BRIDGE 11C0057 OVER SALT CREEK ON COUNTY ROAD 306 CLOSURE, UPDATE #6

The construction phase of the emergency bridge repair project is scheduled to begin on Tuesday, September 19, 2023.

This project will replace the fill behind both bridge abutments, replace the sacked concrete with rock slope protection (RSP), restore the roadway with new compacted aggregate base and hot mix asphalt (HMA), and construct non-erosive drainage outlets to the creek. Completion of the repair project will allow the County to open Bridge 11C0057 on County Road 306 to regular traffic.

During the construction phase, the road closure area will expand to allow construction crews adequate room for safe excavation operations of multiple trenches.

Motorists traveling in this area should anticipate construction equipment entering and leaving the construction site. Additionally, there will be large excavations in the roadway, 6-feet or more deep, at both ends of the bridge.

The bridge will remain CLOSED TO ALL TRAFFIC until the approaches can be repaired.

Assuming no unexpected cultural resource or environmental discoveries during the course of construction, staff anticipates the construction of the emergency bridge repair to take about six weeks to complete, weather permitting, once the contractor begins the work.

We understand the impacts of this closure to the residents in the community, however, the safety of our residents and motorists is priority.

For additional information, please go to our website <https://www.countyofglenn.net/dept/public-works/road-bridge-maintenance/news> or call at 530-934-6530.
