects on human beings, either directly or indirectly. It is concluded that there will be a less than significant impact.

PROPOSAL: General Plan Amendment 2017-001, Zone Change 2017-002 and Site Plan Review 2017-018

The applicant has proposed a General Plan Amendment, Zone Change and Site Plan Review for a vacant 5.0± acre parcel.
EXISTING GENERAL PLAN: “Rural Residential”

PROPOSED GENERAL PLAN: “Industrial”

EXISTING ZONING: “RE-5” (Rural Residential Estate Zone, 4.25 acre minimum parcel size)

PROPOSED ZONING: “M” (Industrial, 1 acre minimum parcel size)

If the proposal is approved, the applicant intends on developing the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc., which would not be a permitted use under the existing RE-5 zoning.

The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code §15.440.020.B.13. The warehouse will require an application for a Site Plan Review, which has been applied for concurrently.

APN: 017-013-042 (5.0± acres)

LOCATION: The project site is located on the east side of N. Tehama Street (County Road 99W), south of County Road 48, west of County Road KK County Road 45, within the unincorporated area of Willows in Glenn County, California.

FLOOD ZONES: Flood Zones “X” according to Flood Insurance Rate Map (FIRM) No. 06021C0612D, dated August 5, 2010, issued by the Federal Emergency Management Agency (FEMA). Flood Zone “X” (shaded) is a moderate flood hazard area and consists of areas of 0.2% annual chance flood.

The Glenn County Planning Division is requesting comments on this proposal for determination of completeness, potential constraints, and/or proposed conditions of approval. If comments are not received by **TUESDAY, DECEMBER 12, 2017**, it is assumed that there are no specific comments to be included in the analysis of the project. Comments submitted by e-mail are acceptable. Thank you for considering this matter.

**AGENCY COMMENTS:**

Please consider the following:

1. Is the information in the application complete enough to analyze impacts and conclude review?

2. Comments may include project-specific code requirements unique to the project. Cite code section and document (i.e. General Plan, Subdivision Map Act, etc.).
3. What are the recommended Conditions of Approval for this project and justification for each Condition? When should each Condition be accomplished (i.e. prior to any construction at the site, prior to recording the parcel map, filing the Final Map, or issuance of a Certificate of Occupancy, etc.)?

4. Are there significant environmental impacts? What mitigation(s) would bring the impacts to a less than significant level? When should mitigation(s) be accomplished (i.e. prior to recording parcel map, filing Final Map, or Certificate of Occupancy, etc.)?

North: AG AP-80
East: single family residential RE-5
South: Industrial M
West: Commercial SC

14. Topography: Flat

15. Vegetation: volunteer vegetation
16. Water Supply:  
   Source or Type:  
   Provider:  
   Existing: none  
   Proposed: well private

17. Sewage Disposal:  
   Existing: none  
   Proposed: septic private

18. Fire Protection:  
   Existing: none  
   Proposed: fire sprinklers private

19. School District(s):  

20. Natural Hazards: none

21. Provide any additional information that may be helpful in evaluating this request:
   This parcel is bordered by service commercial and industrial on two sides already. It is not a desirable site for a residence because of the proximity to existing industrial and commercial operations. It also is in close to the Rail road tracks

Revised November 2012
DECLARATION UNDER PENALTY OF PERJURY
(Must be signed by Applicant(s) and Property Owner(s))
(Additional sheets may be necessary)

The Applicant(s) and/or Property Owner(s), by signing this application, shall be deemed to have agreed to defend, indemnify, release and hold harmless the County, its agents, officers, attorneys, employees, boards and commissions from any claim, action or proceeding brought against the foregoing individuals or entities, the purpose of which is to attack, set aside, void or null the approval of this development entitlement or approval or certification of the environmental document which accompanies it, or to obtain damages relating to such action(s). This indemnification agreement shall include, but not be limited to, damages, costs expenses, attorney fees or expert witness fees that may be asserted by any person or entity, including the applicant, arising out of or in connection with the approval of the entitlement whether or not there is concurrent passive or active negligence on the part of the County.

