PROPOSAL: Pre-Application Review (PAR) 2018-001, Weststeyn Dairy Conditional Use Permit 2006-007 – Amendment

Weststeyn Dairy has applied for a Pre-Application Review/Early Consultation to amend Conditional Use Permit 2006-007. Conditional Use Permit 2006-007 was approved by Glenn County Planning Commission on June 20th, 2007.

The proposed amendment includes increasing the previously approved herd size from 4,957 to 10,750 a herd increase of 5,793. The construction of a one-megawatt PV solar array and an onsite fueling facility. Additional project information/documentation is included.
Previously Approved: Conditional Use Permit 2006-007

- Total head: 4,957
- Total animal units: 5,320
- 5 lactating cow barns
- 1 dry cow barn
- 1 special needs barn
- 4 heifer barns
- 1 baby calf pen with calf milk barn
- 3 hay barns
- 2 commodity barns
- 1 equipment repair shop
- 3 employee residences
- 4 manure settling ponds
- 2 large treatment storage lagoons

Site Plan Review 2017-015

- Install-Operate Manure Digester

LOCATION: The site is located at 5747 County Road 65, approximately seven miles southwest of the City of Willows; west of County Road D, north of County Road 69, and east of the Tehama-Colusa Canal, in the unincorporated area of Glenn County, California.

ZONING: “AP-80” Agriculture Preserve Zone (72-acre minimum parcel size)

GENERAL PLAN: “Intensive Agriculture”

APNs: 014-170-021 (280± acres) 014-170-028 (185± acres)
014-170-039 (320± acres) 014-170-041 (81.62± acres)
014-170-042 (281.15± acres)

FLOOD ZONES: Flood Zone “X” according to Flood Insurance Rate Map (FIRM) No. 06021C0800D, dated August 5, 2010 issued by the Federal Emergency Management Agency (FEMA). Approximately three acres of the southwest corner of 014-170-021 is Flood Zone “A”.

The Glenn County Planning Division is requesting comments on this proposal for determination of completeness, potential constraints, and/or proposed conditions of approval. If comments are not received by Wednesday, August 8, 2018, it is assumed that there are no specific comments to be included in the analysis of the project. Comments submitted by e-mail are acceptable. Thank you for considering this matter.
AGENCY COMMENTS:

Please consider the following:

1. Is the information in the application complete enough to analyze impacts and conclude review?

2. Comments may include project-specific code requirements unique to the project. Cite code section and document (i.e. General Plan, Subdivision Map Act, etc.).

3. What are the recommended Conditions of Approval for this project and justification for each Condition? When should each Condition be accomplished (i.e. prior to any construction at the site, prior to recording the parcel map, filing the Final Map, or issuance of a Certificate of Occupancy, etc.)?

4. Are there significant environmental impacts? What mitigation(s) would bring the impacts to a less than significant level? When should mitigation(s) be accomplished (i.e. prior to recording parcel map, filing Final Map, or Certificate of Occupancy, etc.)?

ENVIRONMENTAL INFORMATION FORM
To be completed by applicant or engineer
Use extra sheets if necessary

This list is intended to meet the requirements of State of California Government Code Section 65940.

1. GENERAL INFORMATION:

1. Name: _JG Weststeyn Dairy_
Address, City, State, Zip: _5747 County Road 65, Willows, CA 95988_
Telephone: (209) 351-0067  Fax: n/a
E-mail: jqweststeyndairy@outlook.com

2. Name: _Jake Weststeyn_
Address, City, State, Zip: _5747 County Road 65, Willows, CA 95988_
Telephone: (209) 351-0067  Fax: n/a
E-mail: jqweststeyndairy@outlook.com

3. Address and Location of Project: _5747 County Road 65, Willows, CA 95988_

4. Current Assessor's Parcel Number(s): _014-170-021 et al_

5. Existing Zoning: _AP-80_

6. Existing Use: _Dairy_

7. Proposed Use of Site (project for which this form is prepared): _Dairy expansion_

8. Indicate the type of permit(s) application(s) to which this form pertains: _Amendment to existing CUP# 2006-007_
9. If the project involves a variance, conditional use permit, or rezoning application, state this and indicate clearly why the application is required: This is an amendment to the existing CUP to expand the herd size. Cows will go into the barns identified on the existing CUP. The dairy plans to add solar and onsite CNG fueling for trucks and farm equipment directly related to farm and dairy activity only.

10. List and describe any other related permit(s) and other public approvals required for this project, including those required by city, regional, state, and federal agencies: County building permits, Air District Authority to Construct, Fire Marshall review and approval, Regional Water Board updates to Waste Management Plan, Nutrient Management Plan.