ENVIRONMENTAL INFORMATION FORM
To be completed by applicant or engineer
Use extra sheets if necessary

This list is intended to meet the requirements of State of California Government Code Section 65940.

I. GENERAL INFORMATION:

1. Name: North Valley Building Systems Inc (applicant)
   Address, City, State, Zip: #30 Seville Ct. Chico, CA 95928
   Telephone: (530) 345-7296 Fax: (530) 345-2399
   E-mail: Bret@northvalleybuilding.com

2. Name: Baker Trucking Inc. (owner)
   Address, City, State, Zip: 1031 N. Tehama St. Willows, CA 95988
   Telephone: (530) 934-4523 Fax: (530) 934-7085
   E-mail: tony@bakertruckinginc.com

3. Address and Location of Project: South east corner of Co. Rd. 48 and N. Tehama St.

4. Current Assessor's Parcel Number(s): 017-013-042

5. Existing Zoning: RE-5

6. Existing Use: Vacant

7. Proposed Use of Site (project for which this form is prepared):
   Warehouse building for storage and distribution of construction materials

8. Indicate the type of permit(s) application(s) to which this form pertains: Zone change, site plan review
9. If the project involves a variance, conditional use permit, or rezoning application, state this and indicate clearly why the application is required:
   This project requires rezoning from RE-5 to M.

10. List and describe any other related permit(s) and other public approvals required for this project, including those required by city, regional, state, and federal agencies:
    Glenn Co. planning, building, environmental health and public works

11. Have any special studies been prepared for the project site that are related to the proposed project including, but not limited to traffic, biology, wetlands delineation, archaeology, etc? No

II. ENVIRONMENTAL SETTING:

1. Describe in detail the project site as it exists before the project, including information on topography, soil stability, plants and animals (wetlands, if any), different crops, irrigation systems, streams, creeks, rivers, canals, water table depth, and any cultural historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or Polaroid photos will be accepted.
   Site is currently vacant, no improvements are present. Parcel has been used for winter row crops several years ago. No irrigation is present on parcel. No farming has occurred for several years, parcel is currently covered with volunteer grasses that are mowed every couple of months to reduce fire danger. See attached photos.

2. Describe the surrounding properties, including information on plants, animals, and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, agricultural, etc.), intensity of land use (one-family, apartment houses, shops, department stores, dairy, row crops, orchards, etc.) Attach photographs of the vicinity. Snapshots or Polaroid photos will be accepted.
   North: Agricultural, almond trees zoned AP-80
   East: Single family residence, Zoned RE-5
   South: Trucking Company, Zoned industrial
   West: Baker Trucking Inc, zoned SC

3. Describe noise characteristics of the surrounding area (include significant noise sources): N. Tehama road, Rail road tracks,
III. SPECIFIC ITEMS OF IMPACT:

1. Drainage:

Describe how increased runoff will be handled (on-site and off-site): Off site will not increase, on site will increase but will all remain on site

Will the project change any drainage patterns? (Please explain): No, parcel currently drains to ditch along the north, then to the east

Will the project require the installation or replacement of storm drains or channels? If yes, indicate length, size, and capacity: Yes, will have underground french drain type to handle roof run off

Are there any gullies or areas of soil erosion? (Please explain): None, parcel is flat.

Do you plan to grade, disturb, or in any way change swales, drainages, ditches, gullies, ponds, low lying areas, seeps, springs, streams, creeks, river banks, or other area on the site that carries or holds water for any amount of time during the year? No, low lying areas on parcel.

If yes, you may be required to obtain authorization from other agencies such as the Army Corps of Engineers or California Department of Fish and Game.

2. Water Supply:

Indicate and describe source of water supply (domestic well, irrigation district, private water company): Proposed domestic well

Will the project require the installation or replacement of new water service mains? No

3. Liquid Waste Disposal:

Will liquid waste disposal be provided by private on-site septic system or public sewer? On site septic

If private on-site septic system, describe the proposed system (leach field or seepage pit) and include a statement and tests explaining percolation rates, soil types, and suitability for any onsite sewage disposal systems: Proposed leach fields, proposed use is less than 50 gallons per day
Will any special or unique sewage wastes be generated by this project other than normally associated with resident or employee restrooms? Industrial, chemical, manufacturing, animal wastes? (Please describe) \textit{no, none}\[1\text{line}\]

Should waste be generated by the proposed project other than that normally associated with a single family residence, Waste Discharge Requirements may be required by the Regional Water Quality Control Board.

4. **Solid Waste Collection:**

How will solid waste be collected? Individual disposal, private carrier, city? \textit{Private Carrier}\[1\text{line}\]

5. **Source of Energy:**

What is the source of energy (electricity, natural gas, propane)? \textit{Electricity}\[1\text{line}\]

If electricity, do any overhead electrical facilities require relocation? Is so, please describe: \textit{Over head Electrical service lines need to be relocated farther to east.}\[1\text{line}\]

If natural gas, do existing gas lines have to be increased in size? If yes, please describe: \textit{No, No natural gas is proposed}\[1\text{line}\]

Do existing gas lines require relocation? If yes, please describe: \textit{no}\[1\text{line}\]

6. **Fire Protection:**

Indicate number and size of existing and/or proposed fire hydrants and distance from proposed buildings: \textit{1 hydrant, 60' from proposed building}\[1\text{line}\]

Indicate number and capacity of existing and/or proposed water storage facilities and distance from proposed buildings: \textit{1 tank, 60' from proposed building}\[1\text{line}\]
IV. FOR ZONE CHANGE, ZONE VARIANCE, AND SPECIAL USE PERMIT APPLICATION:

1. Number and sizes of existing and proposed structures: none

   Square footage (structures) 106,805 S.F.; 0 , S.F.
   (New) (Existing)

2. Percentage of lot coverage: 48%

3. Amount of off-street parking provided: 44 including handicap Ton

4. Will the project be constructed in phases? If so, please describe each phase briefly: no, all completed in phase #1

5. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected: N/A

6. If commercial, indicate type, estimated employment per shift, days and hours of operation, estimated number of daily customers/visitors on site at peak time, and loading facilities: industrial not commercial

7. If industrial, indicate type, estimated employment per shift, and loading facilities: storage/distribution of construction materials. Monday-Friday 7 am-5 pm

8. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project: N/A

9. List types and quantities of any hazardous or toxic materials, chemicals, pesticides, flammable liquids, or other similar product used as a part of the operation and storage container sizes:
   none

Submit Material Safety Data Sheets (MSDS) for any proposed hazardous materials. If hazardous materials are proposed, it is recommended that the applicant contact the Air Pollution Control District/CUPA for permitting requirements.
10. Describe any earthwork (grading) to be done and dust control methods to be used during construction: Water truck as required

11. Describe any potential noise or vibration sources associated with the project (i.e. compressor, machine noise, heavy equipment). Truck traffic into loading dock

12. Describe source, type, and amount of air pollutant emissions (smoke, odors, steam, gases, water vapor, dust, chemicals) from the project. Describe what methods would be used to reduce emissions: none

V. CERTIFICATION:

I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements and information presented are true and correct to the best of my knowledge and belief.

Re: Site Plan Review for Baker Trucking Storage Warehouse
County Rd. 48 and N. Tehama St. (APN- 017-013-042)

To Whom It May Concern;

This letter is to provide information in support of our proposed storage building on the parcel listed above. In an attempt to meet the increasing local demands for warehouse storage we would like to construct a storage warehouse for our own use at Baker Trucking. The parcel above is a logical choice for the placement of the warehouse as it is adjacent to our current trucking operation. We currently lease warehouse space in Chico, 45 miles from our base of operations and the origin of 90% of materials to be stored in this warehouse.

The purpose of this warehouse is to receive bulk truckloads of palletized construction materials. The materials are received in van trailers through the proposed loading dock and unloaded with warehouse forklifts. No materials will be unloaded or stored outside of the proposed warehouse. The materials are then entered into inventory and stored in rows on the floor of the warehouse. Baker Trucking will then pull from that inventory to supply different orders placed by their clients. Like receiving, all orders being shipped out of warehouse will be in van trailers through the proposed loading dock. No manufacturing, production, packaging, retail sales or customers will take place at the proposed warehouse. Hours of operation will vary from day to day but will not exceed 7 am to 5 pm Monday-Friday. It is anticipated that at the most 3-4 employees will be present in the warehouse on days that loads are being received or shipped.