11. Have any special studies been prepared for the project site that are related to the proposed project including, but not limited to, traffic, biology, wetlands delineation, archaeology, etc? This work was already done under the existing CUP.

II. ENVIRONMENTAL SETTING:

1. Describe in detail the project site as it exists before the project, including information on topography, soil stability, plants and animals (wetlands, if any), different crops, irrigation systems, streams, creeks, rivers, canals, water table depth, and any cultural historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or Polaroid photos will be accepted.

   The location is a dairy. All activity will be performed on dairy-owned property.

2. Describe the surrounding properties, including information on plants, animals, and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, agricultural, etc.), intensity of land use (one-family, apartment houses, shops, department stores, dairy, row crops, orchards, etc.) Attach photographs of the vicinity. Snapshots or Polaroid photos will be accepted.

   North: Crop lands and orchards with one residence

   East: Crop lands

   South: Crop lands

   West: Range lands

3. Describe noise characteristics of the surrounding area (include significant noise sources): Nothing unusual.
III. SPECIFIC ITEMS OF IMPACT:

1. Drainage:

Describe how increased runoff will be handled (on-site and off-site): Stormwater will be managed in existing storm water ponds. Manure will be directed to an anaerobic digester per SPR 2017-0015.

Will the project change any drainage patterns? (Please explain): No

Will the project require the installation or replacement of storm drains or channels? If yes, indicate length, size, and capacity: Existing drainage systems will be utilized. Stormwater management is covered in the existing Waste Management Plan. Stormwater and process water stays on site.

Are there any gullies or areas of soil erosion? (Please explain): No

Do you plan to grade, disturb, or in any way change swales, drainages, ditches, gullies, ponds, low lying areas, seeps, springs, streams, creeks, river banks, or other area on the site that carries or holds water for any amount of time during the year? No

If yes, you may be required to obtain authorization from other agencies such as the Army Corps of Engineers or California Department of Fish and Game.

2. Water Supply:

Indicate and describe source of water supply (domestic well, irrigation district, private water company): Agricultural and domestic wells on dairy property and the Kanawha Water District provide water to the dairy.

Will the project require the installation or replacement of new water service mains? No

3. Liquid Waste Disposal:

Will liquid waste disposal be provided by private on-site septic system or public sewer? Dairy manure will be directed to an anaerobic digester. A small septic will be added for office.

If private on-site septic system, describe the proposed system (leach field or seepage pit) and include a statement and tests explaining percolation rates, soil types, and suitability for any onsite sewage disposal systems: Leach field. Similar to what is existing and permitted at the dairy barn.

Details to be provided upon building permit application.
Will any special or unique sewage wastes be generated by this project other than normally associated with resident or employee restrooms? Industrial, chemical, manufacturing, animal wastes? (Please describe)  Additional dairy manure will be generated by the herd expansion. Manures will be directed toward an anaerobic digester per SPR 2017-0015. Solids and liquids from the digester will be managed according to Waste Management Plans and Nutrient Management Plans to be updated to reflect the increased herd numbers in conjunction with the Regional Water Board.

Should waste be generated by the proposed project other than that normally associated with a single family residence, Waste Discharge Requirements may be required by the Regional Water Quality Control Board.

4. Solid Waste Collection:

How will solid waste be collected? Individual disposal, private carrier, city? Individual disposal

5. Source of Energy:

What is the source of energy (electricity, natural gas, propane)? Applicant proposes to add solar for electricity to supplement grid power.

If electricity, do any overhead electrical facilities require relocation? Is so, please describe: Power to the barns will be drawn from the adjacent barns using existing electrical service.

If natural gas, do existing gas lines have to be increased in size? If yes, please describe: New gas lines are not required for the herd expansion.

Do existing gas lines require relocation? If yes, please describe: n/a

6. Fire Protection:

Indicate number and size of existing and/or proposed fire hydrants and distance from proposed buildings: n/a

Indicate number and capacity of existing and/or proposed water storage facilities and distance from proposed buildings: 20,000 gallon storage tank at the dairy barn with available water.
IV. FOR ZONE CHANGE, ZONE VARIANCE, AND SPECIAL USE PERMIT APPLICATION:

1. Number and sizes of existing and proposed structures:

   ____________________________________________________________
   ____________________________________________________________

   Square footage (structures) ____________________ S.F.; ____________________ S.F.
   (New)                                           (Existing)

2. Percentage of lot coverage:

3. Amount of off-street parking provided:

4. Will the project be constructed in phases? If so, please describe each phase briefly:

   ____________________________________________________________
   ____________________________________________________________

5. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected:

6. If commercial, indicate type, estimated employment per shift, days and hours of operation, estimated number of daily customers/visitors on site at peak time, and loading facilities:

   ____________________________________________________________

7. If industrial, indicate type, estimated employment per shift, and loading facilities:

   ____________________________________________________________

8. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project:

   ____________________________________________________________

9. List types and quantities of any hazardous or toxic materials, chemicals, pesticides, flammable liquids, or other similar product used as a part of the operation and storage container sizes:

   ____________________________________________________________

Submit Material Safety Data Sheets (MSDS) for any proposed hazardous materials. If hazardous materials are proposed, it is recommended that the applicant contact the Air Pollution Control District/CUPA for permitting requirements.
10. Describe any earthwork (grading) to be done and dust control methods to be used during construction: 

11. Describe any potential noise or vibration sources associated with the project (i.e. compressor, machine noise, heavy equipment). 

12. Describe source, type, and amount of air pollutant emissions (smoke, odors, steam, gases, water vapor, dust, chemicals) from the project. Describe what methods would be used to reduce emissions: 

V. CERTIFICATION:

I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements and information presented are true and correct to the best of my knowledge and belief.

Date: 02/16/16  Signature: 

For: 

According to Section 65943 for the California Government Code, your application will be reviewed within 30 days and you or your agent will receive written notice regarding the completeness of your application. Any reviewing agency may, in the course of processing the application, request the applicant to clarify, amplify, correct, or otherwise supplement the information required for the application.

According to Section 65944 (C), additional information may be requested in order to comply with Division 13 of the State of California Public Resources Code.
Conditional Use Permit Amendment

Project Description

Conditional Use Permit: 2006-007

Applicant: JG Weststeyn Dairy LP (dairy owner and operator)

Location: JG Weststeyn Dairy ("Dairy") on Assessor’s Parcel Number: 014-170-021 et al.

Description of Proposed Amendment:

Applicant proposes the following amendments to its existing Conditional Use Permit:

1. Increase the dairy herd to reflect the numbers in the table below.
2. Add a 1 megawatt solar energy facility
3. Install an onsite truck and farm equipment fueling facility

Each of these additions is described in more detail below:

Herd Size Increase:
The Dairy’s existing CUP 2006-007 allows for up to nine barns to be built. Currently the dairy operates with four barns that house the animal population in the table below. The Dairy operator plans to build additional barns to house the following herd expansion:

<table>
<thead>
<tr>
<th>Animal Type</th>
<th>2017 Animal Averages</th>
<th>Proposed New Animal Averages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lactating Cows</td>
<td>2,200</td>
<td>5,000</td>
</tr>
<tr>
<td>Dry Cows</td>
<td>357</td>
<td>750</td>
</tr>
<tr>
<td>Replacement Heifers &amp; Calves</td>
<td>2,400</td>
<td>5,000</td>
</tr>
<tr>
<td>Total:</td>
<td>4,957</td>
<td>10,750</td>
</tr>
</tbody>
</table>

To support the proposed herd expansion, the Applicant also plans to build additional features into the dairy including a manure digester permitted under SPR 2017-0015 and other related facilities designed to convert manure into renewable vehicle fuels.

Solar Power Production:
The Dairy is proposing to add a 1 megawatt PV solar array to produce renewable electricity that will be used to run the dairy, the digester, and related equipment.
Onsite Fueling Station:
The digester will produce biogas that will be upgraded on site to PG&E biomethane (Rule 21-compliant) natural gas specifications. Biomethane can be used to power trucks and other farm equipment with renewable gas (RCNG). Applicant proposes to install a small pre-fabricated onsite fueling station that will be used solely to fuel milk trucks (approximately six daily), Applicant-owned hauling trucks and farm equipment. The RCNG will displace diesel fuel, thus improving air quality in the region while helping optimize dairy operating costs.

The location and general arrangement of the additional barns and infrastructure described above are included on the attached site plan. Design and construction will be in compliance with all applicable building codes as to be prescribed and issued in permits by the Glenn County Building Department.

The Applicant will work with the Regional Water Quality Control Board staff to update the dairy Waste Management Plan and Nutrient Management Plan to reflect the increased herd size.

All activities will take place on Dairy property. There will be a minor increase in truck traffic due to the hauling of additional milk as a result of the proposed expansion. Dairy management predicts and additional three trucks per day will result from this increase in milk production.

Construction time for the barns is typically approximately four to six months from initiation. The solar array will be installed using standard solar industry practices. The onsite fueling station will be prefabricated offsite and connected onsite to the biomethane production facility as depicted on the attached draft site plan.