Anticipated trucking into and out of the site should be approximately 10 trucks per day. Two (2) new commercial drive approaches in compliance with Glenn County Public Works will need to be constructed prior to project completion. All though forty-eight (48) parking spots are shown on the site plan in attempt to comply with the parking ordinance of Glenn County, only 5 will be required for employees.
This warehouse has been designed for this operation, it takes a large amount of square footage of floor space to separate and store products with access. Although the warehouse is large, all operations will occur on the inside and will be minimal. This proposed warehouse is of similar construction of surrounding structures on parcels to the South and West. The parcel to the North is vacant. We have located the loading dock at the closest point of entry from N. Tehama. All traffic will enter and exit at the West end of Road 48.

Given the location of the proposed warehouse and that of our surrounding parcels, we feel that the proposed project is a benefit to the community. By concentrating activities to these isolated parcels, we would be reducing the traffic and improving environmental quality. If you have any questions or need any further clarification on the operation, feel free to give us a call at (530) 216-8155.

Sincerely,

Baker Trucking Inc.

Re: General Plan Amendment #2017-001 and Zone Change 2017-002, Baker Trucking, Inc. APN 013-250-004

We have reviewed the project information noted above and recommend it be approved with the following comments/concerns:

- The parcel will be re-zoned from “Rural Residential” (RE-5, 4.25 acre minimum parcel size) to “Industrial” (M, 1 acre minimum parcel size) and is not planned to have city services. A properly permitted and installed sewage disposal system and water well would be required before an approved development permit could be approved.

- Soil testing for this property was provided on April 11th, 2007. The soil is very poor and Glenn County Environmental Health has requested percolation testing be done by an engineer for any sewage disposal system on the property.

If you have any further question please contact Environmental Health.

I.C. File # Y17-6
Project Review

Dear Ms. Ward,

In response to your request, a project review for the project cited above was conducted by examining the official maps and records for archaeological sites and surveys in Glenn County.

RESULTS:

Prehistoric Resources: According to our records, no sites of this type have been recorded in the project area or 1-mile project vicinity. The project is located in a region utilized by Konkow Maidu populations. Unrecorded prehistoric cultural resources may be located in the project area.

Historic Resources: According to our records, no sites of this type have been recorded in the project area. However, one site of this type has been recorded in the 1-mile project vicinity consisting of the Glenn Colusa Canal. Unrecorded historic cultural resources may be located in the project area.

The USGS Willows (1951) 15' quad map indicates that the Southern Pacific Railroad and a road are located within the project area; Highway 99 is located adjacent to the project area; and that Willows, the Glenn Colusa Canal, Willow Creek, Wilson Creek, South Fork Wilson Creek, a pump, levee, wells, an orchard, gas tanks, a water tank, cemetery, post office, tower, streams, roads, and structures are located within the general project vicinity.
The City of Willows began as a watering hole which was later filled in. The watering hole and nearby springs were used in cattle operations since the late 1840s. Willows was a large shipping point for large barley and wheat ranches after the construction of the Central Pacific Railroad. Willows is now the county seat for Glenn County. According to the Historic Property Data File, the Willows Post Office, Glenn County Courthouse, Public Library, as well as numerous historic homes in Willows are designated as historic properties. A copy of this list is enclosed.

Additionally, the Willows Post Office is listed on the National Register of Historic Places; The Willows and nearby Kanawha are listed as Points of Interest; and the City of Willows, Glenn County Courthouse, and Kanawha are listed on the California Inventory of Historic Resources. A copy of the GLO survey plat map (1855) depicting Willow Creek, sloughs, and a historic road in the project vicinity is enclosed. Also enclosed is a copy of the historic Willows (1906) quad map depicting Willows, canals, railroads, roads, and structures in the project area and vicinity.

**Previous Archaeological Investigations:** According to our records, the project area has not been previously surveyed for cultural resources.

**RECOMMENDATIONS:**

Based upon the above information and the local topography, and regional history, the project is located in an area considered to be sensitive for prehistoric, protohistoric, and historic cultural resources. Konkow Maidu populations used the local region for seasonal and/or permanent settlement, as well as for the gathering of plants, roots, seeds, domestic materials, and hunting seasonal game. Historically, Euro-Americans utilized the region for farming, ranching, and transportation opportunities.

Therefore, because the project area has not been previously surveyed, we recommend that a professional archaeologist be contacted to conduct a cultural resources survey of the entire project area. The consultant can offer recommendations for avoidance and protection of any newly identified resources. In addition, any existing structures should be evaluated for potential historical significance. The project archaeologist will be able to offer recommendations for the preservation of or mitigation of effects on any cultural resources encountered as a result of field survey. A list of qualified consultants is available online at www.chrisinfo.org.
The project archaeologist should also contact the appropriate local Native American representatives for information regarding traditional cultural properties that may be located within project boundaries for which we have no records. The Native American Heritage Commission should be contacted at (916) 373-3710 for information regarding Native American representatives in the vicinity of the project.

During any phase of parcel development, if any potential prehistoric, protohistoric, and/or historic cultural resources are encountered, all work should cease in the area of the find pending an examination of the site and materials by the project archaeologist. This request to cease work in the area of a potential cultural resource find is intended for accidental discoveries made during construction activities, and is not intended as a substitute for the recommended cultural resources survey.

The fee for this project review is $75.00 (1 hour Project Review Time @ $75.00 per hour). Payment for this project review was received on December 6, 2017 (Check # 51031). Thank you for your dedication preserving Glenn County’s and California's irreplaceable cultural heritages, and please feel free to contact us if you have any questions or need any further information or assistance.

Sincerely,

[Signature]

COMMENTS ON THE GENERAL PLAN AMENDMENT 2017-001, ZONE CHANGE 2017-002 AND SITE PLAN REVIEW 2017-018, WILLOWS, GLENN COUNTY

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) is a responsible agency for this project, as defined by the California Environmental Quality Act (CEQA). On 28 November 2017, we received your request for comments on the General Plan Amendment 2017-001, Zone Change 2017-002 and Site Plan Review 2017-018.

The applicant has proposed a General Plan Amendment, Zone Change and Site Plan Review for a vacant 5.0a acre parcel. The applicant intends on developing the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc., which would not be a permitted use under the existing RE-5 zoning. The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the industrial zoning district under Glenn County Code Section 15.440.020.B.13. The warehouse will require an application for a Site Plan Review, which has been applied for concurrently.

Based on our review of the information submitted for the proposed project, we have the following comments:

General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (CGP)
Construction activity, including demolition, resulting in a land disturbance of one acre or more must obtain coverage under the CGP. The proposed project must be conditioned to implement storm water pollution controls during construction and post-construction as required by the CGP. To apply for coverage under the CGP the property owner must submit Permit Registration Documents electronically prior to construction. Detailed information on the CGP can be found on the State Water Board website:

Industrial Storm Water
On 16 November 1990, the USEPA promulgated storm water regulations (40 CFR Parts 122, 123 & 124) which require specific categories of industrial facilities discharging storm water to obtain NPDES permits and to implement Best Available Technology Economically Achievable (BAT) and Best Conventional Pollutant Control Technology (BCT) to reduce or eliminate industrial storm water pollution. These requirements apply to industries with a Standard
Industrial Classification (SIC) 4212, Local Trucking without Storage. This category covers establishments primarily engaged in furnishing trucking or transfer services without storage for freight generally weighing more than 100 pounds, in a single municipality, contiguous municipalities, or a municipality and its suburban areas. Industrial operations with a 4212 SIC code must be covered by a General Permit for Discharges of Storm Water Associated with Industrial Activities. A permit application package is available at the Redding office of the Central Valley Water Board (see letterhead for contact information).

Isolated wetlands and other waters not covered by the Federal Clean Water Act
Some wetlands and other waters are considered "geographically isolated" from navigable waters and are not within the jurisdiction of the Clean Water Act. (e.g., isolated wetlands, vernal pools, or stream banks above the ordinary high water mark). Discharge of dredged or fill material to these waters may require either individual or general waste discharge requirements from the Central Valley Water Board. If the U.S. Army Corps of Engineers determine that isolated wetlands or other waters exist at the project site, and the project impacts or has potential to impact these non-jurisdictional waters, a Report of Waste Discharge and filing fee must be submitted to the Central Valley Water Board. The Central Valley Water Board will consider the information provided and either issue or waive Waste Discharge Requirements. Failure to obtain waste discharge requirements or a waiver may result in enforcement action.

Any person discharging dredge or fill materials to waters of the State must file a report of waste discharge pursuant to Sections 13376 and 13260 of the CWC. Both the requirements to submit a report of waste discharge and apply for a Non-Jurisdictional General Waste Discharge Requirement (WDR) may be met using the same application form, found at: http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2004/wqo/wqo2004-0004.pdf

If you have any questions or comments regarding this matter please contact me at (530) 224-4784 or by email at Scott.Zaitz@waterboards.ca.gov.

Scott A. Zaitz, R.E.H.S.
Environmental Scientist
Storm Water & Water Quality Certification Unit

cc: Ms. Nicole Schleeter, U.S. Army Corps of Engineers, Sacramento Department of Fish and Wildlife, Region 1, Redding
NOTICE IS HEREBY GIVEN that the Planning Commission of the County of Glenn, State of California, as lead agency, will consider recommending an environmental determination and hold a public hearing as provided in this notice. Based on a preliminary analysis, the Planning Commission may make recommendations to the Glenn County Board of Supervisors as listed in this notice. A negative declaration is a statement that the project will not result in a significant adverse effect on the environment. A public hearing will be held at the Glenn County Board of Supervisors Chambers, 2nd Floor Memorial Hall, 525 West Sycamore Street, Willows, CA, on Wednesday, May 16, 2018, at 9 A.M., or as soon thereafter as the business of the Commission will allow.

PROJECT: General Plan Amendment 2017-001 and Zone Change 2017-002
Pending approval of the General Plan Amendment and Zone Change, the applicant has also applied for a Site Plan Review (SPR 2017-018) to develop the site with a 106,805 sq. ft. warehouse storage building for Baker Trucking, Inc. The General Plan Amendment and Zone Change are required in order for the warehouse to be a permitted use in the proposed industrial zoning district under Glenn County Code §15.440.020 (B) (13).

Existing/Proposed General Plan Designation: “Rural Residential”/ “Industrial”
Existing Zoning: “RE-5” (Rural Residential Estate Zone, 4.25-acre minimum parcel size)
Proposed Zoning: “M” (Industrial, 1-acre minimum parcel size)

LOCATION: The project site is located on the east side of North Tehama Street (County Road 99W), south of County Road 48, west of County Road KK, and north of the City of Willows, within the unincorporated area of Glenn County, California. APN: 017-013-042 (5.0± acres)

LANDOWNERS: Baker Trucking, Inc. APPLICANT: North Valley Building Systems, Inc.

DECISIONS: The Planning Commission will hold a Public Hearing in consideration of recommending that the Board of Supervisors approve the following:
(A) General Plan Amendment 2017-001, “Rural Residential” to “Industrial”
(B) Zone Change 2017-002, “RE-5” to “M” (Industrial)
(C) Negative Declaration for the proposed project

All interested parties may submit comments regarding the proposed project by Wednesday, May 16, 2018, at 9:00 A.M., or appear and present oral and/or written testimony at the Public Hearing. Please note that if you challenge the proposed action(s) in court, you may be limited to raising only those issues you or someone else raised at the Public Hearing described in this notice, or in written correspondence at, or prior to, the Public Hearing. All environmental information and project documentation is available for review at the Planning & Community Development Services Agency, 777 North Colusa Street, Willows, CA 95988. Contact Andy Popper, Associate Planner by phone (530) 934-6540, fax 934-6533, or by email at planning@countyofglenn.net.
